#### **ACCESS TO BASIC SERVICES, 2013**

#### Introduction

Regional profiles provide the Western Cape municipalities with data and information which may assist in planning, budgeting and the prioritisation of municipal services. It is acknowledged that municipalities across the Western Cape have different capacities and therefore will use the information in this publication to suit their own needs.

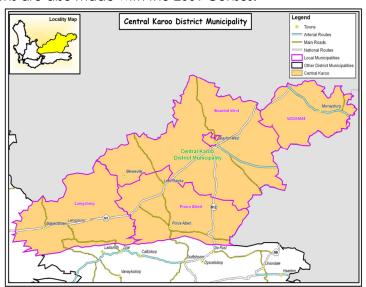

The areas covered in this profile include information on demographics, education, health, crime, poverty, housing, municipal services, labour force, economy and environmental management. Furthermore, the population projections 2013 – 2017, updated administrative data relating to health, education and South African Police Service Crime Statistics are updates from the Socio-economic Profile (SEP-LG) 2013. These updates complement Chapter 7: Socio-economic analysis and economic performance of the Municipal Economic Review and Outlook (MERO) 2014 which was published in October 2014.

The indicators reflect the socio-economic reality of municipalities. As such valuable insight can be gained as to the developmental challenges faced by communities residing within a specific geographical area.

This profile uses data primarily sourced from Statistics South Africa, administrative data from sector departments, the MERO, Global Insight Regional Explorer and Quantec. The data sourced from sector departments are the most recent that is available. The latest survey data available at municipal level from Statistics South Africa include the 2011 Census; whilst comparisons are also made with the 2001 Census.

The format of the profiles has been adjusted to focus the analysis at regional/district level whilst municipal specific profiles will also be made available separately.

The information contained in this profile therefore highlights information for the Prince Albert Municipality in relation to the broader Western Cape Province.

#### 1. Demographics

#### 1.1 Population

As per Census 2011, the Western Cape population composes of 11.25 per cent of the total population of the country with 5.8 million persons, having increased from 4.5 million in 2001. Thus the Western Cape population grew at a rate of 2.6 per cent per annum between 2001 and 2011. This is faster than the national population growth rate of 1.5 per cent and is largely due to immigration to the Western Cape, where individuals believe they can obtain jobs and better standards of living.

According to 2013 projections from the Department of Social Development, Prince Albert have the second largest population size in the Central Karoo District consisting of 13 408 persons. It is the second fastest growing municipality in the Central Karoo after Beaufort West (2.62 per cent) and Laingsburg (1.87 per cent) growing at an average annual rate of 2.05 per cent from 2001 to 2013. This is much faster than the District growth rate at 1.5 per cent per annum, indicating that net in-migration may be occurring within this municipal area.

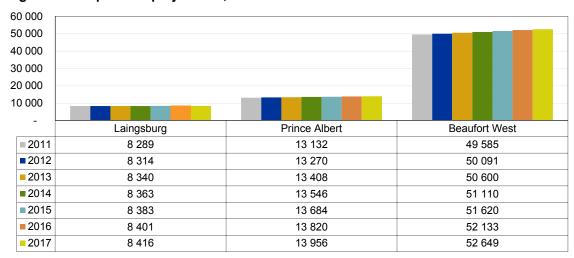

Figure 1 Population projections, 2013 - 2017

Source: Western Cape Department of Social Development, 2014

According to population forecasts by the Department of Social Development, Prince Albert Municipality's population will continue to grow albeit at a slower rate of 0.33 per cent on average per annum from 2013 to 2017. By 2017 the municipality is expected to have a population size of 13 956. This is an indication that less inmigration is expected within this municipal area. Beaufort West will remain the area with the highest population numbers within the Central Karoo District.

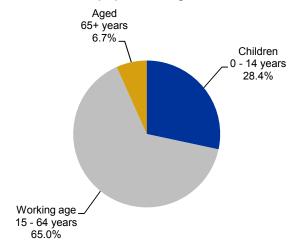

Figure 2 Prince Albert population age distribution, 2013

Source: Western Cape Department of Social Development, 2014

Prince Albert's population age distribution consists of the following: Children (aged 0 - 14 years) 28.4 per cent, Working age (aged 15 - 64 years) 65.0 per cent and Aged (aged 65 years and above) 6.7 per cent. The total dependency ratio is thus 53.9 per cent having decreased from 56.2 per cent in 2001. This implies a slightly lower strain on the incomes of the working age population.

#### 2. Education

The literacy rate in the Western Cape is 87.2 per cent which is higher than the literacy rate in the country as a whole of 80.9 per cent. The literacy rate in the Central Karoo District is significantly lower at 73.4 per cent. Prince Albert literacy rate has increased significantly from 59.0 per cent in 2001 to 69.9 per cent in 2011. In this regard the Prince Albert literacy rate is still below par (as it is the lowest in the Central Karoo District), and is still low compared to the provincial average. This could be due to the high dropout rates (39.2 per cent in 2012) in Prince Albert as a result of learners having to leave school due to a lack of finances, gangsterism and substance abuse.

Table 1 Education indicators<sup>2</sup> in Central Karoo District, 2011 - 2014

Central Karoo District	Learner enrolment (Gr 1-12 + LSEN)		Average Learner- teacher ratio		Average Dropout rate		Г %		No. of schools Literacy with rate libraries		No. of no fee			
	2013	2014	2012	2014	2012	2013	2011	2012	2013	2011	2012	2014	2013	2014
Beaufort West	10 688	10 787	30.8	31.2	41.0%	43.1%	73.0	81.1	78.4	74.9	17	17	16	16
Laingsburg	1 221	1 275	21.9	27.7	65.9%	49.4%	69.0	89.3	88.9	70.0	3	3	3	3
Prince Albert	2 154	2 144	30.8	25.2	39.2%	59.3%	100.0	72.5	100.0	69.9	4	4	4	4

Source: Western Cape Education Department, 2011 - 2014

<sup>1</sup> The literacy rate is an indication of the levels of education and skill in the economy. It measures the proportion of persons aged 15 years and older with an education qualification of higher than Grade 7.

<sup>&</sup>lt;sup>2</sup> For the "Drop % in FET phase" the enrolment for Grade 10 of 2011 is compared with the Grade 12 enrolment of 2013.

In terms of the Department of Social Development population projections Prince Albert had 3 807 people who were in the age group from 5 years to 19 years old, which implies that the 4 schools with libraries have to service approximately 951 people each. Learner enrolment decreased by 0.46 per cent from 2 154 in 2013 to 2 144 in 2014. The average learner-teacher ratio has decreased with 5.6 per cent from 30.8 to 25.2 per cent from 2012 to 2014. Schools within Prince Albert achieved a 100 per cent matric pass rates in 2011 and 2013, which is commendable.

#### 3. Health

#### 3.1 Healthcare facilities

Table 2 Healthcare facilities in the Central Karoo District

Regional area	Community Health Centres	Community Day Centres	PHC clinics	Number of PHC clinics - non-fixed (satellites)	PHC clinics - non-fixed	PHC facilities	district	Number of regional hospitals
Laingsburg	0	0	1	1	1	1	1	0
Prince Albert	0	0	2	1	2	2	1	0
Beaufort West	0	1	5	1	5	6	2	0
Central Karoo	0	1	8	3	8	9	4	0

Source: Western Cape Department of Health, 2014

In 2014, there were a total of 6 healthcare facilities situated in the Prince Albert municipal area. These 6 healthcare facilities includes 2 fixed Public Health care clinics, 1 satellite Public Health Care Clinic, 2 mobile Public Health care clinics as well as 1 district hospital within Prince Albert. In terms of the 2013 populations projections there are approximately 2 234 people for every healthcare centre in Prince Albert, which indicates that there are a need for healthcare facilities within the Prince Albert area.

#### 3.2 HIV/AIDS and Tuberculosis treatment and care

Table 3 HIV/AIDS and TB treatment and care in the Central Karoo District

	HIV - A	ntiretroviral tre	atment	Tuberculosis			
Regional area	ART patient load March 2013	ART patient load March 2014	Number of ART clinics/ treatment sites 2014	Number of TB patients 2012/13	Number of TB patients 2013/14	Number of TB clinics/ treatment sites 2014	
Laingsburg	78	119	1	61	52	4	
Prince Albert	131	151	2	130	119	6	
Beaufort West	740	904	4	430	419	17	
Central Karoo	949	1 174	7	621	590	27	

Source: Western Cape Department of Health, 2014

Prince Albert has the second largest Antiretroviral treatment (ART) patient load after Beaufort West in the Central Karoo District and reflects an increase of 15.3 per cent from 2013 to 2014. There are 2 ART clinics/treatment sites available to service the Prince Albert population. The number of Tuberculosis (TB) patients in Prince Albert is also the second largest in the District, however it has shown a slight decline by 8.5 per

cent from 2012/13 to 2013/14. A total of 6 TB clinics/treatment sites are available to service the TB patients within this municipal area. The number of TB patients has also declined in Laingsburg with 14.75 per cent and Beaufort West with 2.62 per cent between 2012/13 and 2013/14.

#### 3.3 Child and maternal health

Table 4 Child and maternal health in the Central Karoo District

		Child health		Maternal health						
Regional area	Full immunisation coverage rate	Number of severely malnourished children under 5 years	Severe malnutrition for children < 5 years per 100 000 population	Maternal mortality per 100 000 live births	Number of deliveries to women under 18 years	Delivery rate woman under 18 years	Number of termination of pregnancies performed	Termination of pregnancy per 100 000 population		
Laingsburg	89.4	3	465	0	11	11.3	2	142		
Prince Albert	82.4	11	1 043	0	16	12.2	0	0		
Beaufort West	77.2	8	164	0	56	6.4	0	0		
Central Karoo	79.2	22	335	0	83	7.6	2	15		

Source: Western Cape Department of Health, 2014

A look at child health indicates that Prince Albert has the second highest immunisation coverage rate of only 82.4 per cent in the Central Karoo District after Laingsburg that have an immunisation coverage rate of 89.4 per cent. There were 11 incidences of severely malnourished children reported in the municipal area. As for maternal health, there have been no maternal deaths per 100 000 live births in Prince Albert. According to the Western Cape Department of Health there have been 16 recorded teenage pregnancies within the municipal area of which no terminations were performed. The teenage pregnancies could be related to the high dropout rates in the Further Education and Training (FET) phase at Prince Albert schools.

#### 4. Economic performance

The Central Karoo District regional economy generated 0.6 per cent of the Western Cape GDPR during 2013, i.e. R2.7 billion of the Western Cape's total R431 billion. The Central Karoo District economy grew by 3.7 per cent per annum in real terms from 2000 to 2013. The Prince Albert economy grew at a fastest rate at 4.2 per cent. Prince Albert Municipality is however one of the smallest non-metro municipalities according to growth and size in the Province. Its percentage contribution to real GDPR growth and size is 0.3 per cent. According to the Growth Potential Study Prince Albert Municipality ranked 22<sup>nd</sup> out of 24 non-Metro municipalities in the Western Cape in terms of economic potential and is regarded as a region with very low growth potential. (Van Niekerk, A, November 2013: 28).

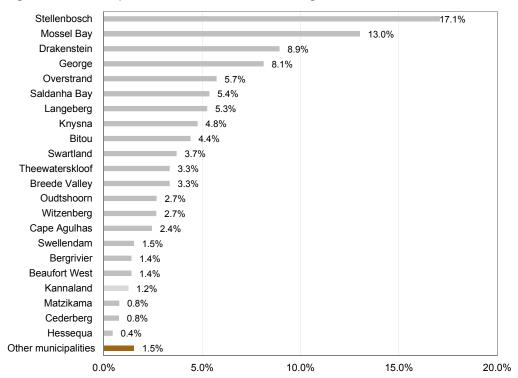

Figure 3 Municipal contribution to real GDPR growth and size in the Province

Source: Quantec Research 2014 (MERO 2014)

The largest contributing sectors to GDPR within Prince Albert Municipality between 2001 and 2011 was Finance, insurance, real estate and business services (31.7 per cent), followed by Construction (14.0 per cent) and Agriculture, forestry and fishing (13.5 per cent). As expected, the smallest contributing sector is Mining and quarrying (0.1 per cent).

Table 5 Prince Albert Municipality sectoral growth, 2000 - 2013

Real GDPR growth yoy % per sector									
Sector	Trend 2000 - 2013	Recovery 2010 - 2013							
Agriculture	-1.6	1.8							
Manufacturing	2.8	0.9							
Services	5	3.7							

Source: Quantec Research 2014 (MERO 2014)

The Agriculture sector contracted by 1.6 per cent over the period from 2000 to 2013, however recovered and maintained real GDPR growth of 1.8 per cent year–on–year from 2010 to 2013. The Manufacturing sector performed well below the average growth trend of 2.8 per cent during the recovering phase at 0.9 per cent. The growth performances of the Agriculture sector in Prince Albert during the recovery period are commendable as it recovered to positive growth over this period.

#### 5. Employment

The Central Karoo District unemployment rate was 22.7 per cent in 2011. This is slightly above than the unemployment rate of the Western Cape of 21.6 per cent. The Prince Albert unemployment rate was recorded at 19.4 per cent in 2011 which was 3.3 percentage points lower than the unemployment rate of the Central Karoo District. Similarly, Prince Albert had the second highest youth unemployment rate at 25.4 per cent in the Central Karoo District, Beaufort West has the highest youth unemployment of 34.5 per cent and Laingsburg's youth unemployment are the lowest at 22 per cent.

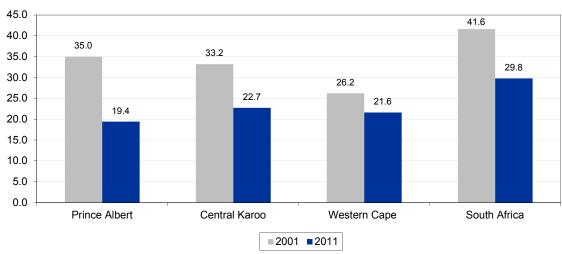

Figure 4 Unemployment rates, 2001 - 2011

Source: Statistics South Africa Census 2001 and 2011

Approximately 770 formal net jobs were lost in the Agriculture sector over the period between 2000 and 2013, while zero net employment was recorded in the Manufacturing sector and merely 19 jobs in Services sector.

Table 6 Net employment in the Central Karoo District, 2000 - 2013

	Net employment (number)							
	Agricultural Trend	Manufacturing Trend	Services Trend					
Regional area	2000 - 2013	2000 - 2013	2000 - 2013					
Laingsburg	-370	20	-110					
Prince Albert	-770	0	19					
Beaufort West	-1 000	180	1 290					
Central Karoo DMA	-270	100	-80					
Total Central Karoo	-2 410	300	1 290					

Source: Quantec Research 2014 (MERO 2014)

There appears to be a trend towards employing highly skilled and skilled individuals within the District. According to observations from the Municipal Economic Review and Outlook (2014) labour demand for unskilled and semi-skilled workers has declined by an annual average rate of 2.7 per cent from 2000 - 2013, while the demand for highly skilled labour grew by 1.9 per cent per annum.

#### 6. Poverty

The Central Karoo District showed improvement in its poverty<sup>3</sup> rates from 38.7 per cent in 2001 to 32.5 per cent in 2010 and has thus underperformed with regard to the provincial average (22.1 per cent). Prince Albert has the highest poverty rate in the District with 43.3 per cent, down from 44.1 per cent in 2001 (see figure). Laingsburg follows Prince Albert with a 32.5 per cent poverty rate and Beaufort West is the lowest at 29.1 per cent.

■ 2001 ■ 2010

Figure 5 Percentage of households living in poverty, 2001 - 2010

Source: IHS Global Insight, 2013

Household income is one of the most important determinants of welfare in a region. The ability to meet basic needs such as adequate food, clothing, shelter and basic amenities is largely determined by the level of income earned by the households.

Table 7 Household income across municipalities in the Central Karoo District, 2011

Regional area	None income	R1 - R4 800	R4 801 - R9 600	R9 601 - R19 600	R19 601 - R38 200	R38 201 - R76 400	R76 401 - R153 800	R153 801 - R307 600	R307 601 - R614 400	R614 001 - R1 228 800	R1 228 801 - R2 457 600	R2 457 601+
Central Karoo												
Laingsburg	5.3%	2%	2.9%	20.9%	25.4%	21.8%	11%	6.6%	2.9%	0.7%	0.5%	0%
Prince Albert	6.3%	3.3%	6.1%	19.6%	26.7%	17.1%	9.4%	6.5%	3.6%	0.6%	0.3%	0.3%
Beaufort West	9.5%	3.3%	5.8%	21.7%	23.8%	15.3%	9.5%	6.9%	3.2%	0.7%	0.2%	0.2%

Source: Statistics South Africa Census 2011

In 2011, approximately 3.3 per cent of Prince Albert's 3.578 households had an income of less than R400 per month. It is National Government's NDP goal to have zero per cent of household to earn less than R418 per month by 2030 of which Prince Albert is lagging behind. The high levels of poverty imply great strain on municipal resources to provide free basic services.

10

<sup>&</sup>lt;sup>3</sup> The poverty income line used is based on the Bureau of Market Research's Minimum Living Level (BMR report No. 235 and later editions, Minimum and Supplemented Living Levels in the main and other selected urban areas of the RSA, August 1996).

Table 8 Income per capita

	Per c	apita Income	
Regional area	2011	2012	2013
Western Cape	43 614	44 291	44 553
Central Karoo	21 415	21 755	21 917
Laingsburg Local Municipality	17 021	17 210	17 364
Prince Albert Local Municipality	16 328	16 633	16 786
Beaufort West Local Municipality	21 036	21 401	21 485

Source: Own calculations, Department of Social Development 2014 and Quantec 2014

Income per capita has nevertheless been on the rise within Prince Albert, even though very small at 0.91 per cent between 2012 and 2013, as a result of the economy growing at a faster rate than the population, but is only R16 786 per annum compared to the 2030 NDP goal of R110 000. This is an indication that the improving economic conditions may be slow in benefitting the wider proportion of individuals within the municipality.

#### 7. Safety and security

The safety of persons and property is vitally important to the physical and emotional well-being of people and business. Without the respect of person and property, it would be impossible for people to live peacefully, without fear of attack and for businesses to flourish.

Crime has a significant impact on the economy. It can hamper growth and discourage investment and capital accumulation. If it is not tackled with seriousness, it has the potential to derail both social and economic prosperity.

Peoples' general impressions, as well as the official statistics on safety and crime issues mould perceptions of areas as living spaces or place in which to establish businesses. The discussion in this section that follows is limited to the reported contact and property-related crime such as murder and sexual crimes, as well as crime heavily dependent on police action for detecting drug-related crimes and driving under the influence of alcohol/drugs; these are detailed in the figure below.

2004/05 | 2005/06 | 2006/07 | 2007/08 | 2008/09 | 2009/10 | 2010/11 2011/12 2012/13 2013/14 Burglary at residential premises Driving under the influence of alcohol or drugs Drug-related crime - Murder Total Sexual Crimes 

Figure 6 Crime in Prince Albert Municipality, 2004/05 to 2013/14

Source: South African Police Service, 2013/14

Figure 6 shows the number of crimes within the selected crime categories that was reported to police stations located throughout the Prince Albert municipal area over the period 2004/05 and 2013/14.

Starting with the more serious crimes, the total number of murders reported has fluctuated over the period. The number of sexual crimes has also been on the decline consistently since 2011/12. Burglaries in residential areas, drug-related crimes and driving under the influence of alcohol or drugs have all seen an increasing trend within the Prince Albert area. This may hamper Prince Albert's efforts to grow the economy and create jobs.

#### 8. Access to basic services

The provision of basic services within Prince Albert remained relatively static from 2011 to 2013.

Table 9 Access to minimum basic services

	Wa	iter	Sani	tation	Ene	ergy	Refuse	removal	Hou	sing
Regional area	2011	2013	2011	2013	2011	2013	2013	2013	2011	2013
Central Karoo	98.1%	98.1%	88.9%	88.9%	89.2%	89.2%	78.5%	78.6%	97.3%	97.3%
Laingsburg	98.6%	98.6%	82.5%	82.4%	78.9%	78.9%	59.0%	59.1%	97.4%	97.4%
Prince Albert	98.0%	98.0%	81.0%	81.0%	86.2%	86.2%	72.9%	73.0%	94.4%	94.4%
Beaufort West	98.0%	98.0%	92.2%	92.2%	91.9%	91.9%	83.6%	83.7%	98.1%	98.0%

Water: Piped water on community stand less than 200 m from dwelling

Sanitation: Flush toilet with septic tank

Energy: Electricity

Refuse removal: Removed by local authority at least once a week

Housing: Formal dwelling

Source: Quantec, 2014

Refuse removal is the only basic service which has shown slight some improvement from 72.9 to 73 per cent over this period. Access to basic services in all categories in

Prince Albert Municipality are reflecting below the Central Karoo District average, indicating that there is thus much room for improvement with regard to basic service delivery within Prince Albert Municipality. This is crucial to improve the quality of life of households in the municipal area.

#### 9. Environment

Table 10 Environmental affairs status in Prince Albert Municipality, 2014

Environmental category	Status
Climate Change	The Central Karoo is known for moderate, severe and extreme meteorological drought, which results in negative effects for livestock farming. The changing climatic conditions in the Central Karoo lead to declining groundwater supplies. There are notable cross-linkages between socio-economic and environmental conditions (i.e. rapidly declining dam levels, reduced household and livestock access to water, compromised vegetation cover, farm job losses, etc.). The Central Karoo therefore need early warning systems to identify and respond to adverse climatic conditions in order to minimise the impact on its socio-economic conditions.
Freshwater quality	Water constraints within Prince Albert are a significant and pressing issue. Prince Albert receives its domestic water from the Dorps River and nine boreholes of which the Dorps River is not able to supply the full water needs of the settlement, particularly during the drier months of the year where the flow is very low. The total unaccounted for water is calculated as 12.9 per cent but the real bulk and internal network losses are unknown and should be measured.
Waste disposal	One of the biggest constrainers for Prince Albert's future development and sustainability is waste management. The available airspace left at the Leeu Gamka and Prince Albert sites is very limited (to run out within the next 2 years) and it is not clear what plans are in place to address this. The waste management site in Prince Albert has been identified as a source of localised air pollution (the burning of plastics and smouldering waste).
Air quality	There are relatively few sources of air pollution within the municipal area and as a result ambient air quality is generally good, however the waste management site in Prince Albert has been identified as a source of localised air pollution (the burning of plastics and smouldering waste. The gravel roads throughout the municipality emit fine dust particles into the atmosphere and will increasingly become an air quality issue as traffic volumes increases. The emissions caused by the burning of wood and paraffin for the purposes of cooking, heating and lighting in many homes in the Prince Albert municipal area but particularly in low income areas is also a concern for localised air quality issues.
Biodiversity	Overgrazing poses a risk to the critical biodiversity areas of Prince Albert.

Source: Department of Environmental Affairs and Development Planning, 2014

#### 10. Concluding remarks

The Prince Albert Municipality has shown much improvement over the years with regard to all areas of its socio-economic environment. The socio-economic profile illustrates how the socio-economic environment impacts on the standard of living within the Municipality. The low population size in conjunction with the faster growing economy have led to declining levels of unemployment and increasing household and per capita income. Low levels of human capital have spurred on job losses and have translated to declining poverty levels or indigent support required within the municipal area.

There is still room for improvement with regard to poverty reduction, skills development, basic service delivery and job creation. The improvements are however an indication that the inhabitants of the municipality are reaping some social benefits from the growing economy.

The unemployment rate in Prince Albert has improved and has decreased from 35.0 per cent in 2001 to 19.4 per cent in 2011. The municipality has also had the second lowest youth unemployment rate in the CKD, and decreased substantially from 44.5 per cent in 2001 to 25.4 per cent in 2011. The only concerning issue about employment is that according to preliminary observations from the Municipal Economic Review and Outlook (2014) labour demand for unskilled and semi-skilled workers has declined by an annual average rate of 2.7 per cent from 2000 - 2013, while the demand for highly skilled labour grew by 1.9 per cent per annum.

Prince Albert has the highest poverty rate in the District and the Province with 43.4 per cent, and has only shown some decline from 44.1 per cent in 2001. The poverty levels of the Municipality are more severe compared to that of the District Municipality and these could be due to the low levels of economic activities in the municipal area.

The literacy rate (69.9 per cent) in the Prince Albert municipal area is lower than that of the CKD (73.4 per cent) which could be due to the high dropout rates (39.2 per cent) in 2012. There is also a problem of teenage pregnancies and some learners having to leave school because of the lack of finances. All this have a negative effect on the numbers of children that go to school.

Overall, it can be concluded that safety and security has worsened within Prince Albert Municipality, specifically with regard to burglaries, drug-related crimes and driving under the influence of alcohol, despite the improvements shown in serious crime categories such as murder and sexual crimes.

Access to basic services in all categories in Prince Albert Municipality are reflecting below the Central Karoo District average as well as the Province, indicating that there is thus much room for improvement with regard to basic service delivery within Prince Albert Municipality. This is crucial to improve the quality of life of households in the municipal area.

Annexure A
