

HOSPITAL PAEDIATRIC CLINICAL RECORD

Hospital sticker / Name and Number

ADDRESS _____

DATE OF FIRST VISIT/ADMISSION: / /

SOCIAL INFORMATION

	Name	Health status	Employed?	Telephone
Primary Caregiver	_____	_____	_____	_____
Mother (if not caregiver)	_____	_____	_____	_____
Father	_____	_____	_____	_____
Number of siblings	_____	Basic Genogram/Household structure		
Housing (circle)	Formal / Informal			
Water supply	Not piped / Piped outside / Piped inside			
Electricity	Yes / No			
Crèche / School	_____			
Social grant	_____			

Nutrition and Growth		Update 1		Update 2	
Date	Status	Date	Status	Date	Status
/ /		/ /		/ /	

Categories: Overweight/Obese, Normal, Underweight, Malnourished (Moderate or Severe), Short stature, Growth Faltering

HIV Status (Circle as appropriate)

<u>Maternal status:</u>	Unknown	Negative	Infected	CD4 count _____	On ART
<u>PMTCT</u>	Not applicable	Antenatal	Perinatal	Neonatal	
<u>Feeding:</u>	Breast	Formula	Mixed		
<u>Child</u>	EXPOSED	Yes / No			
	TESTED	Yes / No			
	INFECTED	Yes / No			
<u>Treatment</u>	Cotrimoxazole	Yes / No			
	ART	Yes / No / Pending	Regimen:	First line / Second line / Other	

Measles Status

Measles immune? Yes / No

(i.e. 2 vaccine doses given after 6m of age)

Tuberculosis	Ever Exposed?	Yes / No	Positive skin test (ever)	Yes / No / Unknown
	Y / N / Uncertain	Treated when?	INH proph? Y / N	When?

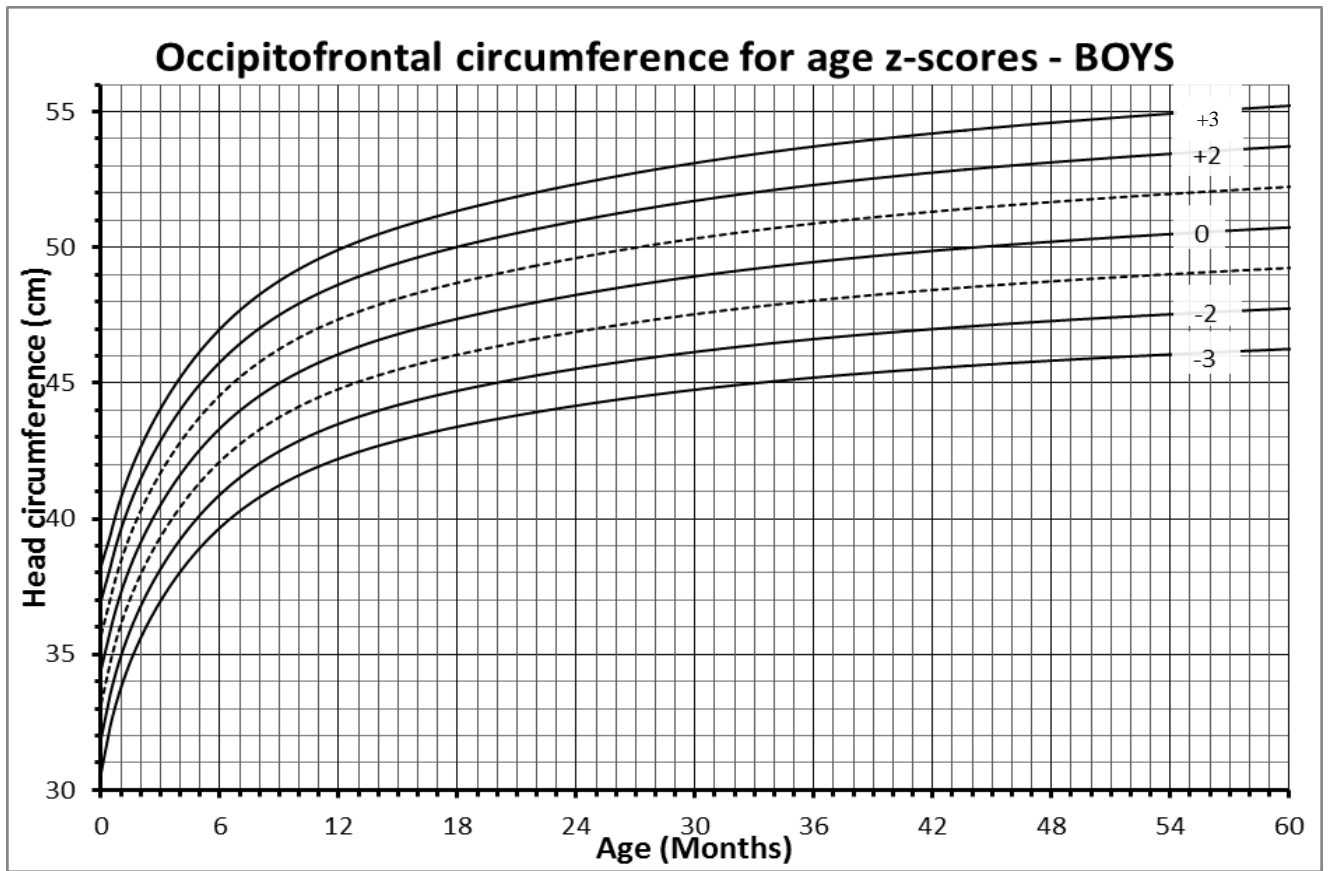

Chart B2

(PLACE STICKER HERE)

DEVELOPMENTAL MONITORING CHART*Circle where a milestone is achieved by the expected age*

Age	Fine Motor/Vision/ Adaptive	Communication/ Hearing	Motor	Warning signs
14 weeks (3 months)	Fixes and follows 180 degrees Smiles Pulls at clothes Hands loosely open	Coos and chuckles Quiets to familiar sounds	Pull-to-sit: little/no head lag Prone: lifts head Moro reflex disappearing	Floppy (++Head lag) Asymmetry of tone or movement No response to sound Absent vocalization No visual fixation
6 months	Voluntary reach and grasp Transfers objects between hands	Laughs Vowel-type babbling Turns to mother's voice across room	Pulls to sit (braces) Prone: lifts chest and shoulders	As above
9 months	Points Pincer grasp Holds small object in each hand	Deliberate vocalisation Babbles Imitates sounds Understands "bye" and "no"	Sits without support Crawls Pulls to stand	Unable to sit Hand preference Fisting Squint Persisting primitive reflexes Monotonous vocalisation
18 months	Holds pen (palmar grasp) and scribbles	Say some 2 word phrases Understand simple commands (without hand gestures)	Walks well (arms down) Throws ball Climbs onto adult chair	Not walking No pincer grasp Unable to understand simple commands No words Mouthing
24 months	Spoon feeds well *Imitates vertical line Hand preference usually present	Speaks in short phrases *Identifies 5 body parts (points) Obey "Put the pen on the table"	Runs Up and down stairs (2 feet) Kicks ball	As above
36 months	Copies circle Able to dress with supervision Wash and dry hands Toilet trained	Able to talk in full sentences Knows name, age; points to 5 colours Rote count to 3	Can pedal Walks on tiptoe Throws and kicks ball	As above + Single words only Echolalia Failure to attain 36 month milestones
48 months	Eats with spoon and fork Copies cross Play with imagination (make believe)	Knows full name, address, age, names colours Speech intelligible	Stairs: 1 foot per step (no handrail) Hops on preferred foot	Speech difficult to understand (non-family) Failure to attain 48 month milestones
5-6 years	Copies a triangle and square Draws a man	Tell a story / sequence of events Understands concepts – cold, tired, hungry (Ask "what should a person do if they are cold?")	Walks easily on narrow line (heel-to-toe) Hops on each foot	As above+ Clumsy Poor posture Poor pencil grip Failure to attain milestones

[Do a more detailed assessment if any milestone has not been achieved by the age in the table, or if there are warning signs. If appropriate, refer to an appropriate therapist or senior paediatric doctor for further assessment.]

Discharge checklist

to confirm action taken (or to show action not taken and note why not)

- Entry made in Road to Health Booklet
- Notified diseases (esp TB and malnutrition)
- All vaccines up to date
- Feeding method confirmed: _____
- Vitamin A given
- Iron supplementation if there is microcytic anaemia
- Appointment made for follow-up clinic(s) (dates)
- ___/___/___
- ___/___/___
- Appointment details explained to caregiver
- Medications explained to caregiver
- Discharge letter filled in (Note discharge weight)
- Discharged ___/___/___ by (name, signature).....
- Problem list on Front Page updated

TB
→

- Caregiver has seen Social worker
- Caregiver has seen Dietician
- Social Grant status checked
- Albumin checked
- NTP referral done
- Zinc supplementation
- CD4 count known in the last 6 months (if > 1 year, not on ART)
- PJP prophylaxis
- Micronutrients prescribed as required
- Caregiver counselled at ARV clinic
- Caregiver has opened a folder and has follow up date
- If on life long ART, caregiver has seen ARV doctor
