

GET THE TEST!

HELP US TO HELP YOU PLAN YOUR FUTURE.

The Department of Health is encouraging you to know your status and be responsible.

Anyone above the age of 12 years who are sexually active should get tested and know their HIV status.

- You should go for an HIV test if you have never had one before
- If you have changed your sex partner since the last HIV test or
- If you have more than one sexual partner at a time.

Trained health care workers will offer free HIV counselling and testing at clinics, hospitals and Community Health Centres. Your HIV status will be a secret and no one else will know.

I AM RESPONSIBLE... SOUTH AFRICA IS TAKING RESPONSIBILITY.
