THIS IS A PERMISSION CUBICLE

Did you know that every time you flush, about 9l of drinking water is wasted?

When you use this cubicle, you are given permission to not flush.

Simple rules for using this cubicle:

If it's yellow let it mellow, if it's brown flush it down.

Close the lid when you do need to flush.

Don't flush if it is not needed.

Use minimal toilet paper and flush if the bowl looks like it may become clogged.

Saving water shouldn't make you sick. It's still important to wash your hands after using the toilet. Turn the tap off while you soap up or switch to waterless hand sanitiser.

We are in a severe drought. Please be water wise.

Your municipality is enforcing water restrictions in your area.
