

# STOP THE GUZZLERS. SAVE ELECTRICITY AND WATER AT WORK AND AT HOME.

Invest in a solar water heater or geyser blanket and lower your geyser temperature to 60°C.

Collect water for reuse elsewhere in your home.

Flush using recycled water and only when necessary.

Catch overflow shower water in a bucket and use it to flush your toilet.

Take a 2-minute shower instead of a bath.

Reduce excessive heating. Wear warmer clothes instead.

Dry laundry using sunshine whenever possible. For rainy days, use drying racks indoors.

Switch off appliances and chargers if you are not using them.

Be aware of water restrictions.

Only wash full sink loads and reuse the grey water in your garden.

Keep your fridge cold by minimising the number of times you open the door.

Let the sunshine in during the day and close curtains and blinds to retain heat during the night.

Switch to longer lasting energy-saving LED lightbulbs. Always switch off lights when you leave the room.

Boil only as much water as you need.

Only wash full loads and use a cold water setting.

Capture rain water for reuse in your home.
