FOR YOU

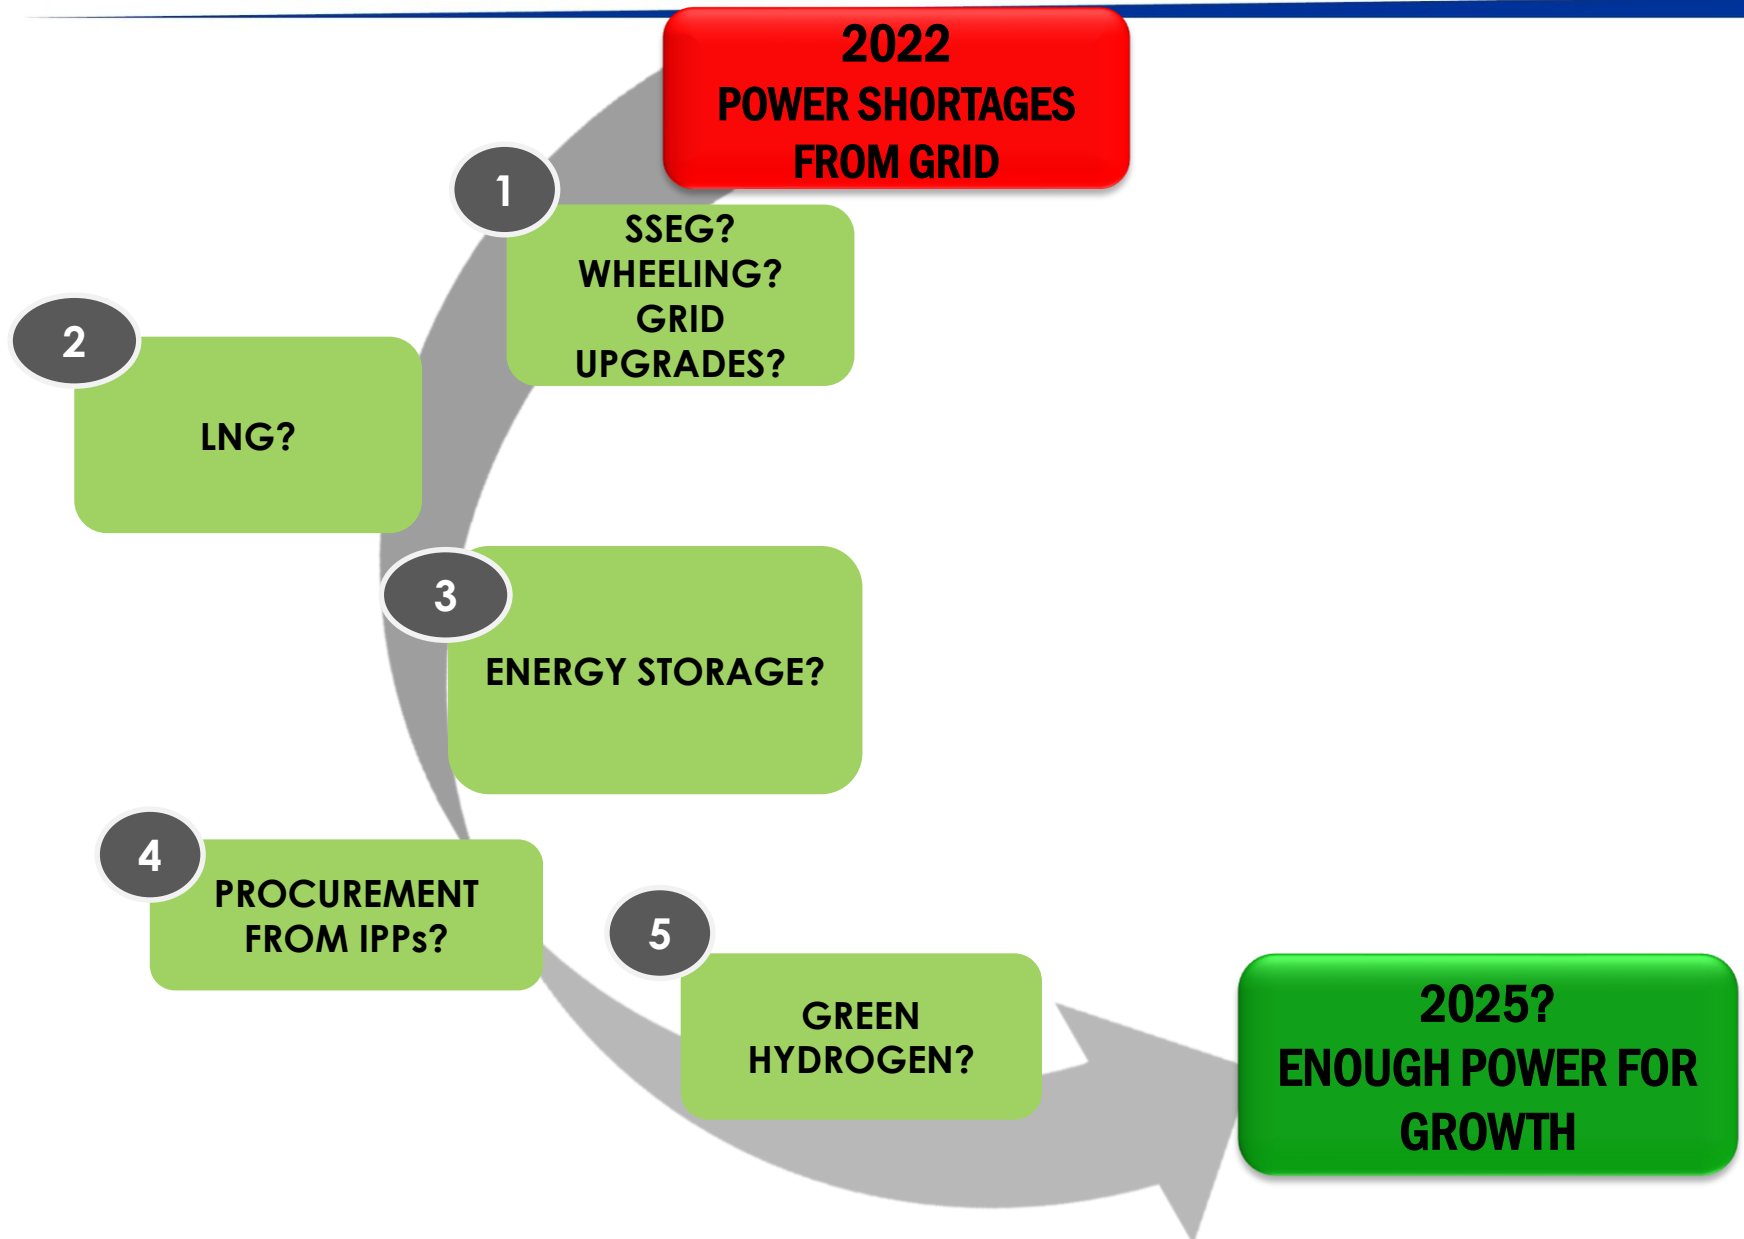

Mapping our Energy Pathway: *Western Cape Energy Workshop*

27 July 2022

Western Cape Energy Journey, 2015-2022

Where to from here?

Workshop Objectives

To gain an understanding of:

- the current energy environment internationally and in South Africa, inclusive of technological advancements, potential of various energy sources, and regulatory environment
- an understanding of current WCG, national, municipal and private sector energy initiatives

Building on the above, to provide inputs into a **clear future energy pathway for the Western Cape: which energy interventions should the WCG, municipalities, the private sector, and others continue with, scale up, stop or initiate in the next five years?**

Thank you
