HEALTH WORKER COVID-19 VACCINE SURVEY

The national Department of Health is pleased to announce that the link for the Health Worker COVID-19 Vaccine Survey is now live at https://bit.ly/HWCOVAX.

The survey will be out for a short time (seven days only) and we need to get it out to as many people as possible - please share the link widely as soon as possible.

With the upcoming rollout of the vaccine programme, the survey will help us understand what healthcare workers think and feel about the vaccine - it is an opportunity to address questions and concerns.

Success depends on the link being widely circulated and promoted, and quick uptake. Please urge health worker colleagues to take this opportunity to give feedback!

Thank you
