

Dear Principal/Teacher/Tutor,

OLICO Maths Education, in conjunction with the After School Game Changer invites you to join the **2019 Times-Table Challenge**. This challenge is open to all Grade 6-9 learners from schools in the Western Cape. The Times-tables Challenge is designed to help your class get on top of their times-tables.

Over 10 weeks, learners will work together to develop the fluency that is essential for more complex high school mathematics. Prizes will be awarded for the highest percentage of fluency in a class and individual learners will participate in an inter-school final at UWC.

Registration:

Step 1: A teacher/tutor signs-up at learn.olico.org.

Step 2: Will send you the logins for the learners

Step 3: Learners participate in the challenge and score points for their class.

School Finals: School finals will take place at each of the participating schools to allow the school to select 2 learners per grade to send to the finals.

Grand Finale: The grand finale will be run at the University of the Western Cape on 14 September 2019. Learners will compete in their grades and prizes will be awarded to the fastest learners. The tournament will be a sudden death tournament.

Class Prizes: Prizes will be awarded to classes in which the greatest proportion of learners are fluent in their times-tables. The prizes will be a class pizza/cake/chocolate party.

Individual Prizes: Prizes will be awarded to the fastest learners who stand a chance to win scientific calculators, airtime, stationery packs and bragging rights.

More details will be included in the teacher/tutor instructions at sign-up.

Sign UP TODAY at learn.olico.org or contact Andrew at learn@olico.org for more info.

The OLICO Team.
