Implementation Guideline for bow hunting in the Western Cape Province: December 2011

Introduction

In terms of section 29(i) of the Western Cape Nature Conservation Ordinance, No. 19 of 1974 ("the Ordinance"), hunting a wild animal in the Western Cape Province by means of a bow and arrow is a prohibited hunting method. CapeNature, however, accepts that the bow hunting industry is growing and there is a demand for hunting opportunities to practise this growing sport. In addition to the growth in the industry, the technological development of bow hunting equipment has radically increased the effectiveness of bow hunting.

Furthermore, the National Environmental Management: Biodiversity Act, No. 10 of 2004: Norms and Standards for hunting methods in South Africa ("Norms and Standards") makes provision for hunting by means of a bow and arrow. In accordance with this, CapeNature therefore is suspending the provisions of section 29(i) of the Nature Conservation Ordinance subject to the provisions of the Norms and Standards.

Guiding Principles

Bow hunting in the Western Cape Province is guided by the following principles, namely—

(a) ecologically sustainable utilisation of natural resources to maintain viable populations of indigenous species and their environments;

(b) encouraging co-operation between landowners, bow hunters, related industries and local communities in managing the off-take of indigenous species within limits that are not detrimental to the survival of the species;

(c) promoting the development of the competence and responsibility of bow hunters;

(d) promoting responsible bow hunting; and

(e) ensuring that this policy is realistic, implementable and understandable.

Applicability

These principles and minimum requirements are applicable to all bow hunting on private land within the Western Cape Province. Bow hunting is also, amongst others, subject to hunting licenses or permits, hunting seasons, daily bag limits and written permissions as stipulated in the Ordinance.

Permissible bows for bow hunting

Only bows that are stipulated in the Norms and Standards may be used to hunt in the Western Cape Province.

Minimum requirements for bow hunting

(1) The minimum requirements to hunt specific categories of wild or alien animals by means of bow and arrow are the following—

(a) For wild or alien animals of a small size, including gamebirds, small carnivores, hares, hyraxes, rabbits and pygmy antelope, the-

(i) kinetic energy should not be less than 30ft/lbs; and

(ii) arrow weight should not be less than 300 grains;

(b) For wild or alien animals of medium size, including reedbuck, impala, blesbok, warthog, bushpig, springbuck and nyala, the-

(i) kinetic energy should not be less than 50ft/lbs; and
(ii) arrow weight should not be less than 380 grains;
(c) For wild or alien animals of large size, including wildebeest, kudu, gemsbok, zebra, waterbuck, sable and hartebeest, the-
(i) kinetic energy should not be less than 60ft/lbs; and
(ii) arrow weight should not be less than 415 grains;
(d) Cape buffalo, the
(i) kinetic energy should not be less than 80ft/lbs; and
(ii) arrow weight should not be less than 750 grains; and
(e) Giraffe, the-
(1) kinetic energy should not be less than 90ft/lbs; and
(ii) arrow weight should not be less than 750 grains.

(2) In addition to the requirements contemplated in sub-paragraph (1) the following conditions apply with regards to the use of mechanical broad heads—
(a) for species contemplated In sub-paragraphs (1)(a), (1)(b) and (1)(c), 5% additional kinetic energy is required;
(b) broad heads must have at least two cutting edges; and
(c) the minimum permitted arrow length is 50cm.

Implementation and enforcement

Only bows and arrows permissible and meeting the minimum requirements for bow-hunting in terms of the Norms and Standards may be used.

Only species listed in the annual hunting notice **for which section 29(i) has been suspended** may be hunted with a bow and arrow.

The use of any other equipment (e.g. crossbows etc.) or method, which does not comply with or conform to the requirements as set out in the Norms and Standards are **not exempt.**

Over and above the animals **already listed in the Norms and Standards** the following definitions apply as a guideline:

ANIMALS OF SMALL SIZE = Any animal with an adult body weight (live) of 20kg or less

ANIMALS OF MEDIUM SIZE = Any animal with an adult body weight (live) of 20kg-100kg

ANIMALS OF LARGE SIZE = Any animal with an adult body weight (live) of 100kg and heavier
