Gini coefficient (2012)	0.59	0.60

### ACCESS TO BASIC SERVICES, 2013

## Introduction

Regional profiles provide the Western Cape municipalities with data and information which may assist in planning, budgeting and the prioritisation of municipal services. It is acknowledged that municipalities across the Western Cape have different capacities and therefore will use the information in this publication to suit their own needs.

The areas covered in this profile include information on demographics, education, health, crime, poverty, housing, municipal services, labour force, economy and environmental management. Furthermore, the population projections 2013 – 2017, updated administrative data relating to health, education and South African Police Service Crime Statistics are updates from the Socio-economic Profile (SEP-LG) 2013. These updates complement Chapter 7: Socio-economic analysis and economic performance of the Municipal Economic Review and Outlook (MERO) 2014 which was published in October 2014.

The indicators reflect the socio-economic reality of municipalities. As such valuable insight can be gained as to the developmental challenges faced by communities residing within a specific geographical area.

This profile uses data primarily sourced from Statistics South Africa, administrative data from sector departments, the MERO, Global Insight Regional Explorer and Quantec. The data sourced from sector departments are the most recent that is available. The latest survey data available at municipal level from Statistics South Africa include the 2011 Census; whilst comparisons are also made with the 2001 Census.

The format of the profiles has been adjusted to focus the analysis at regional/district level whilst municipal specific profiles will also be made available separately.

The information contained in this profile therefore highlights information for the Theewaterskloof Municipality in relation to the broader Western Cape Province.

## 1. Demographics

As per Census 2011, the Western Cape population comprises of 11.25 per cent of the total population of the country with 5.8 million persons, having increased from 4.5 million in 2001. Thus the Western Cape population grew at a rate of 2.6 per cent per annum between 2001 and 2011. This is faster than the national population growth rate of 1.5 per cent and is largely due to immigration to the Western Cape, where individuals believe they can obtain jobs and better standards of living.

**Figure 1 Population projections for municipalities in the Overberg District**

Source: Western Cape Department of Social Development, 2014

Figure 1 shows that Theewaterskloof Municipality followed by Overstrand Municipality have the highest populations in Overberg District. According to population estimates by the Department of Social Development, Theewaterskloof's population is expected to grow by 1.3 per cent on average per annum from 111 814 in 2013 to 117 657 in 2017.

**Figure 2 Theewaterskloof Municipality population by age cohort (2013)**

Source: Western Cape Department of Social Development, 2014

Theewaterskloof's population age distribution consist of the following: Children (aged 0 - 14 years) 23.9 per cent, Working age (aged 15 - 64 years) 67.3 per cent and Aged (aged 65 years and above) 8.8 per cent.

## 2. Education

The provincial average for literacy rates was 87.2 per cent in 2011 according to official Census data, and the City of Cape Town was the only region that had a higher rate (90.5 per cent) than that of the Province as a whole. The Overberg District had a literacy rate of 81.1 per cent in 2011, which was higher than that of the West Coast (79.1 per cent) and Central Karoo (73.4 per cent), and similar to that of the Cape Winelands District (81.7 per cent) and Eden (82.6 per cent).

**Table 1 Education Indicators<sup>1</sup> in Overberg District, 2011 - 2014**

Overberg District	Learner enrolment (Gr 1-12 + LSEN)		Average Learner-teacher ratio		Average Dropout rate	Drop in FET phase	% Matric pass rate			% Literacy rate	No. of schools with libraries		No. of no fee schools	
	2013	2014	2012	2014	2012	2013	2011	2012	2013	2011	2012	2014	2012	2014
Overstrand	11 353	11 866	25.5	26.7	49.5%	38.9%	85.1	88.2	92.0	87.5	16	16	12	12
Swellendam	5 668	5 771	27.6	29.2	34.7%	26.5%	90.0	90.6	86.9	74.2	8	8	15	15
Theewaterskloof	18 273	18 488	27.5	28.7	40.8%	33.2%	87.3	84.5	88.8	78.4	26	26	28	29
Cape Agulhas	4 675	4 621	28.1	26.7	37.9%	36.4%	95.1	81.2	92.1	81.1	7	7	8	8

Source: Western Cape Department of Education 2014

Table 1 shows that the majority of the learners in the Overberg District, 45.4 per cent are enrolled at schools in the Theewaterskloof municipal area and the smallest number of learner enrolment is in the Cape Agulhas municipal area at 11.3 per cent.

Municipalities with lower average learner-teacher ratio, i.e. Overstrand and Cape Agulhas tend to produce better Matric pass rates than those with higher average learner-teacher ratios (Swellendam and Theewaterskloof). In 2013, schools in Theewaterskloof Municipality had the third highest Matric pass rate (88.8 per cent) up from 84.5 per cent the previous year.

Theewaterskloof Municipality has the highest number (26) of schools with libraries in the Overberg District compared to 7 libraries at Cape Agulhas. Table 1 also indicates that Theewaterskloof Municipality has the largest number (29) of no fee schools in the region, followed by Swellendam (15) and Overstrand (12) whilst Cape Agulhas has the lowest number (8) of no fee schools.

Table 1 also shows that literacy rates in the region are highest at Overstrand Municipality (87.5 per cent) followed by Cape Agulhas (81.1 per cent) and Theewaterskloof (78.4 per cent). Swellendam's literacy rate of 74.2 per cent was the lowest in the region.

<sup>1</sup> For the "Drop % in FET phase" the enrolment for Grade 10 of 2011 is compared with the Grade 12 enrolment of 2013.

### 3. Health

Good health is vital to achieving and maintaining a high quality of life. A diverse range of factors play a role in ensuring the good health of communities to prevent diseases, especially preventable and contagious/communicable ones. Some of the factors include lifestyle features that also depend on the provision of high quality municipal services, such as clean water and sanitation. It is the function of healthcare services not only to restore bad health, but also to prevent communities from contracting preventable diseases.

#### 3.1 Healthcare facilities

Although healthcare is provided by both public and private institutions, information provided by the Department of Health, as detailed in this section, pertains only to public sector healthcare institutions. Any privately provided facilities or services are not reflected in the information below.

**Table 2 Healthcare facilities in the Overberg District**

Regional area	Community Health Centres	Community Day Centres	Number of PHC clinics - fixed	Number of PHC clinics - non-fixed (Satellites)	Number of PHC clinics - non-fixed (mobiles)	Total number of PHC facilities (Fixed Clinics, CHCs and CDCs)	Number of district hospitals	Number of regional hospitals
Theewaterskloof	0	1	6	2	8	7	1	0
Overstrand	0	0	7	4	1	7	1	0
Cape Agulhas	0	0	4	1	2	4	1	0
Swellendam	0	0	5	4	3	5	1	0
<b>Overberg</b>	<b>0</b>	<b>1</b>	<b>22</b>	<b>11</b>	<b>14</b>	<b>23</b>	<b>4</b>	<b>0</b>

Source: Western Cape Department of Health

Theewaterskloof has 18 primary healthcare facilities in comparison to Overstrand and Swellendam Municipality that each have a total of 13 facilities, while Cape Agulhas has 8. However, in terms of non-fixed primary healthcare (PHC) facilities Theewaterskloof has the highest number (10), consisting of 8 mobile and 2 satellite facilities and Swellendam had the second highest (7) comprising of 4 satellites and 3 mobiles. Overstrand Municipality has five non-fixed primary healthcare (PHC) facilities.

#### 3.2 HIV/AIDS and TB treatment and care

The information presented in Table 3 shows how districts in the Western Cape respond to the healthcare need with respect to HIV/AIDS treatment and care. Although treatment and care is essential in managing the disease, in the case of HIV/AIDS the need and importance of preventative care must be emphasized, especially since to date, there is still no known cure.

**Table 3 HIV/AIDS and TB treatment and care in the Overberg District**

Regional area	HIV - Antiretroviral treatment			Tuberculosis		
	ART patient load March 2013	ART patient load March 2014	Number of ART clinics/ treatment sites 2014	Number of TB patients 2012/13	Number of TB patients 2013/14	Number of TB clinics/ treatment sites 2014
Theewaterskloof	2 150	2 757	8	1 076	1 065	18
Overstrand	2 034	2 506	4	605	602	13
Cape Agulhas	299	372	3	207	182	8
Swellendam	424	547	5	287	254	9
<b>Overberg</b>	<b>4 907</b>	<b>6 182</b>	<b>20</b>	<b>2 175</b>	<b>2 103</b>	<b>48</b>

Source: Western Cape Department of Health, 2014

Table 3 shows that Theewaterskloof Municipality had the second highest increase (28.2 per cent) in the Antiretroviral treatment (ART) patient load within the Overberg District between March 2013 and March 2014 after Swellendam Municipality (29.0 per cent). For the Province as a whole the ART patient load increased by 18.9 per cent between March 2013 and March 2014. Theewaterskloof has 8 ART clinics and Overstrand has 4, not much different to Swellendam (4) and Cape Agulhas (3).

In terms of Tuberculosis (TB), all municipalities in the Overberg District reported decreases in the number of patients with TB. There were marginal decreases in the number of patients with TB in Overstrand (-0.4 per cent) and Theewaterskloof (-1.02 per cent) while cases decreased the most at Cape Agulhas (-12.1 per cent), followed by Swellendam (-11.4 per cent). Theewaterskloof has 18 TB treatment sites compared to Overstrand (13), Cape Agulhas (8) and Swellendam (9).

### 3.3 Child and maternal health

Table 4 shows child health and maternal health statistics for the various districts in the Western Cape Province. The Overberg District is ranked fourth in the Province in terms of the full immunisation coverage rate, with an immunisation rate of 81.6 per cent, slightly outperforming the provincial average of 80.3 per cent. The Overberg District also has the second lowest number of severely malnourished children under 5 years (60), compared to 544 for the City of Cape Town, 218 for Cape Winelands and 168 for the Eden District. The number of cases of children under 5 with severe malnutrition per 100 000 population in the Overberg District (156) is lower than the provincial average of 180 children.

**Table 4 Child and maternal health in the Overberg District**

Regional area	Child health			Maternal health				
	Full immunisation coverage rate	Number of severely malnourished children under 5 years	Severe malnutrition for children < 5 years per 100 000 population	Maternal mortality per 100 000 live births	Number of deliveries to women under 18 years	Delivery rate woman under 18 years	Number of termination of pregnancies performed	Termination of pregnancy per 100 000 population
Theewaterskloof	79.9	19	187	96	100	9.5	113	469
Overstrand	80.3	32	415	78	66	6.1	171	874
Cape Agulhas	85.3	5	183	0	33	9.1	23	340
Swellendam	78.2	4	132	0	42	9.4	25	368
<b>Overberg</b>	<b>81.6</b>	<b>60</b>	<b>156</b>	<b>64</b>	<b>241</b>	<b>8.2</b>	<b>332</b>	<b>580</b>

Source: Western Cape Department of Health, 2014

In relation to maternal health, Table 4 shows that Theewaterskloof reported 96 maternal mortality rates per 100 000 live births in 2013/14, compared to Overstrand (78). Swellendam and Cape Agulhas municipalities reported zero maternal mortality rates per 100 000 live births in 2013/14. The most deliveries to women under the age of 18 years in Overberg District, were reported at Theewaterskloof (100), followed by Overstrand (66) and Swellendam is ranked third with 42 deliveries. Terminations of pregnancies per 100 000 population are highest at Overstrand (874), followed by Theewaterskloof (469) and Swellendam has the third highest pregnancy terminations at 368.

#### 4. Poverty

In 2010, Theewaterskloof reported the highest poverty rates (35.0 per cent), followed by Swellendam (30.7 per cent) and Overstrand (25.5 per cent) as depicted in Figure 3. Cape Agulhas reported the lowest poverty rates (19.1 per cent) and the most dramatic reduction in poverty in the Overberg District. The poverty<sup>2</sup> rates recorded in Theewaterskloof, Swellendam and Overstrand municipalities were higher than the provincial average of 22.1 per cent. High poverty rates put strain on municipal resources as poor households have to be provided with free basic services. The high economic growth experienced by the Overberg District between 2000 and 2011 (5.2 per cent) clearly did not have a positive impact on poverty in Theewaterskloof Municipality as evidenced by the prevailing high poverty rates.

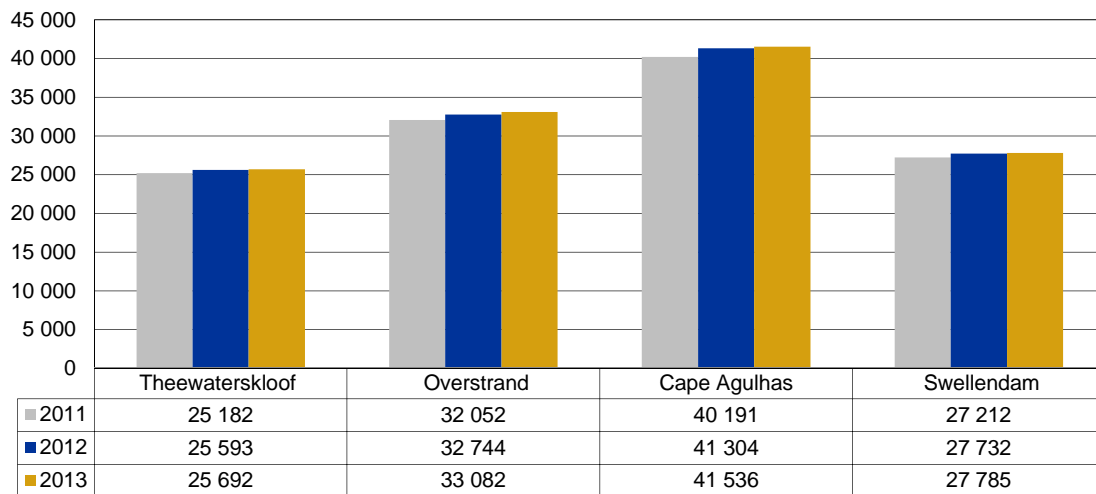

**Figure 3 Poverty rates across Overberg District municipalities**

Source: IHS Global Insight, 2010

Another indicator that can be used to describe the standard of living among the population is the GDP per capita, an amount determined by dividing an area's Real GDP with its population.

<sup>2</sup> The poverty income line used is based on the Bureau of Market Research's Minimum Living Level (BMR report No. 235 and later editions, Minimum and Supplemented Living Levels in the main and other selected urban areas of the RSA, August 1996).

**Figure 4 GDP per capita in the Overberg District municipalities 2011 - 2013**

Source: Western Cape Department of Social Development, 2014

Figure 4 shows GDP per capita figures for municipalities in the Overberg District. Theewaterskloof Municipality has the lowest GDP per capita in the region although it has grown marginally from R25 182 in 2011 to R25 692 in 2013. Cape Agulhas has the highest GDP per capita at R41 536 while Overstrand Municipality's per capita income is the 2<sup>nd</sup> highest in the District, growing marginally from R32 052 in 2011 to R33 082 in 2013 and Swellendam has the 3<sup>rd</sup> highest.

Despite the remarkable increase between 2001 and 2013 Overberg District's GDP per capita is the third lowest in the region, only higher than that of the West Coast (R28 173) and the Central Karoo (R21 917). Only the City of Cape Town had a per capita income higher than the provincial average in 2013.

## 5. Safety and security

The safety of persons and property is vitally important to the physical and emotional well-being of people and business. Without the respect of person and property, it would be impossible for people to live peacefully, without fear of attack and for businesses to flourish. Crime has a significant impact on the economy. It can hamper growth and discourage investment and capital accumulation. If it is not tackled with seriousness, it has the potential to derail both social and economic prosperity. Peoples' general impressions, as well as the official statistics on safety and crime issues mould perceptions of areas as living spaces or place in which to establish businesses. The discussion in this section that follows is limited to the reported contact and property-related crime such as murder and sexual crimes, as well as crime heavily dependent on police action for detecting drug-related crimes and driving under the influence of alcohol/drugs.

**Figure 5 Crime rates in Theewaterskloof, 2004/05 to 2013/14**

Source: South African Police Service, 2014

Figure 5 shows the number of crimes within the selected crime categories that was reported to police stations located at Theewaterskloof Municipality over the period 2004/05 and 2013/14. From the figure it can be seen that drug-related crimes are the most prevalent in Theewaterskloof, with 1 783 cases reported in 2013/14, up from 1 526 cases reported in 2012/13. A concern is the upward trend shown by this type of crime since 2009/10. Burglaries at residential premises are the second most prevalent crime in Theewaterskloof, with 949 cases reported in 2013/14, up from 907 cases in 2012/13. Burglaries at residential premises also showed an upward trend since 2008/09.

The trend of murder cases seems to be gradually increasing from 40 murders in 2010/11 to 50 in 2012/13 and 57 in 2013/14. Sexual crimes have been fluctuating up and down over the last five years, but dropped to 181 in 2013/14 from 204 cases in 2012/13.

Finally, driving under the influence of alcohol has declined significantly from peak levels of 339 cases reported in 2010/11 to the 178 cases reported in 2013/14.

## 6. Access to basic services

All South Africans have a right to access basic services such as housing, water, electricity, sanitation, and waste removal in line with the Bill of Rights. Table 5 shows that in the Theewaterskloof Municipality the basic service that is accessed the most by households is water (96.8 per cent), followed by energy (88.8 per cent) and sanitation (86.4 per cent). Access to refuse removal is the lowest (79.7 per cent).

**Table 5 Access to minimum basic services in Overberg District**

Regional area	Water		Sanitation		Housing		Energy		Refuse removal	
	2011	2013	2011	2013	2011	2013	2011	2013	2011	2013
Overberg	97.4%	97.4%	89.5%	89.4%	91.2%	91.1%	79.7%	79.7%	83.2%	82.9%
Theewaterskloof	96.9%	96.8%	86.6%	86.4%	89.0%	88.8%	79.7%	79.7%	82.0%	81.7%
Overstrand	98.5%	98.5%	93.6%	93.5%	90.4%	90.3%	91.4%	91.4%	81.3%	81.0%
Cape Agulhas	97.5%	97.4%	90.2%	90.1%	97.1%	97.0%	80.0%	80.1%	86.2%	85.9%
Swellendam	96.0%	95.9%	85.7%	85.5%	93.9%	93.9%	73.9%	74.0%	88.9%	88.7%

Water: Piped water on community stand less than 200 m from dwelling

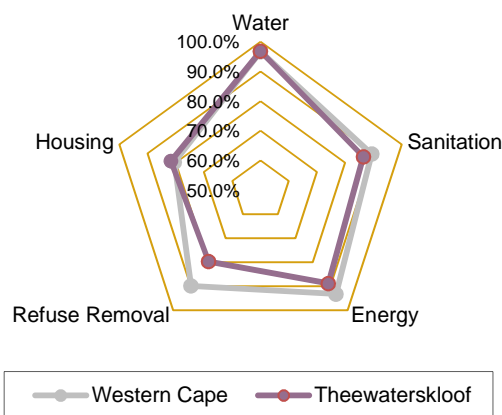

Sanitation: Flush toilet with septic tank

Energy: Electricity

Refuse removal: Removed by local authority at least once a week

Housing: Formal dwelling

Source: Quantec 2014

**Figure 6 Access to basic services - Theewaterskloof versus Western Cape, 2013**

Source: Quantec Research, 2014

Figure 6 shows that Theewaterskloof is on par with the Province in terms of the provision of Water and Housing. However, the Municipality lags behind the Province in the provision of sanitation, energy and refuse removal, with the refuse removal gap quite big. These results indicate that there is much room for improvement in terms of basic service delivery at the Theewaterskloof Municipality which would serve to improve the quality of life of households in the area.

## 7. Economy

Theewaterskloof Municipality's economy grew the slowest in the region, registering a GDP growth rate of 3.6 per cent per annum between 2000 and 2013. Overstrand grew the fastest at 6.3 per cent per annum, followed by Cape Agulhas Municipality (5.3 per cent). Swellendam grew by 4.5 per cent per annum. The Overberg District regional economy generated 3.1 percent of the Western Cape GDP during 2013, i.e. R13.3 billion of the total R431 billion. In 2013 Theewaterskloof's GDP was estimated at R2 872 million, translating into a 1.08 per cent share of the provincial economy.

When non-metropolitan municipalities in the Province are ranked in terms of their contribution to real GDP growth and size in the Western Cape, Theewaterskloof is ranked 11<sup>th</sup>, compared to Overstrand (5<sup>th</sup>), Cape Agulhas (15<sup>th</sup>) and Swellendam (16<sup>th</sup>) as shown in Figure 7 below.

**Figure 7 Municipal contribution to real GDP growth and size in the Province, 2000 - 2013**

Source: Quantec Research 2014 (MERO 2014)

The competitive strengths of the region resides in its food value chain, including a stable Agriculture sector producing for the export market, as well as the associated food and beverage processing industries, a strong building and construction sector, business services, tourism and furniture manufacturing. The four municipalities account for nearly 13 per cent of the cumulative growth of the Province's non-metro municipalities.

During the economic recovery period (2010 - 2013) the Overberg District was the second fastest growing region in the Province at 3.4 per cent, following the Eden District which recorded a real GDP growth rate of 3.8 per cent. The fastest growing sectors within the Overberg District were Finance, insurance, real estate and business services (5.6 per cent), Wholesale and retail trade, catering and accommodation (4.1 per cent) and General government (3.8 per cent). Notable growth rates in the recovery period were also recorded for Manufacturing, Mining and quarrying and the Community, social and personal services, each growing at 2.6 per cent. The slowest growing sector was Electricity, gas and water which recorded a real growth rate of only 0.4 per cent. The slow growth in the Agriculture, forestry and fishing sector of 0.6 per cent is also of concern, especially considering the job losses within this sector.

**Table 6 Overberg District real GDPR growth in provincial perspective, 2010 – 2013 (%)**

Sector	Eden District	Cape Winelands District	West Coast District	Overberg District	Central Karoo District	Cape Metro
Agriculture, forestry and fishing	1.5	-0.4	-0.1	0.6	1.2	2.2
Mining and quarrying	1.5	4	3	2.6	0.3	1.5
Manufacturing	4.3	2.1	1.9	2.6	3.9	2.7
Electricity, gas and water	0.9	2.1	-0.4	0.4	-0.4	1
Construction	2.5	1.7	1.5	2	2.1	1.5
Wholesale and retail trade, catering and accommodation	5	4.8	3.4	4.1	2.1	3.4
Transport, storage and communication	2.4	2.2	1.7	2.6	0.9	2.3
Finance, insurance, real estate and business services	3.9	3.8	5.4	5.6	3.8	3
Community, social and personal services	2.7	2.1	2	2.4	1.1	1.4
General government	5.4	4.2	3.4	3.8	3.5	2.7
<b>Total</b>	<b>3.8</b>	<b>2.7</b>	<b>2.8</b>	<b>3.4</b>	<b>2.6</b>	<b>2.7</b>

Source: Quantec Research 2014 (MERO 2014)

Figure 8 shows that in 2011 the largest contributing sectors to GDPR at Theewaterskloof were Finance, insurance, real estate and business services (30 per cent), followed by Agriculture (21 per cent), Manufacturing (16 per cent) and Wholesale and retail trade, catering and accommodation (9 per cent). Other notable sectors are General government (8 per cent), Construction (6 per cent) as well as Transport, storage and communication (6 per cent). The Overberg District has a well-diversified economy which could be an explanation for its fast economic growth during the recovery period compared to other regions in the Province.

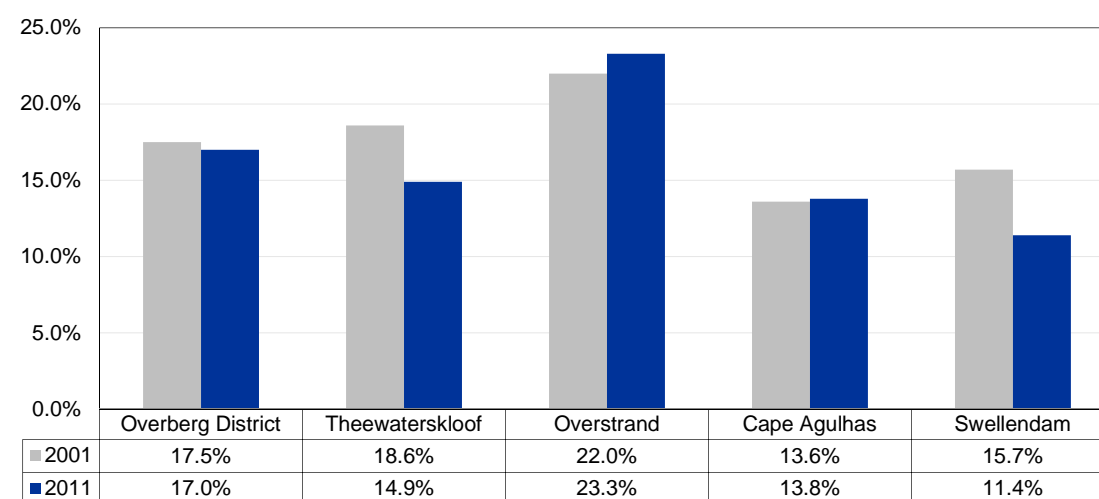

**Figure 8 Theewaterskloof sectoral contribution, 2011 (%)**

Source: Quantec Research 2013 (MERO 2013)

## 8. Employment

According to Census 2011 data the unemployment rate in the Overberg District was 17.0 per cent, which was lower than both the 21.6 per cent for the Western Cape and 29.8 per cent for South Africa. Theewaterskloof had the 2<sup>nd</sup> highest unemployment rate in the region at 14.9 per cent. Although it is the fastest growing municipality in the region, Overstrand had the highest unemployment rate in 2011 (23.3 per cent). Swellendam had the lowest unemployment rate in 2011 (11.4 per cent), followed by Cape Agulhas (13.8 per cent). Figure 9 shows that unemployment decreased between 2001 and 2011 in Theewaterskloof and Swellendam while it increased in Overstrand and to a marginal extent in Cape Agulhas. For the District as a whole, the unemployment rate decreased marginally, from 17.5 per cent in 2001 to 17.0 per cent in 2011.

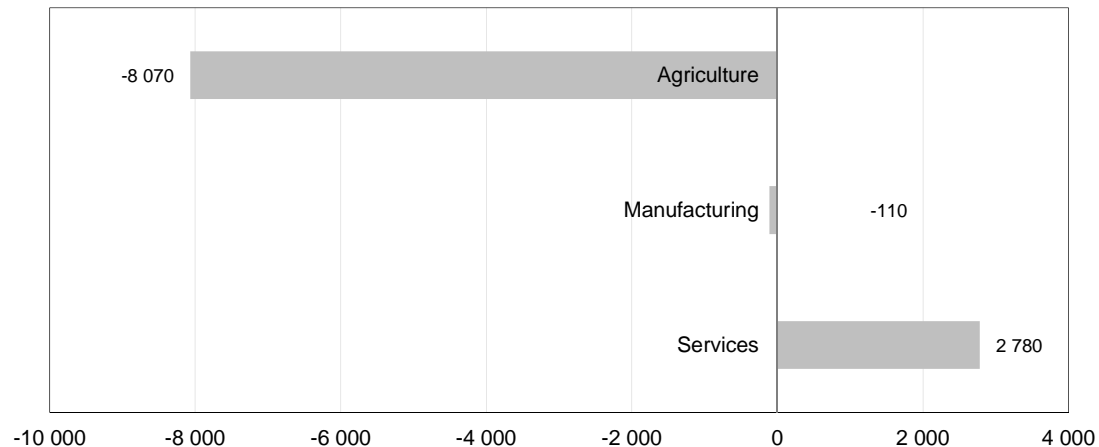

**Figure 9 Unemployment rates in the Overberg District municipalities, 2001 - 2011**

Source: Statistics South Africa Census 2001 and 2011

The youth unemployment rate is of greater concern in most regions in the Province, with the City of Cape Town having the highest youth unemployment rate in 2011 (31.9 per cent), followed by Eden (29.3 per cent), Central Karoo (27.3 per cent) and Overberg (21.4 per cent). This may be due to the youth's lack of experience and relevant skills. The high dropout rates in the Overberg District as mentioned above may also be a contributing factor to youth unemployment in the region. Theewaterskloof had a youth unemployment rate amounting to 19.8 per cent in 2011, the second highest in the region from Overstrand's 31.1 per cent youth unemployment levels.

Approximately 8 070 formal net jobs were lost in the Agriculture sector over the period between 2000 and 2013 as shown in Figure 10. On the other hand, 110 net jobs were lost in the Manufacturing sector and a positive 2 780 net jobs were gained in the Services sector.

**Figure 10 Net employment in Theewaterskloof Municipality, 2000 - 2013**

Source: Quantec Research 2014 (MERO 2014)

There appears to be a trend towards employing highly skilled and skilled individuals within the Overberg District. According to the Municipal Economic Review and Outlook (2014) demand for highly skilled labour grew by 2.8 per cent per annum between 2000 - 2013, that for skilled labour by 1.8 per cent, whilst that for unskilled and semi-skilled workers declined by 2.6 per cent per annum from 2000 - 2013. Skills development initiatives are thus required within the District to meet labour demands.

## 9. Environment

**Table 7 Environmental indicators in Theewaterskloof Municipality, 2014**

Environmental category	Status
Spatial Development Planning	<p>Create an environment conducive to economic activity by upgrading the roads infrastructure. Balance between development and the biosphere, upgrading the coastal route. Some of the "Big Ideas" include:</p> <ul style="list-style-type: none"> <li>• Lighthouse Precinct in Agulhas.</li> <li>• Finding the balance between development job creation and the conservation of the biosphere.</li> <li>• A Green development path.</li> <li>• Bredasdorp/Caledon/Pearly Beach as local airport.</li> <li>• Closing the Gap – upgrade of coastal route between Gansbaai and Agulhas.</li> <li>• Community have to "embrace the white gold and enjoy it".</li> <li>• Integrated marketing effort.</li> <li>• Overberg as adventure sport/professional sport squad training hub.</li> <li>• Utilisation of Critical Biodiversity Areas as spatial planning tools; land procurement finance; area wide planning projects; Identify suitable land in line with SDF; Improved efficiency in land use management and spatial planning.</li> <li>• Integrated Transport Plan.</li> </ul>

Environmental category	Status
Housing	Households with access to formal dwellings in Theewaterskloof were estimated to be 81.7 per cent in 2013. If households living in informal dwellings are not sorted, they become a threat to the environment. Access to housing has however declined slightly over the period, which could probably be ascribed to an increase in demand for housing. Long-term Housing Pipeline and Implementation Plan. Develop integrated and sustainable human settlements; Low income housing; Higher density housing developments. Diversification of housing provision (explore alternative housing options); Current model of housing delivery is not sustainable. To erase informality the ultimate goal should not be to own a brick and mortar structure. The National Policy regarding housing delivery should take cognisance of an incremental approach e.g. the provision of serviced sites, rental stock, rent-to-buy and upgrading of informal settlements.
Water	Households with access to piped water in Theewaterskloof were estimated at 96.8 per cent in 2013. Implementation of a water conservation and demand management strategy; water loss control. During the JPI Specific challenges around water security in the District emerged that were centered around water storage capacity, water losses, Wastewater Treatment Works (WWTWs) and general water management practices. The need to strengthen water management practices was expressed by all Municipalities in the district.
Sanitation	Households with access to flush toilets in Theewaterskloof were estimated at 86.4 per cent in 2013. Improved water and sewerage services in Barrydale, Suurbraak and Buffeljagsrivier.
Energy	Households with access to electricity in Theewaterskloof were estimated at 88.8 per cent in 2013. Energy Regeneration Strategy.
Waste disposal	Households with access to refuse removal (local authority or private) in Theewaterskloof were estimated at 79.7 per cent in 2013: <ul style="list-style-type: none"> <li>• Upgrading of Caledon waste facility.</li> <li>• Rehabilitate Barrydale landfill site.</li> <li>• Improved efficiency in waste management.</li> </ul>
Air quality	Waste disposal sites can create air quality issues, Oxides of nitrogen pollutants can be a concern. There are no large emitters of pollution in most areas around the Overberg District ensuring good air quality.

## 10. Concluding remarks

Theewaterskloof Municipality had the highest population (2013: 111 814) followed by Overstrand Municipality (2013: 83 602). According to population estimates by the Department of Social Development Theewaterskloof's population is expected to grow by 1.3 per cent on average per annum from 108 790 in 2011 to 117 657 in 2017.

Theewaterskloof Municipality's economy grew the slowest in the region, registering a GDP growth rate of 3.6 per cent per annum between 2000 and 2013. Theewaterskloof had the 3<sup>rd</sup> highest unemployment rate in the region at 14.9 per cent, but lower than both the 21.6 per cent for the Western Cape and 29.8 per cent for South Africa. Theewaterskloof Municipality has the lowest GDP per capita in the region although it has grown marginally from R25 182 in 2011 to R25 692 in 2013. In 2010, Theewaterskloof reported the highest poverty rates (35.0 per cent), followed by Swellendam (30.7 per cent).

In Theewaterskloof the basic service that is accessed the most by households is water (96.8 per cent), followed by energy (88.8 per cent) and sanitation (86.4 per cent). Access to refuse removal is the lowest (79.7 per cent).

The majority of the learners in the Overberg District, 45.3 per cent are enrolled at schools in the Theewaterskloof municipal area. Municipalities with lower average learner-teacher ratio, i.e. Overstrand and Cape Agulhas tend to produce better Matric pass rates than those with higher average learner-teacher ratios (Swellendam and Theewaterskloof).

Theewaterskloof has 18 primary healthcare facilities in comparison to Overstrand and Swellendam Municipality that each has a total of 13 facilities.

Drug-related crimes are the most prevalent in Theewaterskloof, with 1 783 cases reported in 2013/14, up from 1 526 cases reported in 2012/13. A concern is the upward trend shown by this type of crime since 2012. Burglaries at residential premises are the second most prevalent crime in Theewaterskloof, with 949 cases reported in 2013/14, up from 907 cases in 2012/13.

However, there is still room for improvement with regard to economic development, poverty reduction, skills development, crime, basic service delivery and job creation. The overall improvements are an indication that the inhabitants of the Municipality are reaping some social benefits from the growing economy.
