Glossary

Adjustments Budget - Prescribed in section 28 of the MFMA. The formal means by which a municipality may revise its annual budget during the year.

Allocations - Money received from Provincial or National Government or other municipalities.

Budget - The financial plan of the Municipality.

Budget Related Policy - Policy of a municipality affecting or affected by the budget, examples include tariff policy, rates policy and credit control and debt collection policy.

Capital Expenditure - Spending on assets such as land, buildings and machinery. Any capital expenditure must be reflected as an asset on the Municipality's balance sheet.

Cash flow statement - A statement showing when actual cash will be received and spent by the Municipality. Cash payments do not always coincide with budgeted expenditure timings. For example, when an invoice is received by the Municipality it is shown as expenditure in the month it is received, even though it may not be paid in the same period.

DORA - Division of Revenue Act. Annual legislation that shows the total allocations made by national to provincial and local government.

Equitable Share - A general grant paid to municipalities. It is predominantly targeted to help with free basic services.

Fruitless and wasteful expenditure - Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GFS - Government Finance Statistics. An internationally recognised classification system that facilitates like for like comparison between municipalities.

GRAP - Generally Recognised Accounting Practice. The new standard for municipal accounting.

IDP - Integrated Development Plan. The main strategic planning document of the Municipality

KPI's - Key Performance Indicators. Measures of service output and/or outcome.

MFMA - The Municipal Finance Management Act - No. 53 of 2003. The principle piece of legislation relating to municipal financial management.

MTREF - Medium Term Revenue and Expenditure Framework. A medium term financial plan, usually 3 years, based on a fixed first year and indicative further two years budget allocations. Also includes details of the previous and current years' financial position.

Net Assets - Net assets are the residual interest in the assets of the entity after deducting all its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure - Spending on the day to day expenses of the Municipality such as salaries and wages.

Rates - Local Government tax based on the assessed value of a property. To determine the rates payable, the assessed rateable value is multiplied by the rate in the rand.

SDBIP - Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives - The main priorities of the Municipality as set out in the IDP. Budgeted spending must contribute towards the achievement of the strategic objectives.

Unauthorised expenditure - Generally, spending without, or in excess of, an approved budget.

Virement - A transfer of budget.

Virement Policy - The policy that sets out the rules for budget transfers. Virements are normally allowed within a vote. Transfers between votes must be agreed by Council through an Adjustments Budget.

Vote - One of the main segments into which a budget. In Knysna Municipality this means at directorate level.

Section 1 - Mayoral Budget Speech

Speaker, Deputy Mayor, Councillors, Municipal Manager, Directors, senior officials, representatives from Provincial departments, members of the Media, members of the Public, Ladies & Gentlemen:

Introduction

On 9 May 2009 the Honourable Jacob Zuma, President of the ANC, was inaugurated as the fourth democratically elected State President of our country. President Zuma made the following statement that I believe all of us here fully endorse.

I quote:

"It is my fervent hope that our public servants heard our campaign message and understand that it shall not be business as usual. We expect hard work and utmost dedication".

In recent weeks there have been a number of articles and letters in various publications highlighting the remuneration of senior officials and Councillors. I shall go into the details of the salaries and bonuses referred to in the articles later in my address, but what was abundantly clear were the sentiments of residents regarding our performance.

Therefore I am sure that all of us in the chamber will fully agree when I say that IT CAN NOT BE BUSINESS AS USUAL. ALL OF US, RICH AND POOR, FROM WARD 1 TO WARD 8 AND FROM SEDGEFIELD TO BRACKENHILL EXPECT HARD WORK AND UTMOST DEDICATION FROM OUR PUBLIC SERVANTS!

At a strategic bosberaad held on Tuesday the Executive Committee and senior officials commenced a process which will ultimately culminate in rigorous and improved performance throughout our administration. We have heeded your clearly articulated concerns and taken them to heart.

In the draft Medium Term Income and Expenditure Framework, the Chief Financial Officer has stated, "Unless somebody is prepared to donate a few hundred million to Knysna, we are not going to be able to equalize or enhance services at the speed, and to the level we would wish for. Now we need to do the best we can within our fiscal circumstances. In recent years Knysna has expanded rapidly and whilst this budget does not represent a pause, it may represent a time-out".

A time out is a period for reflection and for rejuvenation. It is a time to reflect on what we are currently doing, compare it to what we should be doing and then putting processes in place to achieve that.

So what should we be doing?

Economists tell us that in Knysna the gap between the have's and the havenots is amongst the worst in the country. Closing that gap via targeted service delivery in conjunction with local economic development and job creation must be our focus. Later in this address I will be giving details of some of the programmes we are developing or expanding to close this gap. This budget has been prepared in the middle of an international recession. Knysna is not unique in this regard. The most immediate and obvious effect of the recession on Knysna is the clear drop in domestic and international tourism. At home people are holidaying for shorter periods and there is a growing trend away from Hotel and Bed and Breakfast accommodation to selfcatering units.

The second effect has been on the local construction and property related sectors and the related job losses - a direct cause for the fall in private expenditure. As Knysna's narrow economy is largely reliant on these sectors, any negative impact is translated directly onto the Knysna economy.

The Governor of the Reserve Bank at a recent Monetary Policy Committee meeting said,

"the global recession is likely to be severe and protracted. But what is more disturbing is that South Africa's growth outlook is dependent on a broader global recovery and there are no signs of any immediate rebound".

In other words things are going to get worse before they get better.

With such a backdrop it is imperative that this Council approves a budget that aims to alleviate the living costs for our poorer and lower middle income communities and still grow our economy to provide jobs as fast as we can. This budget, as far as we can control matters, does exactly that.

Operating Income

Over the last six years this Council, under all parties, has deliberately and systematically followed the approach of trying to equalize rates and tariffs as far as possible. We have moved from a position where in 2003 the poorer, under-serviced communities of this municipality, were subsidising the richer communities. In terms of overall taxation the playing field is now nearly level, but in terms of service provision we all know that we still have a long way to go.

The equalization has taken place by holding the basic charges payable below the level of the rates increases. What we are doing in this budget completes the process of disposing of the unbalanced basic charges for water, sewer and refuse removal.

We have completed the new market-value general valuation roll last year, an exercise being repeated all over the country. I am aware that some ratepayers are unhappy with the outcome of the process, but an examination of the final values and subsequent sales has shown that in the majority of cases the values are accurate. There are anomalies - there will always be anomalies - and we are dealing with them through the interim valuation process.

I must stress there were no legal challenges to the outcomes and the Appeal Board finished its processes within 9 months. For this I thank the CFO and his valuation team for the professional way they interacted with the public, including over 4000 residents who were contacted directly via telephone, SMS or e-mail. A very special word of thanks also to Mr. Perino Pama, the chairman of the Appeal Board, and his team: Mr. Neels Muller and Mr. Gerald Logan.

Turning to the IDP and Public Participation

The Integrated Development Plan is a constitutional and legal process required by all Municipalities. However, apart from the legal requirements, there are sound reasons for Municipalities to undertake an IDP, as it is a critical management tool to drive transformation, growth and development at local government level.

As the strategic plan of the Municipality, the IDP informs financial planning and budgeting. Public participation is critically important for a credible IDP.

During our 11 intensive and well-advertised IDP and budget road shows to all eight wards, our communities were given opportunity to articulate their concerns and needs. This process also allowed for submissions regarding the draft budget. On the whole the road show was well-attended and certain communities made concerted efforts to fully engage, to be constructive and to assist in identifying areas for improvement. Unfortunately not all wards had the same level of commitment, notably Ward 5 had less than 5 attendees and in the "Fraaisig/Rykmanshoogte" area of Ward 8 only 3 members of the public attended the engagement.

Based upon this pattern, it can be assumed that members of our more privileged communities do not consider the IDP and Budget engagements as important but would rather opt for written submissions. Unfortunately this often results in a poor understanding of the IDP and Budget as there is no opportunity for well thought-out debates as is the case during public hearings.

The hearings raised various service delivery issues that we will focus on this year. The most important issues raised were housing and job creation. Ladies and gentlemen, as we all know, in terms of our Constitution, housing is a National and Provincial responsibility. Local authorities act as an implementation agent. We will endeavour to discuss the issue of housing allocations with National and Provincial Government in order to increase our delivery to all communities in need of shelter. I shall return to the issue of job creation later.

I would like to take this opportunity to thank all the officials who spent long and late hours ensuring that the budget and IDP were made accessible and sensible for our communities

I turn now to the submissions made on the draft budget:

A specific issue raised by ward 5 was the effect of the incidence shift of removing the basic charges as originally envisaged. I have therefore requested the CFO to remove the sewer and refuse charges equally over two years. This will not affect the revenue budget, but it will mitigate the incidence shift somewhat. I am of the opinion that after the valuation effects, a level of mitigation is fair. The reason for doing this over two years is that we are required to undertake another general valuation in two years time and the basic charges need to be removed by then.

The assessment rate will increase by 7,5%. By recovering the sewer and refuse basic charges from the rates means that the increase in rates payable shifts according to property value. The modelling we have done indicates that

properties valued around R2 million will be paying slightly less than they would have if we had increased rates and tariffs directly. Ratepayers with properties below R1,4 million will actually be paying less than they currently do. The rationale behind scrapping the basic charges is that if you cannot measure something, how can you charge for it?

The water tariff will rise by 10%, however the basic water charge is also being scrapped and this will be recovered through the new stepped tariffs. We are also collapsing the stepped tariff bands 11-15kl and 16-20kl into one band. This is designed to conserve a scarce resource through consumption charging when the need arises. Consumers using more than 30kl and more specifically above 40kl, will pay penalty tariffs and a portion of this will be channelled directly to a water capital replacement reserve for future capital expansion.

As we are all aware the electricity tariff is outside of Council's control. The latest submission to NERSA, the Electricity Regulator, is for a 34% increase. I repeat what I said last year. It is Council who experiences the non-payment effects and the wrath of consumers who cannot afford the magnitude of increase, not ESKOM. The effect of last year's increase is still being felt on our cash flow and another significant increase, in the midst of a recession, means we will be very closely monitoring our income. Unfortunately related cutbacks in some services cannot be ruled out.

Another important addition on the income side is that the rebate on rural properties will be phased out over two years. The rebate will be reduced from 80% to 50 % from 1 July 2009 and to the domestic level of 20% from 1 July 2010. The farmers' rebate remains at 80%.

With properties now valued at market value a house is a house regardless of where it is and there is no justification to keep the rural rebate. We are fully aware that the rural properties are valued below their town equivalents and this has also been taken into consideration when we made the decision.

In an effort to promote a sustainable natural environment we have introduced a "green" rebate for properties or estates which are not gated or classified by our Provincial government as Nature Reserves. These properties will have to demonstrate that they are actively involved in an alien eradication scheme. The rebate will be an additional 30% from July.

With regards to Bed and Breakfasts and letting accommodation we are again revising the system. The split system for B & B's introduced was partially successful, but it needs to be coordinated with our planning and zoning requirements. The final decision is that B & B accommodation with up to eight lettable rooms will be regarded as domestic, but will lose their domestic rebates. Above eight rooms will be treated as businesses and be rated as such. We ask for cooperation from the accommodation industry. Until now many properties have been operating illegally and the Finance team has proof of these illegal practices. Our policies, zoning scheme and by-laws are being amended and we will not hesitate to take action for non-compliance.

Finally with regard to vacant land: We will no longer subsidise developers who are holding land. Land will be taxed at the appropriate level as soon as the first transfer takes place or as soon as the services are available, whichever comes first. We will no longer wait for a development to be completed or sold before taxing.

Operating Expenditure

I turn to the Operating budget

During recent years Knysna Municipality has grown rapidly due to an influx at both ends of the income scale. This has placed severe pressure on our town's infrastructure.

It is logical that there is growth in our poorer communities and there has to be growth in our wealthier communities. The welcome contributions from National and Provincial government do not meet all our requirements and the balance has to come from the wealthier section of the community. Our biggest problem is that we do not have a sufficiently robust business sector to allow for meaningful cross-subsidisation. This means the cost falls more heavily on the domestic, property owning sector.

We will strive to increase private partnerships to compliment our delivery. To date we have been very successful in the housing sector. One example is the ABSA housing development in Hornlee and Heidevallei, another is the Own Haven Housing Development. Both developments are focused on delivering decent and affordable housing.

To ensure increased service provision in recent years we have increased our internal capital contributions and we have borrowed as a good business should. Whilst not suggesting that we predicted the recession, we had already begun to carefully control our borrowing requirement because of the spiralling borrowing costs. These costs would have been more manageable if all things had remained equal. The recession has changed that. I should point out that since 2002, this municipality has borrowed almost R140 million and yet our outstanding liabilities have only increased by R22 million in the same period. That is good control, Ladies and Gentlemen.

The next issue I want to touch on is in relation to salaries and bonuses. I referred to this in my introduction and will now elaborate further.

Salaries and bonuses have to be budgeted for at the worst case scenario and the current worst case scenario increase, as negotiated with Unions at national level, has to be shown at 16%.

This increase has been based upon 11% on the fixed packages of staff and 15% for medical aid increases. Added to this is a requirement for TASK provision of R1,55 million as per a SALGA resolution. In an attempt to mitigate these costs no vacancies will be filled until January 2010 and after a budget review.

The salaries of the Municipal Manager and his Directors are at the appropriate level based on the cost of attracting high calibre staff to this area. All but one is on a five-year fixed-term contract, UNLIKE many of their neighbouring colleagues who are more secure with ten and fifteen year contracts. The CFO, who is on his second five-year contract, was appointed in 2002 and if you increase that original salary at inflation levels since his appointment, you will arrive at a salary very close to the one he receives now, and not the "worst case scenario" amount shown in the budget documentation.

The bonuses of our Municipal Manager and his Directors are set by national regulations and also have to be budgeted for at the maximum possible award.

In terms of contractual and legal requirements all bonuses awarded are decided by a performance committee which includes the Mayor, the Chair of the Audit Committee, the Portfolio Committee chairperson and an external representative. Here I just want to mention that none of our officials received full performance bonuses during the last financial year, as we believe that harder work is required.

With regard to the comments about Councillors' salaries, they are remunerated on a scale set by the National Minister. Knysna's Councillors are on level 3 out of 6. The scale is based on population and budget size. There is no discretion, we have to comply. In some instances other Councils also make provision for secretaries, assistants, offices and discretionary budgets for Councillors and Ward Committees. This does not happen in Knysna in an effort to keep costs down.

If the proposed maximum increases and specifically the fixed package increases for any Council member or official are lower, the budget provision will be immediately switched directly to service delivery.

My final comment on this is around performance. Performance is linked to the IDP priorities which bring us back to Knysna 2020. The priority of this Council is to deliver services in all areas, but with particular emphasis on our poorer areas. Therefore, whilst delivery may not appear visible to some residents, it is actually very visible to the majority of residents.

What is agreed is that performance must be improved and a new and very detailed performance measuring system is being introduced under the direction of the Municipal Manager from 1 July 2009.

I trust this will appease some of the issues raised.

In my introduction, I mentioned closing the gap between the have's and the have-nots through targeted service delivery, local economic development and job creation. These flow directly from the recommendations at the ANC conference at Polokwane and were detailed in the ANC election manifesto. The recommendations referred to "more jobs, decent work and sustainable livelihoods".

Targeted service delivery will be via specific projects in specific communities, for example clean-up programmes. A list of these projects has been drawn up and the feedback on the projects will be given on a monthly basis at the relevant section 80 committee and the Budget Committee.

While the investment in social spending usually decreases in times of recession, we are determined to ensure that social development remains a priority. We will focus on youth development and education in terms of bursary allocations.

The Local Economic Development initiatives undertaken by our LED coordinator are proceeding very well. These include the training and support of emerging entrepreneurs. A further major initiative is the introduction of specific expenditure targets for all spending departments to ensure that our expenditure is concentrated locally.

The delegated expenditure limits of R 2 000 and R 30 000 will have local spend targets of 95% and 85% respectively. In the 2010/11 budget, targets will be introduced for delegated expenditures up to R200 000 and for all Tenders and all Requests for Quotations. Targets for BEE and SMME spend will be introduced when our local entrepreneurs database is more mature.

Ladies and Gentlemen, it is of no benefit to our local economy to award contracts to businesses in Gauteng or Cape Town when locally-owned businesses are employing and developing local people. But we are not going to simply give hand-outs to local business, as our community is entitled to value for money and service providers must perform to exacting standards. I am sure that this initiative will lead to a situation in future where most of Council's expenditure occurs locally.

Council will also strive to promote the use of local labour in public and private developments. While we cannot interfere in the management of business, we will facilitate community involvement and development. We will grow the Expanded Public Works Programme which may require the appointment of external project managers on contract. We must be honest with ourselves and admit that internally we are limited as far as project management skills are concerned. The way forward must be to externalize the process, even if additional costs have to be borne within the projects.

Ladies and Gentlemen, the total operating expenditure budget is R346 million, an increase of 6.4% on the current adjusted estimate.

Capital Budget

The capital budget before us is the largest capital budget in the history of this municipality, despite the recession. All over the world governments are increasing capital expenditure to increase job creation. We are doing the same. The budget consists of a managed borrowing programme, a reduced spend on lower-end housing and a number of roll over projects, mainly related to the floods.

The reasons for the managed borrowing I have discussed earlier. In terms of regulations any funds received from the Municipal Infrastructure Grant, have to be met with a 20% own contribution by the municipality. Next year we will only borrow to match this responsibility, except for a small amount for two Public-Private Partnership road projects if necessary, and the R8 million commissioning costs of a new electricity transformer. After all it makes no sense to have purchased a new transformer and then not be able to connect it.

The Housing budget for service and top structures has been slashed by 40% by Province to R31 million and we no longer have the resources to top up the housing budget at previous levels. We will do the best we can with what we are given, but it is disappointing that after receiving awards for housing delivery and three years of exceptional growth, we may now have to slow that delivery down but we will not compromise on quality. The issue of rollover projects is an area that concerns me greatly. I can appreciate that a number of the present rollovers have been caused by delays of funding agreements, sometimes internally and sometimes with other spheres of government. I can also understand if there are community issues involved which from experience I know to be complicated. The cemetery is a good example of this. I do not appreciate expenditure delays caused by what is basically poor planning. There seems to me to be too much of this going on and once again it comes down to performance - or lack thereof. We must stop budgeting for poorly planned and poorly committed projects.

The total capital budget will amount to some R 81,5 million, a R 10 million increase on the current year.

Conclusion

I started by saying that this is not a pretty budget. It is however a very innovative budget on the income side, a performance and targeted budget on the expenditure side and a growth budget on the capital side. It also affords us an opportunity to re-examine what we are doing and, more importantly, what we should be doing.

The ANC manifesto states that "our country needs change in the way government relates to our people and in the delivery of services". As Executive Mayor I demand exceptional performance and the highest levels of service delivery from both Councillors and officials. If they are not prepared to dedicate themselves and give that performance, then there is no place for them in this team. We will deliver and we will be seen to deliver.

My thanks as always on these occasions to my fellow Executive Councillors, all ordinary Councillors, the Municipal Manager, his Directors and all the staff employed by this Council. At this point I note our soon to depart Director: Strategic Services Mr. Lubabalo Gwintsa. Mr. Gwintsa has been the driver behind our recently awarded Neighbourhood Redevelopment Grant of R50 million, the importance of which will filter through hopefully from next year. Lubabalo on behalf of Council, I thank for what you have done and wish you well in your new endeavours.

My final thanks to the CFO and his team. Budgeting in a growth environment is not easy, but budgeting in a recession is a nightmare and in these difficult times it becomes quite clear who one can depend on.

Councillors, ladies and gentlemen, I now present for your approval the budget for 2009/2010 and the Medium Term Expenditure and Income framework for the period 2009/2012.

Section 2 - Budget Related Resolutions

Knysna Municipality

MTREF 2009/2010

These are the resolutions that will be approved by Council with the final adoption of the budget in May:

RESOLVED:

- [a]. That the annual budget of Knysna Municipality for the financial year 2009/10; and indicative for the two projected years 2010/11 and 2011/12, as set-out in the schedules contained in Annexure 1, be approved:
 - 1.1 Schedule 1: Operating revenue by source
 - 1.2 Schedule 2: Operating expenditure by vote
 - 1.3 Schedule 2(a): Operating expenditure by GFS classification

1.4 Schedules 3 and 3(a): Capital expenditure by vote and by GFS classification

1.5 Schedule 4: Capital funding by source

- [b]. Property rates reflected in Annexure 2 and any other municipal tax reflected in Annexure 2 are imposed for the budget year 2009/10.
- [c]. Tariffs and charges reflected in Annexure 2 are approved for the budget year 2009/10.
- [d]. The measurable performance objectives for revenue from each source reflected in Annexure 3 are approved for the budget year 2009/10.
- [e]. The measurable performance objectives for each vote reflected in Annexure 3 are approved for the budget year 2009/10.
- [f]. Council notes the amended Integrated Development Plan adopted on 29 May 2009 reflected as summarised in section 5.
- [g]. Council notes the performance indicators tabled with the budget for subsequent approval by the Executive Mayor reflected in Annexure 3.
- [h]. The amended policies for credit control, debt collection and indigents as reflected in Annexure 6 are approved for the budget year 2009/10.
- [i]. The other new and/or amended budget related policies reflected in Annexure 6 are approved for the budget year 2009/10.

Section 3 - Chief Finance Officer's Introduction

BACKGROUND

Last year I said that the circumstances surrounding the 2008/09 budget contributed to it being the most complex and difficult budget in recent memory. I was wrong. The circumstances regarding the 2009/10 budget have been far more complicated, but I have no doubt that the measures and policies we are putting in place in this budget will serve Knysna well and ensure that we can go into the worst of the present recession with confidence and that they will be relevant to take full advantage of the economic upswing that will undoubtedly follow.

Having been mistaken about the circumstances surrounding the budget however, unfortunately I have been proved very correct when it got down to the detail. Last year at this time I stated that the impact of the Eskom problem would hit Knysna Municipality directly both in our cash flow and on increased debtors. It did and it has. Sadly there does not seem to be any alleviation in the forthcoming financial year and I fully expect that the cumulative effect of Eskom will lead a number of local authorities needing to be bailed out by National Treasury. Knysna so far has managed to stay afloat, but only just. The biggest irony is that National Treasury piously state in their Budget Circular that the local authority must fully justify any rate or tariff increases above 6% to our ratepayers as though this is the panacea to all ills. Even their own headline inflation estimate is sitting at 10,8% and when one considers that municipal budgeting operates approximately 18 months behind the economic cycle, trying to justify 6% is a bit of nonsense.

The simple fact is that in an economy such as Knysna which is a domestically driven economy, even a minor economic downturn is going to have seriously negative multiplier effects on the municipality in terms of its cash flow.

I also made the point last year that municipalities such as Knysna which are regionally divorced from larger population centres can simply no longer afford to contemplate large scale capital works. The Sedgefield water debacle is a classic case in point where the municipality is expected, seemingly by both other spheres of government as well as some local residents, to build an R 120 million water treatment works in a community with a municipal taxpaying base of only 2500. Knysna, on its own, with a tax base five times that of Sedgefield, could not afford those outlays. The time has come for national government to stop tinkering at the margins of local government and restructure it properly and by that I mean removing the heavy infrastructure and heavy capital components of local government, bringing in economies of scale as to how those services are managed and by extension then placing them on a financial footing that becomes meaningful and sustainable. By doing this we would also stop the perennial and increasingly irrelevant debate that takes place regarding on-going maintenance. Maintenance costs money in exactly the same way as salaries and borrowing costs and all this debate does is move money from Peter to Paul with no improvement in service delivery.

The problems that exist in municipal finance are little to do with accounting, budgeting or management. They are about who, how, why, what and where. Functionally local government in South Africa is still stuck in the 1970's and until those problems are addressed, all the concomitant financial problems will remain and indeed worsen.

Capital Budget

Knysna Municipality has a very simple financial philosophy that says our assets should be in the ground and not in the bank. People do not pay rates and taxes for their money to sit in a bank earning interest. They pay for services to be established, maintained and where possible expanded. If they wanted the money to sit in the bank they would have kept the money in their own account.

The municipality for its part has geared that money precisely to establish, maintain and expand. However in a declining economy with high interest rates, high fixed salary increases and high external tariff demands, the ability of Knysna to maintain its borrowing requirements at the necessary levels has diminished. Over the last two budgets we have deliberately reduced our borrowings and for the forthcoming financial year we are reducing them again. Apart from the lowering of our long term borrowing costs a major reason for this is to ensure that the moneys we do have are spent. Too often in the past there have been roll-overs on budgets which give a twofold impression of either poor budgeting at the departmental level or poor management in its inability to spend what it has. This budget is therefore about spending what we have and spending it on what is needed rather than indulging in esoteric planning and budgeting with limited long-term success.

Interestingly, the total capital budget is still similar to those of previous years notwithstanding the fact that housing construction will be curtailed somewhat and we are still awaiting approvals from national government as to how we can spend our flood relief moneys optimally and on the areas of greatest need.

Our borrowings have been limited to matching the co-funding requirement on our Municipal Infrastructure Grant and there is therefore little own capital revenues available in this budget.

Operating Expenditure

Local government is correctly moving to a point where its budgeting must be undertaken on a realistic cash basis. The down side of this is that unless you have meaningful cash reserves available your income must closely match your expenditure. This is all well and good in normal economic conditions but when you are faced with 16% salary increases, 20% redemption cost increases and prices for tenders, goods and services that are in excess of 200% more than other parts of the country, to put it mildly it can cause a little bit of a problem.

Serious cuts and measures have therefore had to be made to ensure this budget is affordable but meaningful. Importantly a freeze is being placed on

the filling of posts until January 2010. This is not unique in local government and in fact is being implemented in many business situations all over the world. A 16% salary increase is way beyond any rational affordability levels and seriously calls into question the current pay system in South African local government. To highlight the pay absurdity even more, a financial clerk post in both Eden District Municipality and George Municipality pays about R 120,000 per annum. The equivalent post in Knysna Municipality, which requires the same qualifications and experience, pays R 70,000. Somewhere something is totally wrong!

The issue of the difference in the costs of goods and services in the Southern Cape and most especially Knysna vis-à-vis other areas of the country is problematic but is unlikely to change in the short to medium term. This is about the economic issues of location, land and labour availability and transportation networks. It will take decades before we see material changes in these conditions. Knysna simply does not have spare land to attempt to meaningfully shift its economic profile.

Operating Income

Last year we introduced a new General Valuation roll based on market values. It was not an easy process but I am far happier we did it then rather than wait until this year. At least it is now bedded down and we can start to properly enhance our revenue from a firm basis without further massive increases.

As far back as 2003 we identified that our rate and tariff structure was somewhat less than equitable but delayed changing it materially until the new General Valuation was in place. A reason for this was the historical nature that Knysna is a tourist town needing "tourist" tariffs. The time is now right to review those tariffs, especially those which have no relationship with the ability to pay principle.

This budget therefore moves towards the scrapping of the fixed annual charges for domestic refuse and sewerage. The first step is being made in 2009/2010 by reducing these annual charges by 50%. The remaining 50% will be scrapped in 2010/11. The charges for the so-called domestic sewerage "honey-sucker" will also be scrapped.

There will be a debate in some quarters surrounding service levels, service availability and tariffs. The fact is that these are basic charges for services which exist at different levels. They bear no relationship to the actual service costs and the charging of these services is not standardised in any way on either a local or national level. Moving them into the rates brings both standardisation and equity. Interestingly in all of the models we have looked at, the amount charged in total when measured against the value of property, i.e. the service cost still remains more punitive on lower valued properties.

We have also decided that the present rebate for "rural" dwellers must be removed and this will be done over two years until parity with urban dwellers is reached. There is absolutely no justification, most especially in a market value taxation system, as to why property owners in a rural setting receive a different rebate. Previously the argument was that they did not receive the same services but that argument nowadays does not hold water. We will be enhancing the rebate principle of rural maintenance. That is if property owners can be seen to be maintaining the environment in a cohesive, measurable and meaningful manner and in accordance with "green standards", they will receive a rebate, but the areas or properties involved must be open to the public. Gated or private open space/land will not be permitted rebates.

We will also be reviewing the current Bed and Breakfast charges and simplifying them to a system whereby those with less than 10 bedrooms will be regarded as domestic properties, but not receive any rebates and those above ten bedrooms will be regarded as businesses. There will also be stricter adherence to the zoning issues involved and a self-policing mechanism introduced by the B & B's.

BOTTOM LINE

The bottom line on this is as follows:

The capital budget will amount to some R81,5 million including R7,4 million of the December 2008 DoRA allocation awarded for flood damage caused in November 2007. The 2009/2010 budget is R13 million more than the original capital budget for 2008/09.

The new operating expenditure budget is R346 million up 14% on last year's original and 4% up on the final projected figures.

The operating revenue budget will show average rates increases of 7,5% and tariff increases of 10% but these will vary as to the extent of the incidence shift experienced from the halving of the refuse and sewer basic charges on domestic properties and the concomitant adjustment being made to the assessment rates to compensate for the necessary revenue.

CONCLUSION

This is not a budget for growth and it is not a budget with much in the way of meaningful deliverables. It is not a pretty budget and nor is it a particularly pleasing budget. This is a holding budget designed to alleviate the poorest in our community as far as possible without penalising the wealthier elements that drive our local economy and it is a technical budget in that it endeavours to place us in a position to move forward when the economy begins to improve by ensuring we have the beginnings of a positive cash position.

Unless somebody is prepared to dump a few hundred million on Knysna, or we find oil in the lagoon, we are not going to be able to equalise services or enhance services at the speed and to the level we would wish. Therefore we are stuck with doing the best we can within our own fiscal circumstances. In the last few years Knysna has expanded very rapidly and whilst this budget does not represent a pause, it may be described as a time out.

Section 4 - Budget Overview

Introduction

The main issues in regard to the budget 2009/10 are;

- A 34% increase in electricity tariffs (pending final approval of the ESKOM increases by NERSA);
- Overall spending on infrastructure of R 81,5 million in 2009/10
- R 19 million for water infrastructure in 2009/10,
- R 11 million for roads infrastructure in 2009/10,
- R 14 million for electricity infrastructure in 2009/10,
- R 32 million for housing and related infrastructure in 2009/10.

The National, Provincial and District Context

The Municipality's budget must be seen within the context of the policies and financial priorities of National, Provincial and district government. In essence, the spheres of Government are partners in meeting the service delivery challenges faced in Knysna. Knysna Municipality alone, however, cannot meet these challenges. It requires support from the other spheres of Government through the direct allocation of resources as well as the achievement of their own policies.

The National Context

South Africa has achieved considerable success in achieving macroeconomic stability; however, the economy is still plagued with high levels of unemployment and poverty.

The following table shows the allocations to Knysna Municipality as set out in the National Budget Division of Revenue Bill in the MTEF period;

| Allocations 2009/10 - 2011/12 | | | | |
|-------------------------------------|-----------------------|---------|---------|--|
| | Medium Term Estimates | | | |
| R million | 2009/10 | 2010/11 | 2011/12 | |
| | | | | |
| Total Allocation | 38,594 | 44,176 | 50,657 | |
| Equitable share and related | 18,849 | 20,956 | 23,208 | |
| Infrastructure | 20,995 | 21,470 | 25,359 | |
| Capacity building and restructuring | 2,000 | 1,750 | 2,090 | |

Provincial Government

| | 2009/10 | 2010/11 | 2011/12 |
|--------------------------------------|------------|------------|------------|
| | Allocation | Allocation | Allocation |
| | (R'000) | (R'000) | (R'000) |
| Total Provincial Transfers to Knysna | 32,499 | 38,568 | 45,777 |

In addition to the transfers, the Provincial Treasury also publishes the distribution of Provincial payments by the location of provincial payment

agencies operating in the Province. It provides some indication of the benefit incidence of provincial expenditure by district and municipalities, and hence how much government investment is going into Knysna: 10,23% of the total Provincial budget is spent in the Eden District (up from 7,73% in 2008/2009), and of that 24,01% is spent in Knysna which is an increase of 2,93% from 2008/2009.

National Treasury Budget Circular

Each year, National Treasury issues a circular to municipalities advising them of the budget parameters within which municipalities should work when preparing their budgets.

The headline CPI forecast for 2009/10, 2010/11 and 2011/12 is 5,4 percent, 5,1 percent and 4,6 percent respectively. However figures emanating from the major financial institutions suggest that these figures are more likely to be at 9 percent on average falling to 6 percent. The current estimate for 2008/09 in the MFMA Circular is 10,8 percent!

The growth parameters apply to tariff increases for property rates, user and other charges raised by municipalities and municipal entities, to ensure that all spheres of government support the national macroeconomic policies, unless it can be shown that external factors impact otherwise.

Funding the Budget

Section 18(1) of the MFMA states that an annual budget may only be funded from:

- Realistically anticipated revenues to be collected;
- Cash backed accumulated funds from previous years' surpluses not committed for other purposes; and
- Borrowed funds, but only for the capital budget referred to in section 17.

Achievement of this requirement in totality effectively means that a Council has 'balanced' its budget by ensuring that budgeted outflows will be offset by a combination of planned inflows.

A Credible Budget

Amongst other things, a credible budget is a budget that:

- Funds only activities consistent with the revised IDP and vice versa ensuring the IDP is realistically achievable given the financial constraints of the municipality;
- Is achievable in terms of agreed service delivery and performance targets;
- Contains revenue and expenditure projections that are consistent with current and on past performance and supported by documented evidence of future assumptions;
- Does not jeopardise the financial viability of the municipality (ensures that the financial position is maintained within generally accepted

prudential limits and that obligations can be met in the short, medium and long term); and

• Provides managers with appropriate levels of delegation sufficient to meet their financial management responsibilities.

A budget sets out certain service delivery levels and associated financial implications. Therefore the community should realistically expect to receive these promised service delivery levels and understand the associated financial implications. Major under spending due to under collection of revenue or poor planning is a clear example of a budget that is not credible and unrealistic.

Furthermore, budgets tabled for consultation at least 90 days prior to the start of the budget year should already be credible and fairly close to the final approved budget.

Fiscal Overview of Knysna Municipality

Over the past financial years via sound and strong financial management, Knysna Municipality has moved internally to a position of relative financial stability. There is also a high level of compliance with the Municipal Finance Management Act and other legislation directly affecting financial management.

For the second time in three years the municipality received an unqualified audit report from the Auditor-General and in the other year it was only very technical qualifications that caused the A-G issues. As I said last year the switch over to GRAP has had huge ramifications not least amongst the professional staffing at the local government level. Knysna municipality cannot afford the salaries that are a prerequisite to GRAP. There is already a dearth of qualified accountants in South Africa and the complexities that are GRAP in local government are such that outside of the metropolitan areas it is highly unlikely that qualified accountants are going to be available to work at the salaries on offer internally and Knysna has therefore taken steps to manage the situation externally.

Long term financial planning

During the course of the financial year Knysna obtained a credit rating of Baa2 and a Baseline Credit Assessment of 12. The assessment stated... "the BCA of 12 reflects a narrow but growing local economic base that is largely dependent upon tourism. The moderate growth of Knysna over the last few years, coupled with the migration of people to the area, has increased the service delivery challenges for the municipality. Financial management and budget planning is sound, but it has to managed within narrow financial parameters given the challenges and limited financial resources. The planned increase in Knysna's debt burden to fund the budgeted capital expenditure is expected to remain high over the medium term and will increase the risk profile of the municipality".

In many respects the credit rating was a bit like reading the transcript of a stuck record. We knew what it was going to say and unfortunately there is very little we can do about it. It will certainly not allow us access to the capital markets to any new extent, although that is not because of either the rating or the financial performance of the municipality. It is simply the fact that the appropriate lending institutions are not particularly interested in

"mini bond issues" to local authority's the size of Knysna. In retrospect therefore it is a reasonably good rating with little intrinsic value.

Budget Process 2009/10

The budget process in Knysna followed the requirements of the MFMA.

A schedule of key deadlines was prepared for tabling in Council by the Mayor prior to the end of August 2008.

The proposed budget must be tabled in Council by the end of March 2009. A period of consultation then follows. At the culmination of the consultation process the Mayor must consider any representations and decide if any amendments should be made to the budget.

The final budget has to be agreed by Council by the end of May 2009.

The Municipality's budget is again prepared on a 3 year basis. This takes into account the National and Provincial 3 year allocations to the Municipality. It is necessary to plan and budget on a 3 year basis to take account of resource constraints and also capacity constraints on service delivery. The MFMA requires municipalities to prepare 3 year budgets to ensure more thorough financial planning and provide for seamless service delivery.

However as was the case last year, in the present uncertain economic climate, both capital and operating income and expenditure figures in the outer years are indicators of need or wish, and in some instances hope, rather than of reality.

Operating expenditure in 2009/10 is budgeted at R 346 million, a 4% increase on the revised budget i.e. projected year end expenditure for 2008/09, and 6,5% increase on the adjusted budget for 2008/09.

NERSA has yet to approve the final increase that will be allowed to ESKOM. Electricity has therefore been budgeted at the proposed increase of 34% increase as stipulated in an MFMA Circular received from National Treasury... Current income growth projections for water and sewerage have been amended to 9%, 11% and 12% for 2009/10, 2009/10 and 2010/11 respectively, however these remain subject to growth indicators of 0%, 2% and 3% respectively. The additional refuse cost associated with the closure of the "Choo-Tjoe" has necessitated an increase of 19% over two years to break even and we are also piloting the introduction of 2401 "wheelie bins" in certain areas for a long term introduction.

The closure of the "Choo-Tjoe" is both an absolute tragedy and an absolute travesty for Knysna. This is a tourist region and the "Choo-Tjoe" is an iconic tourist attraction which directly and indirectly brought in millions to the local economy. Whilst one can appreciate the attitude of Transnet that "it is not in the business of running tourist trains", neither is the Knysna municipality in the business of having to put up with derelict railway sidings, railway line eyesores and generally unkempt and badly maintained Transnet infrastructure. If Transnet is not prepared to run the "Choo-Tjoe" then they should hand over the various assets involved and let the municipality work out a way to turn them into economic and tourist returns. What is happening is currently a disgrace and is at the expense of this region.

The municipality will set out measurable performance objectives to link the financial inputs of the budget to service delivery on the ground. This will be done in the form of the quarterly service targets and monthly financial targets that are contained in the Service Delivery and Budget Implementation Plan (SDBIP). This must be agreed by the Mayor within 28 days of agreement of the final budget and forms the basis for the Municipality's in year monitoring.

Section 5 - Review of the Knysna Integrated Development Plan

Introduction

Municipalities are required to develop five year Integrated Development Plans which must be reviewed annually. It is also required that such plans must find expression in the Budget. The IDP and the budget are inter-related documents. The IDP is the budget in words, just as the budget is the IDP in figures. In the past two years comprehensive efforts have been towards ensuring that the two documents are closely link.

Second Generation IDP

The Department of Provincial and Local Government has assisted municipalities in developing a second five year IDP referred to as second generation IDP. Through this process Knysna Municipality has endeavoured to improve the participation of the public in the IDP process. Knysna Municipality has considered the IDP in line with the following National Government and Provincial Government imperatives regarding the formulation of the IDP's:

- Clear analysis and strategy
- Basic Services and Infrastructure delivery
- Community involvement
- Institutional delivery capacity resource framework

Knysna's vision: The town that works for all

The Knysna Municipality has a vision which drives the Integrated Development Plan namely that of "The town that works for all".

The Municipality is faced with aggressive growth in the context of the Geographic Gross Product, Population Growth and general town construction mainly in the form of tourism facilities, golf courses and domestic construction.

The greatest challenge for Knysna Municipality has been to build its own absorptive capacity in order to ensure that such growth translates into economic development of the town. Critical issues for sustainability of the town's growth have been ensuring that the town has adequate infrastructure. Infrastructure investments requirements of this town far outstrip the available income. The challenge is for the Municipality to move faster in finding innovative funding options for financing capital needs.

Most recently the challenges alluded on above have resurfaced and continues to force the Municipality to act decisively. The Sedgefield water crisis is a case in point. This is happening against the backdrop of a worsening global economic crisis. This crisis has already transcended into the Municipal area of operation. Knysna Municipality has had to cut the budget by 5% across the board during the current financial year. It has been further required to consider drastic cuts to help avert over expenditure. All of these challenges are compounding on an already existing problem of disparity between the affluent communities of Knysna and the historically disadvantaged communities which are mainly coloured and black. The Municipality is yet to find effective instruments geared at ensuring that the development of the poorest areas is gaining momentum. Council has therefore introduced what it terms "The Neighbourhood Revitalisation Programme" which hopefully will prove to be the desired response to the plight of the poor.

Partnerships with other strategic role-players must be a logical step towards addressing the challenges with which the Municipality is faced. The consolidation of relationships with the private sector is extremely crucial. National and Provincial Governments should also prove to be valuable partners. Knysna's human capital wealth must also be harnessed.

Key challenges facing Knysna

Knysna Municipality is faced with a complex set of development challenges; their outlook is consistent with the broader challenges facing local government albeit with some peculiarities:

i. Sustainable Infrastructure Investment

The rapid growth of the town has put a lot of pressure on the town's infrastructure. Bulk infrastructure needs are growing at an unprecedented rate which the Municipality is struggling to match. This however is now complicated by the stated unwillingness of Eskom to grant Knysna the additional power it requires to "grow' the town.

ii. Focused development of the previously disadvantaged

The poor communities of the Knysna areas are subjected to the worst living conditions and the Municipality is demonstrating a commitment towards poverty alleviation. Programmes with clear funding intentions are being designed for that purpose. The Neighbourhood Revitalisation Programme is the desired response to this problem.

iii. Integrated Human Settlement

The provision of housing settlements with a strong emphasis on sustainability is an important issue for Knysna Municipality. Within the context of a composite set of development needs of the previously disadvantaged, the Municipality will address the need for housing. Although some of the obstacles regarding successful housing provision are not necessarily within the control of the municipality i.e. access to land, the challenge still remains for Council to devise creative strategies to deal with this matter. In line with that the Council has engaged with the other spheres of government i.e. DWAF & Department of Public Works. The Integrated Human Settlement strategy will pave the way for future housing provision in the Knysna area; however the caveat that is Eskom needs to be repeated.

iv. The challenge of promoting Local Economic Development

The need for the diversification of the local economy through facilitating the emergence of previously underperforming sectors is an important catalyst for economic development. Our Local Economic Development strategy must focus on mainstreaming the previously disadvantaged people. Crucial to this will be the need to work in partnership with relevant stakeholders in boosting employment and fostering SMMEs.

v. The challenge of ensuring municipal financial viability

A municipality lives and dies by its ability to balance needs with resources. Knysna Municipality cannot generate sufficient resources to properly satisfy all its needs. Therefore those needs will have to be managed and dealt with in a financially sustainable manner. Promises of quick and easy solutions are simply lies.

vi. The challenge of municipal transformation and institutional development

Staff development is crucial to meet the challenges of Knysna and the new ethos of local government. The Employment Equity imperatives have to be assessed continually to ensure that Knysna Municipality's transformation remains in line with the broader transformation agenda of South Africa. Included in this must be an accelerated emphasis on growing and developing our own timber. Knysna does not have the luxury of competing in terms of salary and therefore our ability to attract qualified and quality staff is severely limited. We must therefore develop from within. The drastic increase on the interns is a good illustration of this commitment.

vii. Public Participation

Public Participation is an important feature of any democratic environment. Although the legislative environment provides adequately for public participation, Knysna Municipality is challenged to ensure that it continues to build on its successes over the last few years.

The Strategic Objectives

Seven strategic objectives have been developed to realize the vision and meet the challenges highlighted above, these are;

- 5.1 A caring and contented town
- 5.2 A successful and respected town
- 5.3 An attractive and sustainable town
- 5.4 A reliably functioning town
- 5.5 A financially sound town
- 5.6 A dynamic and welcoming town
- 5.7 A town prepared for the future

The Knysna IDP has a direct expression from the above mentioned objectives; the IDP through its strategies seeks to reinforce the strategic objectives as articulated above.

The five year IDP and the budget

The budget for the year 2009/10 is prepared in such a manner that it is a financial expression of the Integrated Development Plan. Through the Capital budget Knysna Municipality has attempted to address some of the key issues pushed out in the IDP.

The operating budget will again focus on delivering quality front-line services, encouraging economic activity and relieving poverty amongst the marginalized communities. The Operating Budget must attempt to fill the gaps regarding those issues that the capital budget has not been able to address.

It is imperative that resources are used in the most effective way to meet the needs and challenges identified in the IDP. All budgeted expenditure, both operating and capital, must clearly link to the IDP strategic objectives. This linkage will be evidenced via the Service Delivery and Budget Implementation Plan (SDBIP) which gives effect to the IDP in that it is the key document used for measuring implementation of policy in a detailed way. Each service has measurable performance objectives and indicators shown on a quarterly basis.

The SDBIP must be finalized within 28 days after the approval of the Municipality's budget and made public 14 days after that.

Section 7 - Directorate 3 Year Operating and Capital Budgets

This section describes Directorate budgets and highlights the capital and operating expenditure budgets and the Directorate's operating revenue.

EXECUTIVE & COUNCIL

Introduction to Directorate

The Directorate includes the Office of the Municipal Manager who is the head of Administration of the Municipality.

Main challenges facing the service over the next 3 years and proposed solutions

The main challenge is to establish an effective and representative Top Management Team that has all the skills to function in an integrated manner and to deliver on the difficult challenges which Knysna must deal with over the coming IDP cycle. The Top Management Team must ensure that a solid foundation, on which effective service delivery can take place, is established.

This will include:

- \Rightarrow Establishing a customer focus ethos;
- \Rightarrow Imbedding the principles of Batho Pele;
- \Rightarrow A positive work ethic and sound discipline;
- ⇒ Understanding the notion of "developmental local government" and the importance of positive community involvement in the activities of Council;
- \Rightarrow Enskilling our staff through more focussed training and development.

Key Deliverables

To firmly establish the corporate and individual performance measuring System to ensure that council is delivering appropriate services in an affordable and sustainable manner. Produce and innovative and dynamic reviewed IDP that will lead to significant and visible gains in service delivery and will assure the long term future of Knysna. Rigorous and comprehensive public involvement and consultation will be followed as an integral part of the IDP process.

CORPORATE SERVICES

Introduction to Directorate

Function

The Directorate Corporate Services ensures the proper functioning of all decision making structures including Council, Mayoral Committee and any standing and other committees. It is responsible for the conveying of decisions to the Directorates, sound administration, and the provision of legal advice to protect the municipality's best interests. It provides the municipality with suitable staff to meet its objectives, and provides guidance on human resource matters and co-ordinates training of staff. It takes care of administration of municipal property, insurance of municipal assets and safe-keeping of all documentation.

Disciplines

This directorate comprises the following functional areas:

- Administration
- Committee Services & Secretariat
- Human Resources
- Property Administration
- Legal Services
- Records & Archives

Medium Term Budget Summary

Main challenges facing the service over the next 3 years and proposed solutions

The provisioning of office accommodation for the political office bearers and staff in order to enable them to effectively execute their tasks and to render a service to the communities. The growth of the staff component is in line with service delivery areas of council.

Office space in the immediate vicinity, as of the municipal precinct is situated on the boundary of the Central Business District, is presently being rented at astronomical premium amount. The biggest challenge is to create permanent accommodation which is the property of council and in doing so, eliminate the exorbitant rental council pays to landlords. Provisions of the other facilities and venues for meetings, training, etc. must also be addressed.

Council is obliged in terms of legislation to consult with its communities on a number of matters and must therefore have a healthy ward committee system in place. The establishment of a Public Participation Unit to co - ordinate and drive the Council Public Participation Strategy and to maintain the

effectiveness of the ward committees is a high priority, but the availability of funding to finance the project is a matter of concern. The sourcing of scare skills remains a challenge, mainly as the council cannot compete with the private sector in the open market. Budgetary resources are not available for this purpose. The appointment of other key staff in the Human Resource and legal disciplines is also restricted due to lack of funds.

Key Deliverables

- \Rightarrow Delivery of adequate office accommodation for the office bearers and staff
- \Rightarrow Establishing of a public participating unit
- ⇒ Providing administrative, legal, archival and human resource support to council and the office administration.
- \Rightarrow To ensure the effective functioning of council and it's committees by providing them with the necessary support and infrastructure.

FINANCIAL SERVICES

Introduction to Directorate

Mission

The Directorate is committed to providing cost effective financial services to the Council, Customers and Municipal Departments in order to address the socio-economic position of the broader community of Knysna.

Function

To deliver cost effective financial services to Council, residents and Municipal Departments which address the socio-economic position of the broader community within the financial capabilities of Council.

Disciplines

The Directorate contains the following service related disciplines:

- **Financial Administration**
 - Budget
 - Financial Statements
 - Asset Management & Insurance
- Expenditure
 - Stores
 - o Creditors & Procurement
 - Payroll
- Income
 - Debtors Billing
 - Revenue Collection
- Management Information Services
 - Data Processing
 - Management Information Reporting

Medium Term Budget Summary

| Finance | | | | | |
|-----------------------|-----------|-----------|------------|------------|--|
| | Revised | Budget | Indicative | Indicative | |
| | 2008/2009 | 2009/2010 | 2010/2011 | 2011/2012 | |
| | R'000 | R'000 | R'000 | R'000 | |
| Operating Revenue | 90,598 | 97,672 | 106,598 | 117,953 | |
| Operating Expenditure | 6,332 | 6,263 | 6,631 | 7,161 | |
| Capital Expenditure | 165 | 700 | - | - | |

Main challenges facing the service over the next 3 years and proposed solutions

The main challenges are:

The creation of a one-stop shop within procurement that will cater for all departments and the tandem emphasis on purchasing locally and allowing for greater entry into the Knysna environment for local BEEs. The introduction of procurement targets in ensuring that the municipal spend is maximised locally. This will begin with all expenditure under the delegated amount of R 2,000 having to be local and 90% of all expenditure under the delegated

amount of R 30,000 having to be local. Targets for the delegated amount of up to R 200,000 are currently being examined.

Taking the Customer Centre and by implication the Council to a far higher level of customer care by introducing cost-effective technology throughout Council. This will involve the splitting of traditional income functions from customer functions and transferring staff accordingly.

The inability of Council to attract competent, qualified, additional accounting staff means that Council will have to (a) outsource this function on a more regular basis for the time being and (b) ensure that we are utilising technology and up-dating our financial systems as often and as far as possible. This will mean extending the VIM system where appropriate and appointing suitable service providers to assist where necessary.

All of the above place a greater emphasis on IT and we also need to deepen our skills base not only within the ICT department but throughout Council. An IT literate workforce will save Council millions which can be used for improved and extended service delivery provided we can provide suitable and relevant IT platforms.

For the most part however, the role of Finance over the next two years is to keep the municipality going, i.e. oiling the wheels of the municipality with what little money we have in as an efficient manner as possible. That means there will be a heavier emphasis on internal financial control than in the past.

Key Deliverables

- Creation of a dedicated taxation section to maximise revenue opportunities
- Customer Care Implementation Plan and System
- ICT skills identification and training plan for all staff in conjunction with Human Resources
- VIMS expansion plan
- Strengthened core financial management centre

STATEGIC SERVICES

Introduction to Directorate

The Directorate is the most recent to be established by Knysna Municipality. It is an embodiment of the developmental local government which is the overarching character of local government in the current conjuncture.

Function

The Directorate's function is to ensure that Knysna Municipality develops a sound strategic direction and further ensure that such a strategic direction is properly captured in all the principal planning documents of Knysna Municipality which would include the Budget and the Departmental Plan.

The Directorate is further charged with the responsibility of poverty alleviation through a clear and sound strategy to deal with poor communities; this is expected to be further enabled by the development and implementation of a Local Economic Development Plan.

Disciplines

The following are disciplines of the Directorate:

- Integrated Development Plan
- Community Based Planning
- Organisational Performance Management Systems
- International Relations
- Inter Governmental Relations
- Local Economic Development
- Neighbourhood Revitalisation Programme
- Sport Development
- Annual Report

Medium Term Budget Summary

| Strategy | | | | | | | |
|-----------------------|-------------------------------|------------------------------|----------------------------------|----------------------------------|--|--|--|
| | Revised 2008/2009 R'000 | Budget 2009/2010 R'000 | Indicative 2010/2011 R'000 | Indicative 2011/2012 R'000 | | | |
| Operating Revenue | 859 | 5,500 | 3,557 | 5,410 | | | |
| Operating Expenditure | 7,989 | 6,957 | 6,913 | 7,760 | | | |
| Capital Expenditure | 2,200 | 5,000 | 3,557 | 5,410 | | | |

Main challenges facing the service over the next 3 years and proposed solutions

- The review of the second generation Integrated Development Plan and proper monitoring of its implementation.
- Writing of the Municipality's Local Economic Development Plan and identification/implementation of bankable LED Plan.
- Facilitate the Development of Township Economies.
- Ensure Proper Alignment of the PMS/IDP and BUDGET.
- Facilitate access to sport facilities by the youth.

- Ensure that the Council achieve sound Inter Governmental Relations.
- Collation of the Annual Report

Key Deliverables

- Annual Report
- Reviewed IDP
- Local Economic Development Plan
- SMME Growth
- Township Development Plans
- Decent Sport Infrastructure
- LED Projects
- Project Based International Partnerships
- Visible change in the living condition of the poor people.

PLANNING AND DEVELOPMENT SERVICES

Introduction to Directorate

Mission

The Directorate is committed to providing cost effective planning and development services to the Council, Clients and Municipal Departments in order to address the socio-economic position of the greater community of Knysna.

Function

To deliver cost effective planning and development services to the public of the Greater Knysna Municipal Area, within the framework of scarce resources, environmental requirements and socio-economic objectives.

Disciplines

The Directorate contains the following service related disciplines:

- Town Planning and Building Control
 - Spatial planning
 - Major land use applications
 - Minor land use applications
 - Building Control
- Integrated Human Settlement
 - Housing letting
 - Housing Administration
 - Housing Development
- Environmental Management
- Land reform

Medium Term Budget Summary

| Planning | | | | | | | |
|-----------------------|-----------|-----------|------------|------------|--|--|--|
| | Revised | Budget | Indicative | Indicative | | | |
| | 2008/2009 | 2009/2010 | 2010/2011 | 2011/2012 | | | |
| | R'000 | R'000 | R'000 | R'000 | | | |
| Operating Revenue | 54,302 | 34,514 | 39,935 | 51,616 | | | |
| Operating Expenditure | 50,663 | 36,690 | 43,548 | 53,234 | | | |
| Capital Expenditure | 27,478 | 22,308 | 23,825 | 33,250 | | | |

Main challenges facing the service over the next 3 years and proposed solutions

The Vision 2020 and Flenters/Robololo/Concordia projects are progressing well. However, based upon the drastic decrease in Council's contribution to housing, the roll out of housing will diminish significantly. The Municipality has also been informed that Provincial allocations will be leaner and the opportunities for accessing unspent funds are decreasing.

The focus will be on increasing the variety and affordability of housing over the next three years. Projects include Heidevallei and Hornlee Affordable Housing Development in conjunction with ABSA bank; the investigation into the back yarders upgrade program, for which Knysna is a pilot study for the Western Cape; the development of Community Residential Units and further investigation of sites suitable for gap housing. The Karatara planning is almost complete and provides a wonderful opportunity for tenure upgrade within an integrated development.

The Municipality will also be focussing on the Youth in Housing, Women in Construction and the incubation of SMMEs within the housing roll-out. The Housing Consumer Program will assist in educating and informing new home owners of their rights and responsibilities.

Council will maintain its policy of zero-tolerance for illegal structures as it strives to meet the 2014 target. However, given the current economic crisis the search by the urban poor for job opportunities and living space will continue to ensure that the Municipality is challenged in this regard.

The Municipality has been identified as a Built Environment Support Program member. This project, over the next three years, will look at expanding and developing the Integrated Human Settlement Strategy and the Spatial Development Framework into credible and sustainable projectlinked strategies.

The sourcing of professional staff is extremely critical not only from the National scarcity but the local conditions of high cost of living in Knysna. Three of the four departments are operating on 50% or less professional capacity, indeed the Land Reform section has no staff at all. These are extremely worrying statistics in the light of our current and future development needs. The Council will be paying a premium for this lack of capacity and will have to compensate with contractors and consultants. This must be seen against the background of the budget cuts and cost-saving requirements. Indeed all our highly capable staff are horrendously stretched and ultimately stressed as to their capacity.

The increased demands and stringent requirements of Environmental Management means that detailed planning and EIA approvals will now have to be undertaken by Council well ahead of any proposed development in order that the required assurances can be given to these Environmental authorities that the Council can provide the service. Funding will have to be provided earlier for this planning process not to delay developments. The existing skills and capacity gap in the EM Department is thus of great concern.

Cost saving initiatives

- No spatial planning
- No new vehicles required by Housing
- Decrease in fuel
- Decrease in 90% operating votes by at least 5%
- Limited use of external professional consultants
- Minimising Council contribution for housing

Key Deliverables

The key deliverables (in broad terms) over the next three years will be:

- Increasing and maintaining sufficient professional, administrative and supervisory capacity.
- Finalization of at least two SDF studies.
- Finalisation of the BESP program.
- Finalisation of the Back yarders upgrades social and technical studies.
- Finalisation of Own Haven Phase I.
- Finalisation of the Sedgefield Infill project.
- Commencement of transfer of Karatara properties.
- Commencement of the Community Residential Units project.
- Grant funding for housing must be exploited to its maximum.
- Infrastructure and maintenance planning must be completed to allow for future development in Rheenendal, Sedgefield, and parts of Hornlee and Karatara.

COMMUNITY SERVICES

Mission

To give effect to the developmental mandate contemplated in Sec 153 of the Constitution by rendering acceptable standards of service relating to the key performance areas of this directorate so as to ensure an environment conducive to optimal personal growth.

Function

To deliver effective community services to the residents of, and the visitors to, the Greater Knysna Municipal Area.

Key Performance Areas

The Directorate contains the following key performance areas:

- Solid Waste:
 - Waste Management [Waste Collection & Cleansing]
 - Street Cleaning
 - Refuse Removal and Transfer Station
 - Sanitation
 - Cemeteries
- Library Services
 - Museums
 - Arts & Culture
 - Heritage
- Parks & Recreation:
 - o Parks
 - Recreational Areas
 - Sport fields
 - Swimming Pool
- Protection Services:
 - Fire Brigade
 - Law Enforcement
 - Traffic Policing, Drivers Licences & Vehicle Licensing
 - Disaster Management

Medium Term Budget Summary

| Community | | | | | | | | | | |
|-----------------------|-------------------------------|------------------------------|----------------------------------|----------------------------------|--|--|--|--|--|--|
| | Revised 2008/2009 R'000 | Budget 2009/2010 R'000 | Indicative 2010/2011 R'000 | Indicative 2011/2012 R'000 | | | | | | |
| Operating Revenue | 27,343 | 31,455 | 31,363 | 34,636 | | | | | | |
| Operating Expenditure | 59,945 | 65,207 | 71,007 | 76,626 | | | | | | |
| Capital Expenditure | 9,883 | 6,051 | 1,000 | 1,779 | | | | | | |

Main challenges facing the service over the next 3 years and proposed solutions

Knysna 2010 Base Camp Bid

Should Knysna be identified as a base camp for some of the international teams, this will undoubtedly further strain the already limited financial resources. The biggest challenge in hosting a team is the fact that very little time is allowed for planning and budgeting and with the cost-cutting initiatives already implemented, presenting the Knysna Municipal to our international visitors, will not only be a huge challenge, but a welcome one.

Department: Solid Waste

Land availability for a new cemetery remains a challenge.

A positive Record of Decision was issued for the development of garden refuse sites and four sites are being developed for this use. The existing site [Old Place] will be closed and the area rehabilitated.

Council also resolved to actively participate in the Regional Waste Management plan the result of which will be transporting our waste to a regional landfill site.

Department: Libraries, Heritage, Arts and Culture

The recruitment and retaining of suitably qualified individuals remains a challenge and impacts negatively on service delivery. Strong efforts are made to promote on Urban Heritage in the older established historically disadvantaged areas.

Department: Parks and Recreation

Alien eradication and the overgrowing of our open spaces has become a huge challenge with criminal elements further exacerbating this problem by using these areas for their activities. Areas such as these are identified in conjunction with SAPS and are cleared by contractors.

The over-utilisation of sport fields remains a challenge and this directorate is looking forward to, in conjunction with the Strategic Services Directorate, access/apply for funds for upgrades.

Department: Protection Services

In this department, serious challenges are faced in the Divers Licence section due to resignations and special attention needs to be given to this challenge so as to reduce the waiting periods by applicants.

Traffic Law Enforcement is ongoing and the implementation of the AARTO [Administration Adjudication of Road Traffic Offences] Act will have a big impact on motorists and related administrative functions of the Traffic Department.

Cost Saving Initiatives

Operationally the budget for the directorate has already been adjusted downwards by an average 12%. This will directly affect service delivery and Managers have been requested to, from July 2009, exercise very close control over their operational expenditure and to come up with innovative ways to cut costs.

Key Deliverables

- Ensure effective and efficient management and utilization of open spaces
- To improve and maintain the horticultural aspects of Knysna Municipality
- To ensure safe and available sport and recreational services.
- To expand the Library service via suitcase and container libraries
- To increase the availability of family literacy, ECD and ABET
- To promote local heritage
- To ensure diverse and relevant displays and collections
- Ensure an effective functioning of the Waste management
- Ensure effective and efficient management of the burial and cemetery services.
- Ensure a clean and welcoming municipal area
- Ensure clean and well maintained public toilet facilities within Knysna area

ELECTRICAL SERVICES

Introduction to Directorate

Disciplines

The Electro Technical Engineer's Department undertakes the following functions:

- Electricity Administration & Distribution
- Street Lighting
- Mechanical Workshop

Medium Term Budget Summary

| Electrical | | | | | | | | | |
|-----------------------|-------------------------------|------------------------------|----------------------------------|----------------------------------|--|--|--|--|--|
| | Revised 2008/2009 R'000 | Budget 2009/2010 R'000 | Indicative 2010/2011 R'000 | Indicative 2011/2012 R'000 | | | | | |
| Operating Revenue | 101,572 | 133,426 | 172,549 | 220,119 | | | | | |
| Operating Expenditure | 91,292 | 110,735 | 139,475 | 172,178 | | | | | |
| Capital Expenditure | 9,403 | 13,958 | 8,280 | 1,200 | | | | | |

Main challenges facing the service over the next 3 years and proposed solutions

- To deliver an electrical supply which complies with the minimum standards as required by NRS 047 and NRS 048.
- To ensure the electrical infrastructure is adequate to supply the demand for electrical supply within the limitations of the available funding.
- To be able to attract suitably qualified and skilled staff to Knysna taking into consideration the imbalance between the cost of living and the salaries offered in Knysna/Sedgefield.

Capital Investment - Highlights over the next 3 years

The densification policy is placing an increased burden on the existing electrical infrastructure which was not designed to supply the type of development being experienced. Funding of the upgrading of the existing networks remains difficult as result of the high cost of funding the above projects.

Key Deliverables

Ensure minimum power outages in all areas

Ensure all formal residents have electrical supply

Ensure losses in the electrical system be kept to a minimum

TECHNICAL SERVICES

Introduction to Directorate

Function

The Technical Services directorate provides civil engineering services for the public of Knysna. As such the Directorate operates a central office in Knysna and two area offices namely, the Belvidere Area office, serving Brenton, Belvidere and Rheenendal and the Sedgefield Area office, serving Buffalo Bay, Sedgefield and Karatara.

The function of the Directorate is to provide cost effective civil engineering services within the framework of scarce resources, environmental requirements and socio-economic objectives of the broader community of Knysna.

Disciplines

The Technical Services Directorate contains the following service related disciplines.

- Civic Buildings
 - \Rightarrow Maintenance and construction management of all municipal buildings.
- Public works
 - ⇒ Maintenance and construction of streets and storm water systems and construction of ad hoc projects such as sports fields.
- Sewerage Treatment Services
 - ⇒ Maintenance, construction and operation of Waste Water Treatment Plants (WWTP). The following plants are in operation:
 - Knysna WWTP Brenton WWTP Belvidere WWTP Rheenendal WWTP Sedgefield WWTP Karatara WWTP
- Sewerage Reticulation Services :
 - ⇒ Maintenance, construction and operation of sewerage reticulation network and pump stations. There are 70 municipal sewerage pump stations in the Greater Knysna.
- Water Treatment Works
 - ⇒ Maintenance, construction and operation of raw water supply schemes and water purification facilities. The following supply schemes are operated:
 - ⇒ Knysna: water supplies from Knysna River, Gouna River and Glebe Dam and Knysna Water Treatment Plant (WTP).
 - \Rightarrow Belvidere and Brenton borehole and treatment systems
 - ⇒ Rheenendal: water supplies from Homtini river and Rheenendal WTP
 - ⇒ Buffalo Bay: water supplies from Goukamma river and Buffalo Bay WTP
 - ⇒ Sedgefield: water supplies from Karatara River and Sedgefield WTP.

- \Rightarrow Karatara: water supplies from Karatara River and Karatara WTP.
- Water Reticulation Systems
 - ⇒ Maintenance, construction and operation of water reticulation network and potable water reservoirs, there are 38 reservoirs in the greater Knysna.

Medium Term Budget Summary

| Technical | | | | | | | | | | |
|-----------------------|-----------|-----------|------------|------------|--|--|--|--|--|--|
| | Revised | Budget | Indicative | Indicative | | | | | | |
| | 2008/2009 | 2009/2010 | 2010/2011 | 2011/2012 | | | | | | |
| | R'000 | R'000 | R'000 | R'000 | | | | | | |
| Operating Revenue | 68,353 | 86,834 | 81,963 | 87,317 | | | | | | |
| Operating Expenditure | 89,670 | 93,786 | 93,520 | 102,587 | | | | | | |
| Capital Expenditure | 21,754 | 31,998 | 20,828 | 17,561 | | | | | | |

Main challenges facing the service over the next 3 years and proposed solutions

The bulk service infrastructure of water supplies and sewerage treatment has reached capacity to provide for the needs of the Town and its areas. The challenge will be find funding for these projects to meet the development demands of the growth of Knysna. In some cases development will have to be curtailed until financial resources are available. As most of these bulk infrastructure projects have extended planning cycles 5 years or more it must also be ensured that the planning momentum is not lost.

Local services also require replacement or upgrading either due to ageing infrastructure or additional demands of development. Again funding will be critical and where possible funding from new developments will be utilized for this purpose. The use of a dedicated services augmentation fund is essential.

In establishing local infrastructure Council will have to go further in it's planning than before due to the stringent requirements of the Environmental Departments. Detail planning and EIA approvals will now have to be undertaken by the Council well ahead of any proposed development in order that the required assurances can be given to these Environmental authorities that the Council can provide the service. Funding will have to be provided earlier for this planning process not to delay developments.

The support of Government in the form of direct support for funding from the Department of Water Affairs and Forestry is going to be essential their position that basic water supplies are met is insufficient to deal with the needs of a growing economy.

In the light of the need of the essential services for funding, roads infrastructure is also going to take a back seat. Roads infrastructure improvement will be dependent on Provincial and National Roads funding or from levies on new developments. Council will actively be pursuing these sources. The sourcing of technical staff is extremely critical not only from the National scarcity but the local conditions of high cost of living in Knysna. The Council will be paying a premium for this lack of in house resources from artisans to engineers and will have to compensate with contractors and consultants. Consultants will have to be used more and more for administrative and supervising functions. Learner programs and mentoring opportunities will also be explored.

Capital Budget 2009/10

Although the Capital budget now includes the additional DoRA allocation made in December 2008 that related to the flood damage from November 2007, there still remains to be finalised the utilisation of the previous DoRA allocation for the flooding in Sedgefield due to the outstanding resolution of the grant funding from Disaster Management.

Subsequent to the draft budget, provision for the following projects has been made in the approved 2009/2010 budget:

- Repair to sea walls, with specific emphasis on Leisure Isle
- Concordia road taxi route over run
- Glebe pipeline
- Sedgefield desalination water supply (Partial provision pending remaining outcome of Disaster Management)

The following projects are considered to be committed but remain unfunded or only partly funded depending on the remaining grant funding decision:

- Eastford raw water pump station: R 2,000,000; current renovation of pumps for better assurance of supply
- Raise Akkerkloof dam: R 600,000; postponed water augmentation project due to funding required for pumps
- Water augmentation and licenses: R 2,000,000; essential to maintain the momentum of planning for water sources.

The above are really committed projects and every effort should be made to fund them.

There are Capital projects where the implication of not doing them has been brought to the Councils attention but no budget is available. These are unfunded priorities and will negatively affect the growth of the town if not proceeded with, for example:

- Knysna Sewer works extension: R 38,000,000; EIA has been completed and capacity is soon to be exceeded which will have a detrimental effect on the effluent to the lagoon
- N2/Nekkies intersection: R 5,500,000; road safety at the intersection is very poor, SANRAL have offered to fund 50%
- Buffalo Bay water works improvements R 2,000,000; chemical quality of the water cannot be improved with the existing plant

• Sedgefield sewer works upgrading: R 16,000,000; current DWAF license has been withdrawn as standards cannot be achieved.

Operating Budget: 2009/10

R93,8 million was allocated for operating costs to Technical Services Directorate for 2009/10. After the allocation of funds to the fixed cost elements of items such as electricity supplies, chemicals for water treatment and operational contracts, the following is a summary of the effects of the restriction in operating budget. It must also be noted that the R93,8 million is only R4 million more than the expected expenditure for 2008/09 and nowhere near the requirements for 2009/10.

- Repairs and maintenance of Civic Buildings: This vote includes offices and various departments' buildings. The proposed budget has been kept at the same figures as 2008/09 and implies no refurbishment or major renovations, only essential breakages and repairs will be possible. The 2008/09 budget was depleted in January 2009 and cost increases next year will mean less work will be possible. The provision for maintenance for staff accommodation was already overspent in November 2008 and the new budget will again only allow for repairs to breakages and minor maintenance. Housing and offices are deteriorating without sufficient maintenance.
- Resealing of roads: No provision has been possible for resealing of roads in 2009/10. From the report that recently served before the ID & HIS committee it was clear that R 10-16 million was required over the next two years to catch up with the resealing program. This means next year R16 million will be required for this purpose. Roads that cannot be effectively patched will have to be returned to gravel roads.
- Re-gravelling of roads: Expenditure has been reduced below 2008/09 figures and had to be supplemented with funds from hire charges. With cost escalation this implies that 8 km of gravel roads can be attended to out of a total of 46,5 km of gravel roads in the Greater Knysna.
- Water and Sewerage infrastructure: repairs and maintenance; only funding for breakages and blockages has been provided. Very little funding is available for preventative maintenance, some camera work on pipelines where there are problems is possible but the following will not be able to be undertaken:-
- Ø Replacement of old pipelines.
- Ø Cleaning of pipelines and reservoirs
- Ø Investigations into pollution sources
- Ø Replacement of water meters.
- Ø Provision of meters for housing schemes

The sections will function even more on a reactive basis, rather than a proactive basis, than in the past and inflation will severely impact on available funds for maintenance. The budget makes asset management a pipe dream for the foreseeable future.

Key Deliverables

The key deliverables over the next three years in broad terms are:

- Sufficient Technical administrative and supervising capacity.
- Finalization of feasibility studies and approvals for Knysna's additional water resources.
- Completion of emergency measures for water supplies.
- Upgrading of Sedgefield waste water treatment plant.
- Extension of Knysna's waste water treatment plant.
- Completion of Master Plans for water and sewer services to meet the demands for development indicated by the Spatial Development Plan.
- Upgrading of the major water and sewer reticulation for Knysna.
- Detail planning and approvals for water and sewer infrastructure for development areas.
- Funding for maintenance of infrastructure on an annual basis to ensure the level of service is met.
- Grant funding for infrastructure is exploited to its maximum.
- Infrastructure and maintenance planning must be completed so that when funding is available the projects can be promptly implemented.
- Interface with National Roads agencies for the planning and construction of the toll highway for Knysna and Sedgefield.
- Levering of additional financial sources for both Capital projects and operations.

The challenge remains scarce human resources and scarce financial resources.

Annexure 1 - National Treasury Required Budget Schedules, Supporting Tables and Charts

The budget schedules 1 to 4 contained in this annexure have been introduced by National Treasury with the aim of ensuring transparency and consistency between municipalities in the presentation of their budget information.

The schedules relate to section 17 of the Municipal Finance Management Act which states "An annual budget of a municipality must be a schedule in the prescribed format". When agreeing the budget, the Council's resolution must refer to these budget schedules.

The supporting tables and graphs are not part of the prescribed format and are included to assist users' understanding of the information.

The schedules include the use of Government Finance Statistics (GFS) classifications. The use of these tables should allow for a more meaningful comparison between municipalities although any such comparison should still be treated with a degree of caution until the new GRAP accounting standards are common to all local authorities.

Annexure 1 (a) - Budget Schedules, Tables & Graphs

Schedule 1 - Revenue by Source

Column Definitions:

A. The audited actual for 2007/08 per the audited financial statements.

B. The original budget approved by council for the 2008/09 budget year.

C. The budget for 2008/09 budget year as adjusted by council resolution in terms of section 28 of the MFMA.

D. An estimate of final actual figures (pre audit) for the 2008/09 budget year at the point in time of preparing the budget for the 2009/10 budget year. This may differ from C.

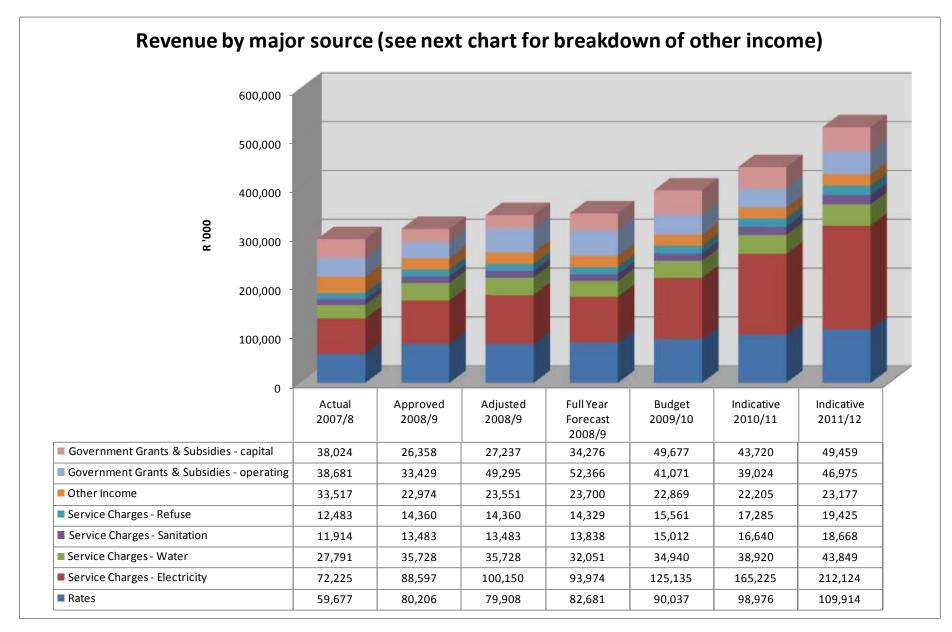

E. The amount to be appropriated for the 2009/10 budget year.

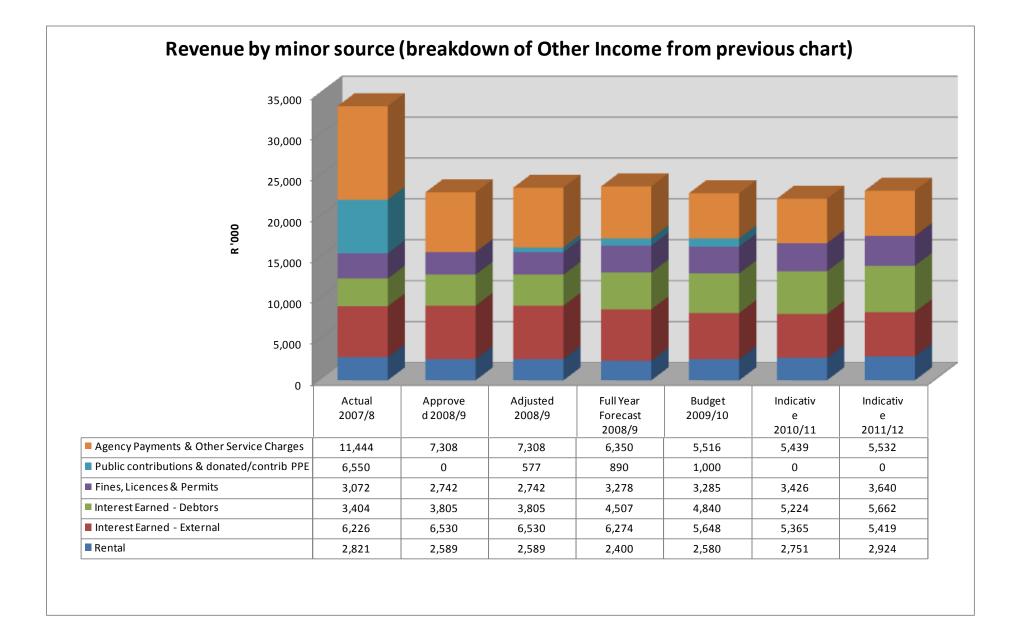

F. The indicative projection for 2010/11

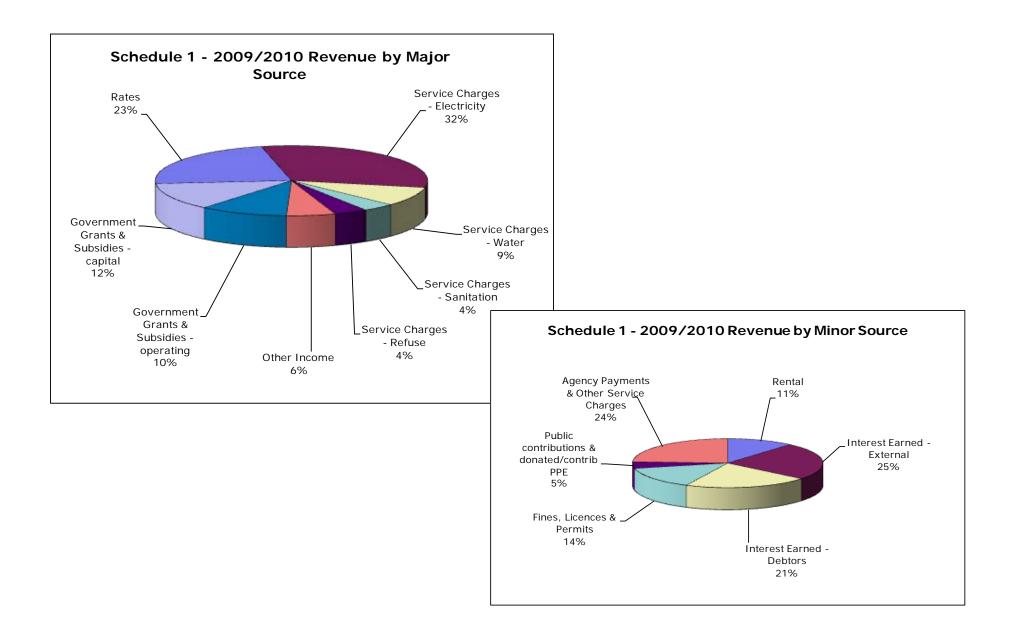

G. The indicative projection for 2011/12

Notes:

1. Income foregone is included in Property Rates and Service Charges

Column Definitions:

A. The audited actual for 2007/08 per the audited financial statements.

B. The original budget approved by council for the 2008/09 budget year.

C. The budget for 2008/09 budget year as adjusted by council resolution in terms of section 28 of the MFMA.

D. An estimate of final actual figures (pre audit) for the 2008/09 budget year at the point in time of preparing the budget for the 2009/10 budget year. This may differ from C.

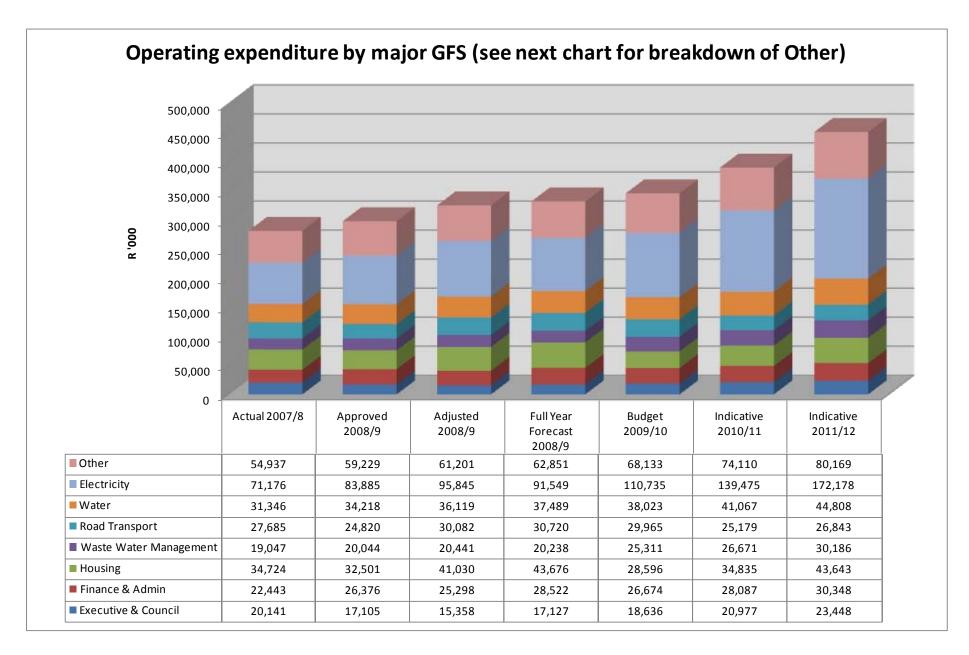

E. The amount to be appropriated for the 2009/10 budget year.

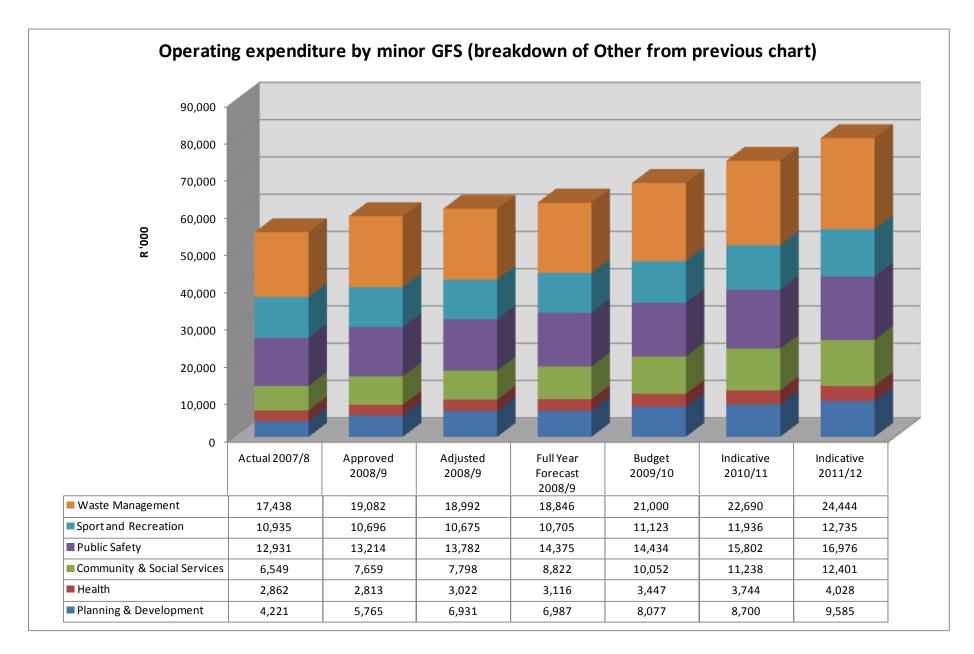

F. The indicative projection for 2010/11

Column Definitions:

A. The audited actual for 2007/08 per the audited financial statements.

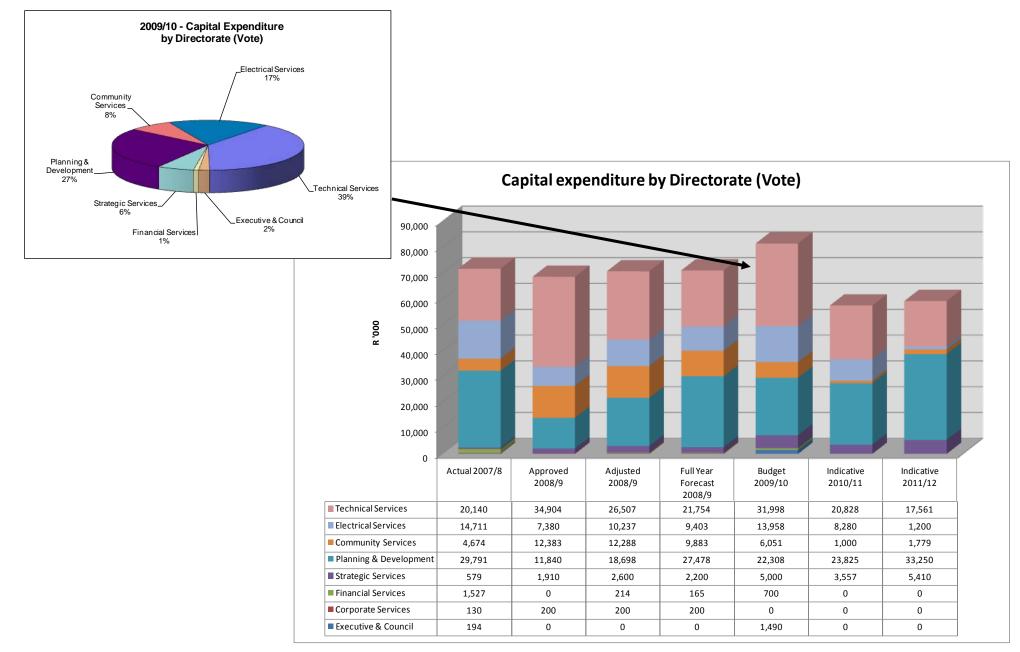

B. The original budget approved by council for the 2008/09 budget year.

C. The budget for 2008/09 budget year as adjusted by council resolution in terms of section 28 of the MFMA.

D. An estimate of final actual figures (pre audit) for the 2008/09 budget year at the point in time of preparing the budget for the 2009/10 budget year. This may differ from C.

E. The amount to be appropriated for the 2009/10 budget year.

F. The indicative projection for 2010/11

G. The indicative projection for 2011/12

Annexure 2 - Rates and tariffs 2009/10

Rates, tariffs and other charges

Please see the separately attached tariff schedule.

The average increases for 2009/2010 are:

- Assessment rates 7,5%
- Refuse 10%
- Sanitation 10%
- Water 10%
- Electricity *34%

* The National Energy Regulator is only scheduled to consider and decide on Eskom's application for an interim price increase on 25 June 2009. Following the outcome of the decision, the electricity tariffs for 2009/2010 will be finalised and approved by Council.

Annexure 3 - Measurable Performance Objectives

Adoption of the Service Delivery and Budget Implementation Plan

The Service Delivery and Budget Implementation Plan must be approved by the Mayor within 28 days after the final approval of the budget.

Contents of the SDBIP

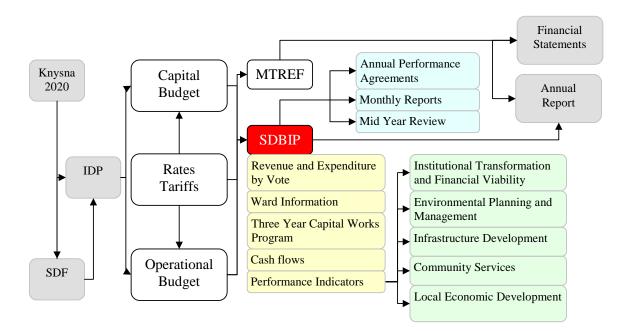

The SDBIP must contain monthly projections of income and expenditure and quarterly projections of measurable performance objectives which are included in this annexure.

Some annual targets are still to be confirmed. These will be included in the final budget documentation and SDBIP.

SDBIP requirements

Traditionally the Annual Budget process was driven by the Finance Directorate and delivered a document lacking in community participation, departmental input and measurable outcomes. With the introduction of the IDP, MTREF, SDBIP and Annual Report additional requirements are placed on departments that to a large degree have not been addressed.

The SDBIP is essentially a business plan and is an integral part of the financial planning process. Although its approval is required after the budget, its preparation occurs in tandem with the budget process. The SDBIP is the connection between the budget and management performance agreements, and it includes detailed information on how the budget will be implemented, by means of forecast cash flows and service delivery targets and performance indicators. The schematic below sets out its importance in the municipal reporting cycle.

In recent dealings with Local Authorities both National and Provincial Government have been referring to five KPAs they regard as essential to Local Authorities meeting their responsibilities (Project Consolidate, MTEC3, etc) these are:

- 1. Institutional Transformation and Financial Viability
- 2. Environmental Planning and Management
- 3. Infrastructure Development
- 4. Community Services
- 5. Local Economic Development

The existing and proposed performance indicators for 2009/2010 will be reviewed during the last quarter of the 2008/2009 SDBIP cycle and any amendments will be included in the SDBIP for the Mayor's approval.

Annexure 4 - Disclosure on implementation of the MFMA & other applicable legislation

Municipal Finance Management Act - No 56 of 2003

The MFMA became effective on 1st July 2004. The Act modernises budget and financial management practices within the overall objective of maximising the capacity of municipalities to deliver services.

The MFMA covers all aspects of municipal finance including budgeting, supply chain management and financial reporting.

The various sections of the Act are phased in according to the designated financial management capacity of municipalities. Knysna has been designated as a medium capacity municipality.

The MFMA is the foundation of the municipal financial management reforms which municipalities are implementing. Knysna was designated as a pilot municipality for the reforms and is engaged in a partnership arrangement with National Treasury.

The MFMA and the budget

The following explains the budgeting process in terms of the requirements in the MFMA. It is based on National Treasury's guide to the MFMA.

The budget preparation process

The Mayor must lead the budget preparation process through a co-ordinated cycle of events that commences at least ten months prior to the start of each financial year.

<u>Overview</u>

The MFMA requires a Council to adopt three-year capital and operating budgets that take into account, and are linked to, the municipality's current and future development priorities and other finance-related policies (such as those relating to free basic service provision).

These budgets must clearly set out revenue by source and expenditure by vote over three years and must be accompanied by performance objectives for revenue and expenditure, a cash flow statement and any particulars on borrowings, investments, municipal entities, service delivery agreements, grant allocations and details of employment costs.

The budget may be funded only from reasonable estimates of revenue and cash-backed surplus funds from the previous year and borrowings (the latter for capital items only).

Budget preparation timetable

The first step in the budget preparation process is to develop a timetable of all key deadlines relating to the budget and to review the municipality's IDP and budget-related policies.

The budget preparation timetable is prepared by senior management and tabled by the Mayor for Council adoption by 31 August (ten months before the commencement of the next budget year).

Budget preparation and review of IDP and policy

The Mayor must co-ordinate the budget preparation process and the review of Council's IDP and budget-related policy, with the assistance of the municipal manager.

The Mayor must ensure that the IDP review forms an integral part of the budget process and that any changes to strategic priorities as contained in the IDP document have realistic projections of revenue and expenditure. In developing the budget, the management must take into account national and provincial budgets, the national fiscal and macro-economic policy and other relevant agreements or Acts of Parliament. The Mayor must consult with the relevant district Council and all other local municipalities in that district as well as the relevant provincial treasury and the National Treasury when preparing the budget, and must provide the National Treasury and other government departments with certain information on request.

This process of development should ideally occur between August and November, so that draft consolidated three-year budget proposals, IDP amendments and policies can be made available during December and January. This allows time during January, February and March for preliminary consultation and discussion on the draft budget.

Tabling of the draft budget

The initial draft budget must be tabled by the Mayor before Council for review by 31 March.

Publication of the draft budget

Once tabled at Council, the Municipal Manager must make public the appropriate budget documentation and submit it to National Treasury and the relevant provincial treasury and any other government departments as required. At this time, the local community must be invited to submit representations on what is contained in the budget.

Opportunity to comment on draft budget

When the draft budget is tabled, Council must consider the views of the local community, the National Treasury and the relevant provincial treasury and other municipalities and government departments that may have made submissions on the budget.

Opportunity for revisions to draft budget

After considering all views and submissions, Council must provide an opportunity for the Mayor to respond to the submissions received and if necessary to revise the budget and table amendments for Council's consideration.

Following the tabling of the draft budget at the end of March, the months of April and May should be used to accommodate public and government comment and to make any revisions that may be necessary. This may take the form of public hearings, Council debates, formal or informal delegations to the National Treasury, provincial treasury and other municipalities, or any other consultative forums designed to address stakeholder priorities.

Adoption of the annual budget

The Council must then consider the approval of the budget by 1 June and must formally adopt the budget by 30 June. This provides a 30-day window for Council to revise the budget several times before its final approval.

If a Council fails to approve its budget at its first meeting, it must reconsider it, or an amended draft, again within seven days and it must continue to do so until it is finally approved - before1 July.

Once approved, the Municipal Manager must place the budget on the municipality's website within five days.

BUDGET IMPLEMENTATION

Implementation management - the Service Delivery and Budget Implementation Plan (SDBIP)

The Municipal Manager must within fourteen days of the approval of the annual budget (by 14 July at the latest) submit to the Mayor for approval a draft SDBIP and draft annual performance agreements for all pertinent senior staff.

An SDBIP is a detailed plan for implementing the delivery of municipal services contemplated in the annual budget and should indicate monthly revenue and expenditure projections and quarterly service delivery targets and performance indicators.

The Mayor must approve the draft SDBIP within 28 days of the approval of the annual budget (by 28 July at the latest).

This plan must then be monitored by the Mayor and reported on to Council on a regular basis.

Managing the implementation process

The municipal manager is responsible for implementation of the budget and must take steps to ensure that all spending is in accordance with the budget and that revenue and expenditure are properly monitored.

Variation from budget estimates

Generally, Councils may incur expenditure only if it is in terms of the budget, within the limits of the amounts appropriated against each budget vote – and in the case of capital expenditure, only if Council has approved the project.

Expenditure incurred outside of these parameters may be considered to be unauthorised or, in some cases, irregular or fruitless and wasteful. Unauthorised expenditure must be reported and may result in criminal proceedings.

Revision of budget estimates - the adjustments budget

It may be necessary on occasion for a Council to consider a revision of its original budget, owing to material and significant changes in revenue collections, expenditure patterns, or forecasts thereof for the remainder of the financial year.

In such cases a municipality may adopt an adjustments budget, prepared by the municipal manager and submitted to the Mayor for consideration and tabling at Council for adoption.

The adjustments budget must contain certain prescribed information, it may not result in further increases in taxes and tariffs and it must contain appropriate justifications and supporting material when approved by Council.

Requirements of the MFMA relating to the contents of annual budgets and supporting documentation

Section 17 of the MFMA stipulates that an annual budget of a municipality must be a schedule in the prescribed format and sets out what must be included in that format. In its MFMA circular 28, National Treasury set out detailed guidance on the contents of budget documentation and the supporting schedules. Knysna Municipality has made every effort to comply with the circular.

The following table shows how Knysna Municipality complies with the disclosure requirements of section 17 of the MFMA.

| Requirement | Disclosure in budget documentation |
|---|---|
| Schedule of reasonably anticipated revenue for the budget year from each revenue source | Annexure 1 |
| Schedule showing appropriations of expenditure for the budget year under the different votes of the Municipality | Annexure 1 |
| Schedule setting out indicative revenue per revenue source and projected expenditure by vote for the two financial years following the budget year | Annexure 1 |
| Schedule setting out- | Annexure 1 |
| (i) estimated revenue and expenditure by vote for the current year and | |
| (ii) Actual revenue and expenditure by vote for the financial year preceding the current year. | |
| Draft resolutions - | Section 2 - Budget Related |
| (i) approving the budget of the Municipality | Resolutions |
| (ii) imposing any municipal tax and setting any municipal tariffs as may be required for the budget year and | |
| (iii) Approving any other matters that may be prescribed. | |

| The proposed cost for the budget year to a municipal entity under the sole or shared control of the Municipality of the salary, allowances and benefits of- | Not applicable - no entities as defined by section 1 of the Municipal Systems Act |

| (i) each member of the entity's board of directors and | |
|--|--|
| (ii) the chief executive officer and each senior manager of the entity | |
| Any other supporting documentation as may be prescribed | The supporting documentation as set out in National Treasury's MFMA circular 28 is included in annexure 1. |

Other Legislation

In addition to the MFMA, the following legislation also influences Municipality budgeting;

The Division of Revenue Act 2009 and Provincial Budget Announcements

Three year national allocations to local government are published per municipality each year in the Division of Revenue Act. The Act places duties on municipalities in addition to the requirements of the MFMA, specifically with regard to reporting obligations.

Allocations to the Municipality from Provincial Government are announced and published in the Provincial budget.

Section 18 of the MFMA states that annual budgets may only be funded from reasonably anticipated revenues to be collected. The provision in the budget for allocations from National and Provincial Government should reflect the allocations announced in the DORA or in the relevant Provincial Gazette.

<u>The Municipal Systems Act - No 32 of 2000 and Municipal Systems Amendment</u> <u>Act no 44 of 2003</u>

One of the key objectives of the Municipal Systems Act is to ensure financially and economically viable communities. The requirements of the Act link closely to those of the MFMA. In particular, the following requirements need to be taken into consideration in the budgeting process;

- Chapters 4 and 5 relating to community participation and the requirements for the Integrated Development Planning process.
- Chapter 6 relates to performance management which links with the requirements for the budget to contain measurable performance objectives and quarterly performance targets in the Service Delivery and Budget Implementation Plan.
- Chapter 8 relates to the requirement to produce a tariff policy.

Annexure 5 - Budget 2009/10 to 2011/12; Supporting Information

Budget Process Overview

Political oversight of the budget process

Section 53 of the MFMA requires that the Mayor provides general political guidance over the budget process and the priorities that must guide the preparation of the budget.

Schedule of Key Deadlines relating to budget process [MFMA s 21(1)(b)]

The Act requires the formal budget process to start with the tabling by the Mayor in Council of a schedule showing the key budget deadlines. This was prepared for tabling in Council by the end of August.

Process used to integrate the review of the IDP & preparation of the budget

The budget process is integrated with the review of the IDP through the IDP review mechanism. The outcome of consultation feeding into the IDP review is taken into account in the budget process.

Process for tabling the budget in Council for consultation

A statutory period of consultation followed the tabling of the budget in Council on 26 March 2009. Meetings with the local community were advertised in the local press following the tabling of the 2009/10 draft budget.

The Executive Mayor has considered the outcomes of these consultation meetings and a report detailing the responses was tabled at the same meeting where the budget was tabled for final approval.

Process for approving the budget

The budget must be approved by Council by 31 May.

Process and media used to provide information on the budget to the community

All budget documentation, the MTREF together with tariffs and policies, were made available at Council libraries and offices for inspection. It was also available on Council's website, <u>www.knysna.gov.za</u>.

Advertisements informing the public about the availability of these documents and the schedules for the IDP/Budget public hearings were published in all local newspapers and put up at municipal offices and libraries.

Budget Assumptions

Budgets are prepared in an environment of uncertainty. To prepare meaningful budgets, assumptions need to be made about internal and external factors that could influence the budget. This section provides a comprehensive summary of the assumptions used in preparing the budget.

<u>External factors</u> (population migration, employment, health, development of businesses, and new residential areas, etc)

Over recent years Knysna has experienced rapid population growth. This must be seen against the backdrop of developable land, a sensitive environment and the lack of new jobs being created in the local economy. This presents a serious challenge to Council to improve the efficiency of its urban systems. The unique and sensitive environment of Greater Knysna is under pressure and Council has to manage the growth demands of the economy very rigidly to ensure environmental sustainability.

Data from the Planning & Development Directorate indicates that there may be some slowdown in the growth of development in the Town.

The latest economic data available indicates that the number of employed persons in Knysna increased from 16,125 in 2001 to 26,136 in 2007, while the number of unemployed decreased from 6,467 in 2001 to 4,320 in 2007. Employment grew by 8,38% during the period 2001 to 2007, while the unemployment rate decreased from 28,63% to 14,18% over the same period.

Developing local businesses will be vital to meeting the employment challenges. The Municipality will seek access to advice and finance available through Provincial and National schemes. Furthermore, maximum work opportunities must be extracted from new developments. There will be a specific focus on business opportunities in the townships and Council will specifically encourage and promote local business via its procurement policy.

General inflation outlook and its impact on the municipal activities

In the National Budget Speech of 2009, inflation (CPIX) is estimated at 5,8%, 5,3% and 4,7% respectively for the years 2009 to 2011. In MFMA Circular 48 of 2009, the headline inflation forecast for 2008/09 is estimated at 10,8%, while the inflation for 2009/10 is estimated at 5,4%. In February 2009 the Monetary Policy Committee stated that CPI inflation is expected to decline further and average 7,5% in the first quarter of 2009, and to decline to below the upper end of the inflation target range during the third quarter of the year when it is expected to average 5,2%. Inflation is then forecast to increase again and to breach the upper end of the target range in the first quarter of 2010, mainly as a result of technical base effects. Thereafter inflation is expected to return to within the target range and remain there until the end the forecast period when it is expected to average 5,5%.

The following allowances are included in the operating budget for general inflation over the MTREF period.

| | 2009/10 | 2009/10 | 2011/12 |
|-------------------|---------|---------|---------|
| General inflation | 10,8% | 7,1% | 6,6% |

Interest rates for borrowing and investment of funds

The following assumptions are built into the MTREF;

| | 2009/10 | 2010/11 | 2011/12 |
|--|---------|---------|---------|
| Average Interest Rate - New Borrowing | 14,5% | 15% | 15,5% |
| Average Interest Rate - Investments | 9,5% | 7% | 6% |

Rates, tariffs, charges and timing of revenue collection

The rates, tariffs and charges for the 2009/10 budget are included in annexure 2.

The following table shows the assumed average percentage increases built into the MTREF for rates, tariffs and charges;

| | 2009/10 | 2010/11 | 2011/12 |
|--|----------------|----------------|---------|
| Rates | 7.5% | 7.5% | 7.5% |
| Annual fixed charges - sewer, water & refuse The annual fixed charges on domestic properties are being phased out: | 10% | 10% | 10% |
| RefuseSewer | (50%) (50%) | (50%) (50%) | |
| Water - monthly consumption tariff | 10% | 10% | 10% |
| Electricity – monthly consumption tariff * Average proposed increase. The final increase will be approved by Council following the outcome of NERSA's decision on ESKOM's application for a price increase. | *34% | 30% | 25% |

The cash flow statement in annexure 1 shows when rates and tariffs are expected to be collected over the financial year. In general terms, the timing of rates, tariffs and charges is based on the following;

| Rates and annual charges | Annual and monthly billing in July. Interim billing throughout the year as required. |
|--------------------------|--|
| Consumption Tariffs | Monthly billing. On-going prepayment meters. Seasonal fluctuations. |
| Charges | Generally steady state throughout the financial year with seasonal fluctuations. |

Growth or decline in tax base of the municipality

The buoyancy of the tax base is the main determinant of the affordability of new infrastructure development. Long term financial modelling shows a resource shortfall of about R 1,1 billion in the resources required for infrastructure development over the next 15 years. However, as already mentioned, there is a clear slowdown in the growth of Knysna to the extent that the whole model requires revision which will take place after the credit rating review to be undertaken shortly.

The following assumptions about future growth in the tax base are included in the MTREF:

| | 2009/10 | 2010/11 | 2011/12 |
|---------------------------|---------|---------|---------|
| Growth in tax base- Rates | 0% | 2% | 3% |
| User Charges (%) | 0% | 2% | 3% |

Collection rates for each revenue source and customer type

The Municipality has in place a fair but rigorous credit control policy and has a good record of debt recovery. Furthermore, its policy on indigent support and social rebates means that many households who would normally struggle to pay their accounts receive free or subsidised basic services thereby keeping them free of the burden of municipal debt.

Nevertheless, there will always be an element of the total amount billed that will remain uncollected. The Municipality is the same as any other business in this regard. Adequate provision has to be made in the budget for any bad debts based on assumptions on collection rates.

The following bad debt provisions and collection rates are assumed in the MTREF for rates and tariffs.

| R '000 | 2009/10 | 2010/11 | 2011/12 |
|--|---------|---------|---------|
| Provision for bad and doubtful debts | 12,426 | 13,667 | 15,035 |
| Assumed collection rate (service charges) | 95% | 95% | 95% |
| Assumed collection rate (assessment rates) | 96% | 96% | 96% |

Price movements on specific items

The following amounts are included in the MTREF for increases in the following items:

| R '000 | 2009/10 | 2010/11 | 2011/12 |
|--|---------|---------|---------------|
| Eskom | 69,261 | 92,202 | 119,39490,599 |
| Communications & information technology costs (telephone, licensing, wireless, etc.) | 5,357 | 5,738 | 6,116 |
| Petro SA (refuse removal costs) | 4,058 | 4,347 | 4,634 |
| Vehicle related costs (licensing, maintenance, fuel & oil, etc.) | 7,025 | 7,523 | 8,020 |

Average salary increases

The MTREF includes the following average percentage increases salaries and wages and for Councillors' allowances:

| | 2009/10 | 2010/11 | 2011/12 |
|---|---------|---------|---------|
| Councillors | 13% | 7% | 6% |
| Senior Managers | 11% | 7% | 6% |
| Administrative, professional, technical, clerical & manual | 11% | 9% | 7,5% |
| Medical aid contributions | 15% | 9% | 7,5% |

Industrial relations climate, reorganisation and capacity building

The ability of the Municipality to deliver quality services is dependent on its staff and the ability to provide services to the Knysna population at a viable level. Failure by the Municipality to invest in its staff to ensure that the capacity and skills exist to meet the challenges being faced by Knysna will ultimately mean a failure to deliver services.

The Municipality has made the following amounts available for training over the MTREF period:

| R '000 | 2009/10 | 2010/11 | 2011/12 |
|-----------------|---------|---------|------------|
| Training Budget | 990 | 1,060 | 1,1331,107 |
| Staff Bursaries | 120 | 129 | 137 |

Trends in population and households (growth, decline, stable)

Population growth trends predict a population of 78,000 at the end of the 3 year budget period.

Changing demand characteristics (demand for services)

Knysna has to respond to changing demand for services that can occur through a number of reasons such as population migration, changing demographic profile, technological changes, and major infrastructure development.

The introduction of wireless technology in Knysna has made the internet available to many more people making on-line interaction with the Municipality possible, including the payment of municipal accounts.

The rapid growth of the town in prior years has impacted on the demand for services and challenges the Municipality in how services are delivered.

Trends in demand for free or subsidised basic services

Knysna's criteria for supporting free or subsidised basic services are set out in the indigent support and social rebate policy. The Government allocates revenue via the Division of Revenue Act (DORA) in the form of the Equitable Share Grant with the primary aim of assisting municipalities with the costs of providing free or subsidised basic services. Any costs over and above the Equitable Share allocation are met by the Municipality.

The following table shows the assumed cost of the indigent support and social rebate policy over the MTREF and the amounts allocated to the Municipality through the DORA. The two outer years DORA allocations are indicative.

| R′000 | 2009/10 | 2010/11 | 2011/12 |
|--|---------|---------|---------|
| Cost of rebates | 25,550 | 28,459 | 31,690 |
| Equitable share | 18,849 | 20,956 | 23,208 |
| Utilised for free services | 15,386 | 16,423 | 18,221 |
| Institutional support | 2,670 | 3,687 | 4,048 |
| Contribution to Councillors allowances | 793 | 835 | 885 |
| Amount subsidised by the Municipality | 10,164 | 12,036 | 13,469 |

Impact of national, provincial and local policies

Knysna sees itself as working in partnership with national, provincial and district municipality spheres of Government in meeting the priority service needs of its people.

Ability of the municipality to spend and deliver on the programmes

The following table shows the trend of spending against budget for the capital programme since 2004/05:

| R '000 | 2004/05 | 2005/06 | 2006/07 | 2007/08 | 2008/09 (Estimate) |
|---------------------------|---------|---------|---------|---------|-----------------------|
| Capital Budget (adjusted) | 56,454 | 78,651 | 81,518 | 104,796 | 70,744 |
| Actual Spending | 45,074 | 65,529 | 73,001 | 71,746 | 71,083 |
| % | 80 | 83 | 90 | 68 | 100 |

Spending is monitored closely throughout the year and Directors must ensure that capital schemes are supported by robust planning. The Municipality is continually reviewing its capital planning processes.

The SDBIP includes monthly cash flows of expenditure and is used as the basis for budget monitoring.

Implications of restructuring and other major events into the future

The budget does not include any provision for the establishment of a Regional Electricity Distributor for Knysna as there is still considerable uncertainty as to how and when this would operate.

Allocations Made by the Municipality

Details of allocations made by the Municipality are included in Annexure 1.

The main allocation is to Knysna Tourism which is budgeted to receive R 4 million in 2009/10.

Any allocation made to an outside body must comply with the requirements of section 67 of the MFMA. This stipulates that before transferring funds to an outside organisation the Municipal Manager, as Accounting Officer, must be satisfied that the organisation or body has the capacity to comply with the agreement and has adequate financial management and other systems in place.

Salaries, Allowances and Benefits

Supporting tables 8 and 8a in Annexure 1 (b) summarises the salary, allowances and benefits over the MTREF.

Monthly Cash Flows by source

Supporting table 9 in Annexure 1 (b) shows the monthly cash flow by source. The following table summarises the forecast cash flows by quarter in 2009/10.

| R '000 | Qtr 1 | Qtr 2 | Qtr 3 | Qtr 4 | Total |
|-------------|---------|---------|---------|----------|---------|
| Income | 110,409 | 96,372 | 107,440 | 90,568 | 404,789 |
| Expenditure | 93,688 | 102,508 | 93,894 | 117,814 | 407,904 |
| Net | 16,721 | (6,136) | 13,546 | (27,246) | (3) |

Sources of funding

Supporting table 4 in Annexure 1 (b) shows the current investments.

Interest earned from investments is applied to the income and expenditure account to help fund the operating budget. The following tables summarises the budgeted interest over the MTREF;

| R '000 | 2009/10 | 2010/11 | 2011/12 |
|---------------------|---------|---------|---------|
| Investment Interest | 5,648 | 5,365 | 5,419 |

Contributions and donations

The Municipality can receive contributions from developers to provide infrastructure and other works as part of the conditions of agreeing planning permission.

Sale of assets

The Municipality is in the process of reviewing its land and asset holdings as part of its longer term financial strategy. Major asset sales are therefore, excluded from the MTREF at this stage.

Borrowing

The MFMA prescribes the conditions within which municipalities may borrow through either short or long term debt.

The Act stipulates that short term debt can be used to meet immediate cash flow needs but that it must be fully repaid within the financial year in which it was incurred. Long term debt can only be incurred for capital expenditure or to re-finance existing long term debt. Proposals to incur long term debt must go through a public consultation process.

The cash flow projections will determine the likely need to borrow short term. It is not projected that any short term borrowing will be required over the MTREF period.

The ratios as set out in the liability, investment and cash management policy are used to establish prudential levels of borrowing in terms of affordability and the overall indebtedness of the Municipality.

The legacy of previous years' financial position means that the current outstanding borrowing ratios are at too high a level to allow Knysna to access capital markets for anything other than specific projects.

Based on these measures of affordability, the Municipality has made the following budgeted provisions for new borrowing for capital expenditure over the MTREF.

| R '000 | 2009/10 | 2010/11 | 2011/12 |
|---------------------|---------|---------|---------|
| Long-term borrowing | 14,960 | 13,770 | 9,741 |

Grant allocations

Details of each grant are shown in the schedule that follows:

| | Natio | onal and Provin | cial Condi | itional Grant | Allocations | 2009/10 to 2011/12 |
|---|------------------------|---|----------------------------|--------------------------------|--------------------------------|---|
| Name of Grant | Operating / Capital | Allocating Authority / Department | Amount 2009/10 R'000 | Indicative 2010/11 R'000 | Indicative 2011/12 R'000 | Purpose of the Grant |
| Integrated housing and human settlement development | Operating Capital | Province/ Local Government and Housing | 11,997 20,000 | 15,043 23,000 | 20,181 25,000 | To finance the funding requirements of national housing programmes (excluding recurrent costs recoverable from assets falling under the pre-1994 stock). |
| grant | | | | | | To facilitate the establishment and maintenance of integrated and sustainable human settlements to ensure economically viable and socially equitable communities in areas with ecological integrity promoting convenient and safe access to economic opportunities, health, educational and social amenities. |
| Library Services | Operating | Province/ Cultural Affairs and Sport | 360 | 450 | 518 | To enable public libraries to render an improved service by addressing staffing shortages. |
| Community Development Worker | Operating | Province/ Local Government and Housing Vote | 72 | 75 | 78 | To provide financial assistance to municipalities to cover the Operating costs pertaining to the functions of the community development workers including the regional coordinators. |
| Maintenance of Proclaimed Roads | Operating | Province/ Transport and Public Works | 70 | | | To provide routine maintenance and/or resealing on proclaimed roads (National Roads) |

| Name of Grant | Operating / Capital | Allocating Authority / Department | Amount 2009/10 R'000 | Indicative 2009/10 R'000 | Indicative 2011/12 R'000 | Purpose of the Grant |
|--|------------------------|--|----------------------------|--------------------------------|--------------------------------|---|
| Local Government Financial Management Grant (FMG) | Operating | National / National Treasury (National Vote 7) | 1,000 | 1,000 | 1,250 | To promote and support reforms in financial management by building the capacity in municipalities to implement the Municipal Finance Management Act. |
| Municipal Systems Improvement Programme Grant (MSIG) | Operating | National / Provincial and Local Government (National Vote 29) | 500 | 750 | 840 | To assist municipalities in building in-house capacity to perform their functions and stabilise institutional and governance systems. |
| Municipal Infrastructure Grant (MIG) | Operating Capital | National / Provincial and Local Government (National Vote 29) | 600 14,287 | 750 16,663 | 900 14,049 | To supplement capital finance for basic municipal infrastructure for poor households, micro enterprises and social institutions. The operating portion is utilised for the Project Management Unit. |
| Integrated National Electrification Programme (INEP) | Capital | National / Minerals and Energy (National Vote 28) | 1,108 | 500 | 5,000 | To implement the Programme by providing capital subsidies to municipalities to address the electrification backlog of permanently occupied residential dwellings, the installation of bulk infrastructure and rehabilitation and refurbishment of electricity infrastructure in order to improve quality of supply. |

| Name of Grant | Operating / Capital | Allocating Authority / Department | Amount 2009/10 R'000 | Indicative 2009/10 R'000 | Indicative 2011/12 R'000 | Purpose of the Grant |
|--|------------------------|--|----------------------------|--------------------------------|--------------------------------|---|
| Neighbourhood Development Partnership Grant (NDPG) | Capital | National / National Treasury (National Vote 7) | 5,000 | 3,557 | 5,410 | To provide municipalities with technical assistance to develop appropriate project proposals for property developments in underserved neighbourhoods and new residential neighbourhoods and to provide for the construction or upgrading of community facilities for neighbourhood developments and/or renewal projects that attract private sector funding and input where appropriate |
| Equitable Share | Operating | National / Provincial and Local Government | 18,849 | 20,956 | 23,208 | |

Annexure 6 - Budget Related Policies

The detailed policies are not included in this budget documentation. However they are available at the Council offices in Clyde Street for viewing as well as on the Internet at <u>www.knysna.gov.za</u>. This section gives a broad overview of the budget policy framework and highlights the amended policies to be approved by Council resolution.

| Name of Policy | Туре | Date of Council adoption (if already done) | Purpose / Basic areas covered by Policy | Summary of changes | Responsible Manager |
|---|------------------|---|---|---|------------------------|
| REVENUE | RELATED | | | | |
| Tariff | Amended | 29 May 2008 (with previous budget) | Setting criteria for establishing service tariffs | Change in tariff structures for solid waste, waste water and water annual basic charges for domestic properties. | Walter McCartney |
| Rates | Amended | 29 May 2008 (with previous budget) | Setting criteria for establishing rates tariffs | Reclassification of: (i) accommodation establishments into major (being greater than 8 bedrooms) and minor (being up to 8 bedrooms); (ii) Agricultural properties not used for bona fide farming purposes to be treated as domestic with a phase-in rebate; (iii) Amendment to private nature reserve rebates. | Grant Easton |
| Credit control | Amended | 29 May 2008 (with previous budget) | Principles and guidelines to be followed with respect to arrear consumer debt control | Additional procedures on arrangements, cost recovery, priority allocation of part payments | William Fillies |
| Revenue collection | No formal policy | n/a | n/a | | William Fillies |
| Indigent support & social rebate | Amended | 29 May 2008 (with previous budget) | Guidelines and procedures for the subsidization of rates and basic services to indigent households | Amendment of policy principles, definitions, qualifying criteria and application process; differentiation between indigent support and social rebates. | William Fillies |

| BUDGET ANI | D EXPENDIT | TURE | | | |
|--|------------|--|---|---|---------------------|
| Liability, investment & cash management | Amended | 29 May 2008 (with previous budget) | Guideline of procedures to be followed when investing or lending money | Review of institutions that may be used | Walter McCartney |
| Virement | Amended | 29 May 2008 (with previous budget) | Sets out guidelines and procedures to be followed when transferring budget savings between votes | Votes amended to reflect directorate mapping & review of authorised vote holders | Walter McCartney |
| Supply chain management | Existing | 29 May 2008 (with previous budget) | Dictates procedures for the procurement of goods and services | n/a | Marie Brand |
