

SITUATIONAL AWARENESS

Comprehension of current situation

- Do you actually understand what is going on?
- Are you sure?
- What dangerous or hazardous elements are in proximity?

Projection of future status

- Will the situation change suddenly?
- What foreseeable occurrences could be hazardous?
- What elements may cause a change in the incident?

State of the environment

- Look around, look at the facts on the ground.
- Be aware, do not become complacent.
- Remember every incident or situation is different.

Perception of elements

- Be aware that what you perceive may not be correct.
- Challenge your and double check other's perspective.
- Avoid tunnel vision.

LOOK UP, LOOK DOWN, LOOK AROUND
