

Date: 24 February 2022

**EVDS Communication 26: Capturing vaccines received in other countries on the Electronic Vaccine Data System (EVDS).**

As of 24 February 2022, the EVDS system will allow the historical back capturing of vaccines that people have receive in other countries. This communication will detail the process to follow on EVDS.

1. As a start, the client must register on EVDS, through the EVDS registration portal.
2. When the client arrives at the vaccine station, enter their EVDS profile. (please note that the profile below is fictional).

**Search by Number**

Compulsory fields indicated by \*. Enter ID number, patient record number, or other number (passport, asylum or refugee number) e.g. 6810124050089

Type of number to search for\*

ID number  Patient record number  All other numbers

Number to search for\*

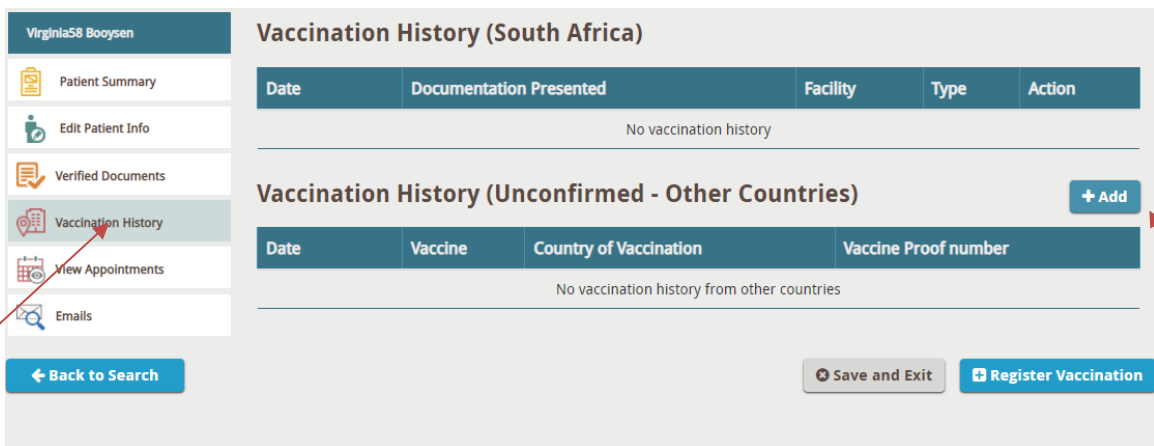

**Search results** Select a patient from the list below.

Search:

Surname & First Name(s)	Identification Number(s)	Date of Birth	Address	Facility	Vaccination Summary	Vaccine Eligibility
Booyesen Virginia58	F1235679021	1963-03-09	34 Street City Of Johannesburg Gauteng Althea City Of Johannesburg	South Africa		VPA-1-U98AZ32W COVID-19 Vaccine Janssen VPA-1-U98AZ32W Comirnaty Is Eligible

Showing 1 to 1 of 1 entries

3. Once you are in the profile select Vaccination History.

4. This will open up the above screen. Now select add.

5. A pop up screen will appear. The first question is whether the client has provided proof of vaccination. The client must provide proof of having a vaccination outside South Africa. If the client is unable to provide any proof, please contact [melvin.moodley@westerncape.gov.za](mailto:melvin.moodley@westerncape.gov.za) for advice on how to proceed.

6. If the client does have proof of vaccination, proceed. Complete the fields. When you select vaccine, a drop down menu of the various vaccines administered around the world will appear. Select the vaccine that the client has already received.

**Add vaccination administered outside South Africa**  
Compulsory fields indicated by \*

Proof of vaccination is required to capture vaccinations that were administered outside of South Africa.

**Did the patient present proof of vaccination? \***  
 Yes  No

**Vaccination date \***  
2020-12-07

**Country of vaccination \***  
Afghanistan

8. The vaccination will now be part of the client's vaccination record.

9. If the client requires a booster, the system will automatically calculate the booster date.

10. In the case where the client received their primary series of vaccines in another country, they can **ONLY receive Pfizer boosters**. This is based on advice by clinical advisory committees.
