ACCESS TO BASIC SERVICES, 2013

Introduction

Regional profiles provide the Western Cape municipalities with data and information which may assist in planning, budgeting and the prioritisation of municipal services. It is acknowledged that municipalities across the Western Cape have different capacities and therefore will use the information in this publication to suit their own needs.

The areas covered in this profile include information on demographics, education, health, crime, poverty, housing, municipal services, labour force, economy and environmental management. Furthermore, the population projections 2013 - 2017, updated administrative data relating to health, education and South African Police Service Crime Statistics are updates from the Socio-economic Profile (SEP-LG) 2013. These updates complement Chapter 7: Socio-economic analysis and economic performance of the Municipal Economic Review and Outlook (MERO) 2014 which was published in October 2014.

The indicators reflect the socio-economic reality of municipalities. As such valuable insight can be gained as to the developmental challenges faced by communities residing within a specific geographical area.

This profile uses data primarily sourced from Statistics South Africa, administrative data from sector departments, the MERO, Global Insight Regional Explorer and Quantec. The data sourced from sector departments are the most recent that is available. The latest survey data available at municipal level from Statistics South Africa include the 2011 Census; whilst comparisons are also made with the 2001 Census.

The format of the profiles has been adjusted to focus the analysis at regional/district level whilst municipal specific profiles will also be made available separately.

The information contained in this profile therefore highlights information for the Overstrand Municipality in relation to the broader Western Cape Province.

1. Demographics

As per Census 2011, the Western Cape population comprises of 11.25 per cent of the total population of the country with 5.8 million persons, having increased from 4.5 million in 2001. Thus the Western Cape population grew at a rate of 2.6 per cent per annum between 2001 and 2011. This is faster than the national population growth rate of 1.5 per cent and is largely due to immigration to the Western Cape, where individuals believe they can obtain jobs and better standards of living.

Figure 1 shows that Overstrand Municipality has the second largest population (2013: 83 602), following after Theewaterskloof (2013: 111 814). According to population estimates by the Department of Social Development the Overstrand population is expected to grow by 1.78 per cent on average per annum from 83 602 in 2013 to 89 726 in 2017.

Figure 1 Population projections for municipalities in the Overberg District, 2011 - 2017

Source: Western Cape Department of Social Development, 2014

Overstrand's population age distribution consists of the following: Children (aged 0 - 14 years) 22 per cent, Working age (aged 15 - 64 years) 65 per cent and Aged (aged 65 years and above) 13 per cent.

Figure 2 Overstrand Municipality population by age cohort, 2013

Source: Western Cape Department of Social Development, 2014

2. Education

The provincial average for literacy rates was 87.2 per cent in 2011 according to official Census data, Overstrand (87.5 per cent) and the City of Cape Town (90.5 per cent) were the only regions that had a higher rate than that of the Province as a whole. The Overberg District had a literacy rate of 81.1 per cent in 2011, which was higher than that of the West Coast (79.1 per cent) and Central Karoo (73.4 per cent), and similar to that of the Cape Winelands District (81.7 per cent) and Eden (82.6 per cent).

Table 1 Education indicators in Overberg District, 2011 - 2014

Overberg District	Learner enrolment (Gr 1-12 + LSEN)		Average Learner-teacher ratio		Average Dropout rate	Drop in FET phase	% Matric pass rate			% Literacy rate	No. of schools with libraries		No. of no fee schools	
	2013	2014	2012	2014	2012	2013	2011	2012	2013	2011	2012	2014	2012	2014
Overstrand	11 353	11 866	25.5	26.7	49.5%	38.9%	85.1	88.2	92.0	87.5	16	16	12	12
Swellendam	5 668	5 771	27.6	29.2	34.7%	26.5%	90.0	90.6	86.9	74.2	8	8	15	15
Theewaterskloof	18 273	18 488	27.5	28.7	40.8%	33.2%	87.3	84.5	88.8	78.4	26	26	28	29
Cape Agulhas	4 675	4 621	28.1	26.7	37.9%	36.4%	95.1	81.2	92.1	81.1	7	7	8	8

Source: Western Cape Department of Education, 2014

Table 1 shows that learner enrolment in Overstrand was the 2nd largest (11 866, Grades 1 - 12) in the region in 2014, followed by Swellendam (5 771). The majority of learners are enrolled in Theewaterskloof (18 488). In 2013 Overstrand Municipality had the highest dropout levels (38.9 per cent) down from 49.5 per cent in 2012. Overstrand and Cape Agulhas have the lowest average learner-teacher ratio in 2014 (26.7 per cent), but it also had the highest matric pass rates (approximately 92 per cent) in 2013.

There are 16 schools with libraries in Overstrand, compared to Theewaterskloof (26), Swellendam (8) and Cape Agulhas (7). Table 1 also indicates that Overstrand Municipality had 12 no fee schools, compared to Theewaterskloof (29 and the largest) in the region, Swellendam (15) and Cape Agulhas has the lowest number (8).

Table 1 also shows that literacy rates in the region are highest at Overstrand Municipality (87.5 per cent) followed by Cape Agulhas (81.1 per cent) and Theewaterskloof (78.4 per cent). Swellendam's literacy rates of 74.2 per cent were the lowest in the region.

3. Health

Good health is vital to achieving and maintaining a high quality of life. A diverse range of factors play a role in ensuring the good health of communities to prevent diseases, especially preventable and contagious/communicable ones. Some of the factors include lifestyle features that also depend on the provision of high quality municipal services, such as clean water and sanitation. It is the function of healthcare services not only to restore bad health, but also to prevent communities from contracting preventable diseases.

3.1 Healthcare facilities

Although healthcare is provided by both public and private institutions, information provided by the Department of Health, as detailed in this section, pertains only to public sector healthcare institutions. Any privately provided facilities or services are not reflected in the information below.

Overstrand and Swellendam Municipality each have a total of 13 primary healthcare facilities, in comparison to 18 for Theewaterskloof, and Cape Agulhas (8). However, in terms of non-fixed primary healthcare (PHC) facilities Theewaterskloof has the highest number (10), consisting of 8 mobile and 2 satellite facilities and Swellendam had the second highest (7) comprising of 4 satellites and 3 mobiles. Overstrand Municipality has 5 non-fixed primary healthcare (PHC) facilities.

Table 2 Healthcare facilities in Overberg District, 2014

Regional area	Community Health Centres	Community Day Centres	Number of PHC clinics - fixed	Number of PHC clinics - non-fixed (Satellites)	Number of PHC clinics - non-fixed (mobiles)	Total number of PHC facilities (Fixed Clinics, CHCs and CDCs)	Number of district hospitals	Number of regional hospitals
Theewaterskloof	0	1	6	2	8	7	1	0
Overstrand	0	0	7	4	1	7	1	0
Cape Agulhas	0	0	4	1	2	4	1	0
Swellendam	0	0	5	4	3	5	1	0
Overberg	0	1	22	11	14	23	4	0

Source: Western Cape Department of Health, 2014

3.2 HIV/AIDS and TB treatment and care

The information presented in Table 3 shows how districts in the Western Cape respond to the healthcare need with respect to HIV/AIDS treatment and care. Although treatment and care is essential in managing the disease, in the case of HIV/AIDS the need and importance of preventative care must be emphasized, especially since to date, there is still no known cure.

Table 3 HIV/AIDS and TB treatment and care, 2013/14

Regional area	HIV - Antiretroviral treatment			Tuberculosis		
	ART patient load March 2013	ART patient load March 2014	Number of ART clinics/ treatment sites 2014	Number of TB patients 2012/13	Number of TB patients 2013/14	Number of TB clinics/ treatment sites 2014
Theewaterskloof	2 150	2 757	8	1 076	1 065	18
Overstrand	2 034	2 506	4	605	602	13
Cape Agulhas	299	372	3	207	182	8
Swellendam	424	547	5	287	254	9
Overberg	4 907	6 182	20	2 175	2 103	48

Source: Western Cape Department of Health, 2014

Table 3 shows that Overstrand had the lowest increase (23.2 per cent) of the Antiretroviral treatment (ART) patient load within the Overberg District between March 2013 and March 2014. Swellendam Municipality had the highest increase (29.0 per cent), followed by Theewaterskloof (28.2 per cent) and Cape Agulhas (24.4 per cent). For the Province as a whole the ART patient load increased by 18.9 per cent between March 2013 and March 2014. Overstrand has 4 ART clinics and treatment sites, not much different to Swellendam (4) and Cape Agulhas (3).

In terms of Tuberculosis (TB), all municipalities in the Overberg District reported decreases in the number of patients with TB. There were marginal decreases in the number of patients with TB in Overstrand (-0.5 per cent) and Theewaterskloof (-1.02 per cent) while cases decreased the most at Cape Agulhas (-12.1 per cent), followed by Swellendam (-11.5 per cent). Overstrand has 13 TB treatment sites, compared to 18 at Theewaterskloof, Cape Agulhas (8) and Swellendam (9).

3.3 Child and maternal health

Table 4 shows child health and maternal health statistics for the various municipalities in the District. The Overberg District is ranked fourth in the Province in terms of the full immunisation coverage rate, with an immunisation rate of 81.6 per cent, slightly outperforming the provincial average of 80.3 per cent. The Overberg District also has the second lowest number of severely malnourished children under 5 years (60), compared to 544 for the City of Cape Town, 218 for Cape Winelands and 168 for the Eden District. The number of cases of children under 5 with severe malnutrition per 100 000 population in the Overberg District (156) is lower than the provincial average of 180 children.

Table 4 Child and maternal health in Overberg District, 2013/14

Regional area	Child health			Maternal health				
	Full immunisation coverage rate	Number of severely malnourished children under 5 years	Severe malnutrition for children < 5 years per 100 000 population	Maternal mortality per 100 000 live births	Number of deliveries to women under 18 years	Delivery rate woman under 18 years	Number of termination of pregnancies performed	Termination of pregnancy per 100 000 population
Theewaterskloof	79.9	19	187	96	100	9.5	113	469
Overstrand	80.3	32	415	78	66	6.1	171	874
Cape Agulhas	85.3	5	183	0	33	9.1	23	340
Swellendam	78.2	4	132	0	42	9.4	25	368
Overberg	81.6	60	156	64	241	8.2	332	580

Source: Western Cape Department of Health, 2014

In relation to maternal health, Table 4 shows that Overstrand reported 78 maternal mortality rates per 100 000 live births in 2013/14, compared to 96 for Theewaterskloof. Swellendam and Cape Agulhas municipalities reported zero maternal mortality rates per 100 000 live births in 2013/14. Out of a total of 241 deliveries to women under the age of 18 years in the Overberg District, the most were reported at Theewaterskloof (100), followed by Overstrand (66) and Swellendam is ranked third with 42 deliveries. Terminations of pregnancies per 100 000 population are highest at Overstrand (874), followed by Theewaterskloof (469) and Swellendam has with 368 pregnancy terminations.

4. Poverty

The poverty¹ rate at Overstrand was estimated to be 25.5 per cent in 2010, higher than the provincial average of 22.1 per cent. In 2010, Theewaterskloof reported the highest poverty rates (35.0 per cent), followed by Swellendam (30.7 per cent). Cape Agulhas reported the lowest poverty rates (19.1 per cent) in the Overberg District. High poverty rates put strain on municipal resources as poor households have to be provided with free basic services. The high economic growth experienced by the Overberg District between 2000 and 2011 (5.2 per cent) clearly did not have the desired impact on poverty in Overstrand Municipality as evidenced by the prevailing high poverty rates. Figure 3 shows poverty rates across Overberg District.

¹ The poverty income line used is based on the Bureau of Market Research's Minimum Living Level (BMR report No. 235 and later editions, Minimum and Supplemented Living Levels in the main and other selected urban areas of the RSA, August 1996).

Figure 3 Poverty rates across Overberg District municipalities, 2001 and 2010

Source: IHS Global Insight, 2010

Another indicator that can be used to describe the standard of living among the population is the GDP per capita, an amount determined by dividing an area's Real GDP with its population. Figure 4 shows GDP per capita figures for municipalities in the Overberg District. Overstrand Municipality's per capita income is the 2nd highest in the District, growing marginally from R32 052 in 2011 to R33 082 in 2013. Swellendam has the 3rd highest in the District at R27 785, while Cape Agulhas has the highest per capita income at R41 536.

Figure 4 GDP per capita in the Overberg District municipalities 2011 - 2013

Source: Western Cape Department of Social Development, 2014

Despite the remarkable increase between 2001 and 2011, Overberg District's GDP per capita is the third lowest in the Province, only higher than that of the West Coast (R28 173) and the Central Karoo (R21 917). Only the City of Cape Town had a per capita income higher than the provincial average in 2013.

5. Safety and security

The safety of persons and property is vitally important to the physical and emotional well-being of people and business. Without the respect of person and property, it would be impossible for people to live peacefully, without fear of attack and for businesses to flourish. Crime has a significant impact on the economy. It can hamper growth and discourage investment and capital accumulation. If it is not tackled with seriousness, it has the potential to derail both social and economic prosperity. Peoples' general impressions, as well as the official statistics on safety and crime issues mould perceptions of areas as living spaces or place in which to establish businesses. The discussion in this section that follows is limited to the reported contact and property-related crime such as murder and sexual crimes, as well as crime heavily dependent on police action for detecting drug-related crimes and driving under the influence of alcohol/drugs; these are detailed in the figure below.

Figure 5 shows the number of crimes within the selected crime categories that was reported to police stations located at Overstrand Municipality over the period 2004/05 and 2013/14. From the figure it can be seen that burglaries at residential premises are the most prevalent in Overstrand, with 1 434 cases reported in 2013/14, up from 1 285 cases reported in 2012/13. A concern is the upward trend shown by this type of crime since 2010. Drug-related crimes are the second most prevalent in Overstrand, with 1 061 cases reported in 2013/14, up from 905 cases in 2012/13. Drug-related crimes also showed an upward trend since 2012. Driving under the influence of alcohol, sexual crimes and murder have been showing a steady trend over the last few years.

Figure 5 Crime rates in Overstrand, 2004/05 to 2013/14

Source: South African Police Service, 2014

Although the number of murder cases reported in Overstrand was the lowest (23 in 2013/14) compared to the other crimes, the rates are still regarded as unacceptable as one murder is one too many. However, the trend of murder cases seems to be declining from 40 murder cases reported in 2007/08 to 23 in 2013/14. A similar trend can be observed with sexual crimes, with 125 crimes reported in 2013/14, down from 132 cases reported in 2009/10.

Finally, driving under the influence of alcohol has recorded more cases than murder and sexual crime over the last 10 years, with the highest number of cases of driving under the influence in the Overstrand Municipality (270) reported in 2009/10 and the lowest number of cases (183) reported in 2004/05.

6. Access to basic services

All South Africans have a right to access basic services such as housing, water, electricity, sanitation, and waste removal in line with the Bill of Rights. Table 5 shows that in Overstrand the basic service that is accessed the most by households is water (98.5 per cent), followed by sanitation (93.5 per cent), refuse removal (91.4 per cent), energy (90.3 per cent) and housing (81.0 per cent). Access to refuse removal is the highest when compared with that of Theewaterskloof, Cape Agulhas and Swellendam.

Table 5 Access to minimum basic services in Overberg District

Regional area	Water		Sanitation		Housing		Energy		Refuse removal	
	2011	2013	2011	2013	2011	2013	2011	2013	2011	2013
Overberg	97.4%	97.4%	89.5%	89.4%	91.2%	91.1%	79.7%	79.7%	83.2%	82.9%
Theewaterskloof	96.9%	96.8%	86.6%	86.4%	89.0%	88.8%	79.7%	79.7%	82.0%	81.7%
Overstrand	98.5%	98.5%	93.6%	93.5%	90.4%	90.3%	91.4%	91.4%	81.3%	81.0%
Cape Agulhas	97.5%	97.4%	90.2%	90.1%	97.1%	97.0%	80.0%	80.1%	86.2%	85.9%
Swellendam	96.0%	95.9%	85.7%	85.5%	93.9%	93.9%	73.9%	74.0%	88.9%	88.7%

Water: Piped water on community stand less than 200 m from dwelling

Sanitation: Flush toilet with septic tank

Energy: Electricity

Refuse removal: Removed by local authority at least once a week

Housing: Formal dwelling

Source: Quantec, 2014

Figure 6 Access to basic services - Overstrand versus Western Cape, 2013

Source: Quantec 2014

Figure 6 shows that Overstrand is on par with the Province in terms of access to water, refuse removal and housing. Overstrand lags behind the Province slightly in terms of access to energy but the municipality exceeds the Province with regards to access to sanitation. These results indicate that there is still room for improvement in terms of

basic service delivery at Overstrand Municipality which would serve to improve the quality of life of households within the municipality.

7. Economy

Overstrand Municipality's economy grew the fastest in the region, registering a GDP growth rate of 6.3 per cent on average per annum from 2000 to 2013, followed by Cape Agulhas municipality (5.3 per cent). Swellendam grew by 4.6 per cent per annum over this period. Theewaterskloof was the slowest growing municipality between 2000 and 2013 at 3.6 per cent, much lower than the 4.8 per cent average growth rate per annum for the Overberg District. The Overberg District regional economy generated 3.1 per cent of the Western Cape GDP during 2013, i.e. R13.3 billion of the total R431 billion. In 2013 Overstrand's GDP was estimated at R2 765 million, translating into a 1.04 per cent share of the provincial economy.

When non-metropolitan municipalities in the Province are ranked in terms of their contribution to real GDP growth and size in the Western Cape, Overstrand is ranked 5th, while Theewaterskloof is 11th, Cape Agulhas is 15th and Swellendam is 16th as shown in Figure 7.

Figure 7 Municipal contribution to real GDP growth and size in the Province, 2000 - 2013

Source: Quantec Research 2014 (MERO 2014)

The competitive strengths of the region resides in its food value chain, including a stable Agriculture sector producing for the export market, as well as the associated food and beverage processing industries, a strong building and construction sector, business services, tourism and furniture manufacturing. The four municipalities

account for nearly 13 per cent of the cumulative growth of the Province's non-metro municipalities.

During the economic recovery period (2010 - 2013) the Overberg District was the second fastest growing region in the Province at 3.4 per cent, following the Eden District which recorded a real GDP growth rate of 3.8 per cent. The fastest growing sectors within the Overberg District were Finance, insurance, real estate and business services (5.6 per cent), Wholesale and retail trade, catering and accommodation (4.1 per cent) and General government (3.8 per cent). Notable growth rates in the recovery period were also recorded for Manufacturing, Mining and quarrying and the Community, social and personal services sector each at 2.6 per cent. The slowest growing sector was Electricity, gas and water which recorded a real growth rate of only 0.4 per cent. The slow growth in the Agriculture, forestry and fishing sector of 0.6 per cent is also of concern, especially considering the job losses within this sector.

Table 6 Overberg District real GDP growth in provincial perspective, 2010 – 2013 (%)

Sector	Eden District	Cape Winelands District	West Coast District	Overberg District	Central Karoo District	Cape Metro
Agriculture, forestry and fishing	1.5	-0.4	-0.1	0.6	1.2	2.2
Mining and quarrying	1.5	4	3	2.6	0.3	1.5
Manufacturing	4.3	2.1	1.9	2.6	3.9	2.7
Electricity, gas and water	0.9	2.1	-0.4	0.4	-0.4	1
Construction	2.5	1.7	1.5	2	2.1	1.5
Wholesale and retail trade, catering and accommodation	5	4.8	3.4	4.1	2.1	3.4
Transport, storage and communication	2.4	2.2	1.7	2.6	0.9	2.3
Finance, insurance, real estate and business services	3.9	3.8	5.4	5.6	3.8	3
Community, social and personal services	2.7	2.1	2	2.4	1.1	1.4
General government	5.4	4.2	3.4	3.8	3.5	2.7
Total	3.8	2.7	2.8	3.4	2.6	2.7

Source: Quantec Research 2014 (MERO 2014)

Figure 8 shows that in 2011 the largest contributing sectors to GDP within Overstrand were Finance, insurance, real estate and business services (30.5 per cent), followed by Wholesale and retail trade, catering and accommodation (17.1 per cent) and Manufacturing (16 per cent). Other noteworthy sectors are Construction (9.4 per cent) and Transport, storage and communication (9.3 per cent). The Overberg District has a well-diversified economy which could be an explanation for its fast economic growth during the recovery period compared to other regions in the Province.

Figure 8 Overstrand Municipality sectoral contribution, 2011 (%)

Source: Quantec Research 2013 (MERO 2013)

8. Employment

According to Census 2011 data the unemployment rate in the Overberg District was 17.0 per cent, which was lower than both the 21.6 per cent for the Western Cape and 29.8 per cent for South Africa. Although it is the fastest growing Municipality in the region, Overstrand had the highest unemployment rate in 2011 (23.3 per cent). Swellendam had the lowest unemployment rate in 2011 (11.4 per cent), followed by Cape Agulhas (13.8 per cent) and Theewaterskloof (14.9 per cent). Figure 9 shows that unemployment decreased between 2001 and 2011 in Theewaterskloof and Swellendam while it increased in Overstrand and to a marginal extent in Cape Agulhas. For the District as a whole, the unemployment rate decreased marginally, from 17.5 per cent in 2001 to 17.0 per cent in 2011.

Figure 9 Unemployment rates in the Overberg District municipalities, 2001 - 2011

Source: Statistics South Africa Census 2001 and 2011

The youth unemployment rate is of greater concern in most regions in the Province, with the City of Cape Town having the highest youth unemployment rate in 2011 (31.9 per cent), followed by Eden (29.3 per cent), Central Karoo (27.3 per cent) and Overberg (21.4 per cent). This may be due to the youth's lack of experience and relevant skills. The high dropout rates in the Overberg District as mentioned above may also be a contributing factor to youth unemployment in the region. Overstrand had the highest youth unemployment rate (31.1 per cent) in the region in 2011.

Figure 10 Net employment in Overstrand Municipality, 2000 - 2013

Source: Quantec Research 2014 (MERO 2014)

Approximately 1 810 formal net jobs were lost in the Agriculture sector over the period between 2000 and 2013 as shown in Figure 10. On the other hand, 130 net jobs were gained in the Manufacturing sector and 6 560 net jobs in the Services sector.

There appears to be a trend towards employing highly skilled and skilled individuals within the Overberg District. According to the Municipal Economic Review and Outlook (MERO) (2014) demand for highly skilled labour grew by 2.8 per cent per annum between 2000 - 2013, that for skilled labour by 1.8 per cent, whilst that for unskilled and semi-skilled workers declined by 2.6 per cent per annum from 2000 - 2013. Skills development initiatives are thus required within the District to meet labour demands.

9. Environment

Table 7 Environmental indicators in Overstrand Municipality, 2014

Environmental category	Status
Spatial Development Planning (SDF)	<p>Create an environment conducive to economic activity by upgrading the roads infrastructure. Balance between development and the biosphere, upgrading the coastal route. Some of the “Big Ideas” include:</p> <ul style="list-style-type: none"> • Finding the balance between development job creation and the conservation of the biosphere. • A Green development path. • Closing the Gap – upgrade of coastal route between Gansbaai and Agulhas. • Community have to “embrace the white gold and enjoy it”. • Integrated marketing effort. • Overberg as adventure sport/professional sport squad training hub. • Utilisation of Critical Biodiversity Areas as spatial planning tools; land procurement finance; area wide planning projects; Identify suitable land in line with SDF; Improved efficiency in land use management and spatial planning. • Integrated Transport Plan.
Housing	<p>Households with access to formal dwellings in Overstrand were estimated at 81 per cent. Households living in informal dwellings pose a risk to the environment in one way or another. Long-term Housing Pipeline and Implementation Plan. Develop integrated and sustainable human settlements; Low income housing; Higher density housing developments. Diversification of housing provision (explore alternative housing options); The redevelopment of existing residential areas within the Overstrand towns can also maximise use of existing infrastructure and increase residential capacity prior to considering greenfield development. Current model of housing delivery is not sustainable. To erase informality the ultimate goal should not be to own a brick and mortar structure. The National Policy regarding housing delivery should take cognisance of an incremental approach e.g. the provision of serviced sites, rental stock, rent-to-buy and upgrading of informal settlements.</p>
Water	<p>Households with access to piped water at Overstrand are estimated at 98.5 per cent in 2013. Implementation of a water conservation and demand management strategy; water loss control. During the JPI Specific challenges around water security in the District emerged that were centered around water storage capacity, water losses, Wastewater Treatment Works (WWTWs) and general water management practices. The need to strengthen water management practices was expressed by all Municipalities in the district.</p>
Sanitation	<p>Households with access to flush toilets in Overstrand were estimated at 93.5 per cent in 2013. The remaining 6 per cent without access to proper sanitation can pose a threat to the environment.</p>
Energy	<p>Households with access to electricity in Overstrand were estimated at 90.4 per cent in 2013. The 10 per cent that does not have access to proper energy can pose a threat to the environment. Energy Regeneration Strategy.</p>
Waste disposal	<p>Households with access to refuse removal (local authority or private) in the Overstrand were estimated to be 91.4 per cent, the highest in the region:</p> <ul style="list-style-type: none"> • Upgrading of Caledon waste facility. • Rehabilitate Barrydale landfill site. • Improved efficiency in waste management.
Air quality	<p>Waste disposal sites can create air quality issues, Oxides of nitrogen pollutants can be a concern. There are no large emitters of pollution in most areas around the Overberg District ensuring good air quality.</p>

10. Concluding remarks

Overstrand Municipality has the second highest population (2013: 83 602), following after Theewaterskloof (2013: 111 814). According to population estimates by the Department of Social Development the Overstrand population is expected to grow by 1.76 per cent on average per annum from 80 432 in 2011 to 89 726 in 2017. Children aged 0 - 14 years make up 22 per cent of the population while the working age (aged 15 - 64 years) comprise 65 per cent of the population and the aged make up 13 per cent.

Overstrand Municipality's economy grew the fastest in the region, registering a GDP growth rate of 6.3 per cent average per annum. Although it is the fastest growing municipality in the region, Overstrand also had the highest unemployment rate in 2011 (23.3 per cent). Overstrand Municipality's per capita income is the 2nd highest in the District, growing marginally from R32 052 in 2011 to R33 082 in 2013.

The poverty rate at Overstrand was estimated to be 25.5 per cent in 2010, higher than the provincial average of 22.1 per cent.

In Overstrand the basic service that is accessed the most by households is water (98.5 per cent), followed by sanitation (93.5 per cent), refuse removal (91.4 per cent) and energy (90.3 per cent). Access to refuse removal is the highest when compared with that of Theewaterskloof, Cape Agulhas and Swellendam.

In 2012, Overstrand Municipality had the highest dropout levels (49.5 per cent) despite its high enrolment levels in the district. Overstrand had the lowest average leaner-teacher ratio in 2012 (25.5 per cent), and not surprisingly it also had the highest matric pass rate (92 per cent) in 2013.

Overstrand and Swellendam Municipality each have a total of 13 primary healthcare facilities, in comparison with 18 in Theewaterskloof, and 8 in Cape Agulhas.

Burglaries at residential premises are the most prevalent in Overstrand, with 1 434 cases reported in 2013/14, up from 1 285 cases reported in 2012/13. A concern is the upward trend shown by this type of crime since 2010. Drug-related crimes are the second most prevalent in Overstrand, with 1 061 cases reported in 2013/14, up from 905 cases in 2012/13. Drug-related crimes also showed an upward trend since 2012.

There is still room for improvement with regard to, poverty reduction, skills development, crime, basic service delivery and job creation. The overall improvements are an indication that the inhabitants of the Municipality are reaping some social benefits from the growing economy.
