FOR YOU

LUCRATIVE PERIOD FOR CYBER CRIMINALS

Beware of email phishing attacks

- think before clicking on any sales ad links.

Adverts that appear online

can bring malicious programs or redirect you to fake sites if you click on them. Rather search for the deal on the retailers website.

Before you shop online

- make sure the site you are using is really the retailer's website.

Use secure payment methods

and research the reputation of new sites or sellers.

Be wary of big discounts on products

and other advantages offered by unfamiliar sites on social media sites.
