

Stay safe and alive 365 - **Better Together.**

Never cross a freeway, always use a pedestrian bridge or a subway.

Be sober when you walk near traffic. You are more likely to get injured or killed if you have been drinking or using drugs.

When you are near parked cars, be alert to sounds and signals that a vehicle is about to start moving.

Always make eye contact with drivers when crossing streets.

Look right, left, and right again before crossing a street. Keep watching as you cross.

PEDESTRIAN SAFETY

PEDESTRIAN SAFETY

Find the safest place to cross a road. Use subways, traffic lights, footbridges and zebra crossings if possible. Crossing points controlled by police, traffic officers and school crossing patrols are also safe.

Always walk on the pavement. If there is no pavement, walk on the edge of the road where you can face oncoming traffic. Keep as far out of the way as possible.

Even if you are crossing at a safe place, remember that drivers may not stop when they should. Look before you cross the road. Drivers may be distracted by cell phones or conversations with passengers. They may have been drinking or taking drugs.

Cross streets at a corner, using traffic signals and crossings. Remember that drivers might not give pedestrians right of way.

Don't use your cell phone, your earphones or your headphones when you cross a road.

Wear bright colour or reflective clothing if you are walking near traffic at night.

Cross at a place where you can see clearly in all directions, and where drivers can see you.
