

This is how we're making learning safer for our children

During school

Our Safe Schools programme works with schools to develop and implement school safety plans. These include access control, security systems, emergency procedures and youth development support.

Before school

The Walking Bus initiative sees members of the community volunteering to walk children to and from school. Groups meet up with each other at specified points on route to the school.

After school

We aim to provide learners from no-fee schools with access to safe, quality sport and recreation, academic support, arts and culture, and life skills programmes.
