ACRONYMS

CETC	Community Education and Training College
DBE	Department of Basic Education
DHET	Department of Higher Education and Training
DTIC	Department of Trade, Industry and Competition
ECD	Early Childhood Development
HET	Higher Education and Training
HEQC	Higher Education Quality Council
HRD	Human Resource Development
HRDC	Human Resource Development Council
HRDS-SA	Human Resource Development Strategy of South Africa
MSP	Master Skills Plan
M&E	Monitoring and Evaluation
NAMB	National Artisan Moderating Body
NDP	National Development Plan
NEETs	Not in Employment, Education and Training
NQF	National Qualifications Framework
NSC	National Senior Certificate
NSDP	National Skills Development Plan
PIRLS	Progress in International Reading Literacy Study
QCTO	Quality Council for Trades and Occupations
SACE	South African Council of Education
SAQA	South African Qualifications Authority
SETAs	Sector Education and Training Authority
TIMSS	Trends in International Mathematics and Science Study
TSM	Three Stream Model
TVET	Technical and Vocational Education and Training
TWG	Technical Working Group

1. MASTER SKILLS PLAN

This section situates the Master Skills Plan in the wider human resource development discourse.

1.1 About the Master Skills Plan

The Master Skills Plan (MSP) is an all-encompassing response by the social partners to ensure an adequate human resource pool to meet South Africa's fledging socio-economic needs and address skills supply and demand imbalances in the labour market. It is also the implementation plan of the reconceptualised Human Resource Development Strategy of South Africa (HRDS-SA) - "two sides of the same coin."

1.2 Vision

"Educated, skilled and competent individuals who contribute positively to their communities and the nation."

1.3 Mission

"To create a more coordinated, effective, and efficient HRD system in South Africa that supports economic growth, reduces inequality, and improves the quality of life for all individuals."

1.4 Theme

"The goal is one country, one strategy, one plan."

1.5 Background

The Inter-Ministerial Committee on Science and Innovation in 2022 requested a Concept Note to develop a country-wide Master Skills Plan. The Committee recommended that the MSP be integrated with and serve as the implementation plan of the reconceptualised HRDS-SA.

Subsequently, the Higher Education, Science and Innovation Portfolio Committee expressed the urgency to develop the MSP given the current unemployment situation, the government's considerable education and training investments, and the need to reshape curricula to respond to changing skills needs, driven by rapid technological advancements, and prevailing skills shortages in the labour market.

1.6 Rationale

Now, more than ever, South Africa needs a paradigm shift in human resource development to address myriad challenges and opportunities:

Unemployment, Poverty and Inequality: Despite fiscal distribution policies, an expansive social safety net, active labour market policies, and considerable public education investments, South Africa faces mounting socio-economic pressures. The official unemployment rate is 32.6%, and expanded unemployment is 42.1%. Youth aged 15-24 and 25-34 recorded the highest unemployment rates of 60.7% and 39.8. The Gini Coefficient is 0.63,¹ the highest in the developing world. Approximately 30.3 million people (55.5%) are living in poverty at the national upper poverty line (R992), while 13.8 million people (25%) are experiencing food poverty.

COVID-19: The COVID-19 impact on schooling has been devastating, leaving learners between three-quarters and a full school year behind. About 400 000 to 500 000 learners have reportedly dropped out of school since the pandemic. The pandemic exposed the extreme digital divide in schooling. The private and wealthier schools managed to continue teaching with online resources, while children in poorer communities needed to be included.

Fourth Industrial Revolution: In a technology and innovation-driven world, the role of skills development in propelling our nation forward cannot be overstated. There system must massify the digital skills revolution and reduce the digital divide by empowering women, youth and people with disabilities, with special attention to underserved rural communities to enable them to participate meaningfully in the digital economy. Equally, upskilling must prepare our students and workforce for the high-tech jobs of the future.

Just Energy Transition: South Africa aims to transition to a low-carbon economy to drive sustainable growth, preserve the environment, advance social development, and create an inclusive society. The Just Energy Transition (JET) is expected to yield 815 000 new jobs up to 2050. A potential growth point is green hydrogen technologies, innovation, and the skills needed to grow the green hydrogen economy. Therefore, a coordinated and integrated plan is needed to support skills development, utilisation, and anticipation for the JET.

Proliferation: South Africa is certainly not without skills development plans. It is overlaid with industry master plans, economic recovery plans, Presidential job plans, sector skills plans, school plans, post-school education and training plans, and national, provincial, metropolitan and municipal plans. Hence, there is a need for an overarching MSP that streamlines the efforts of all role-players in the skills ecosystem.

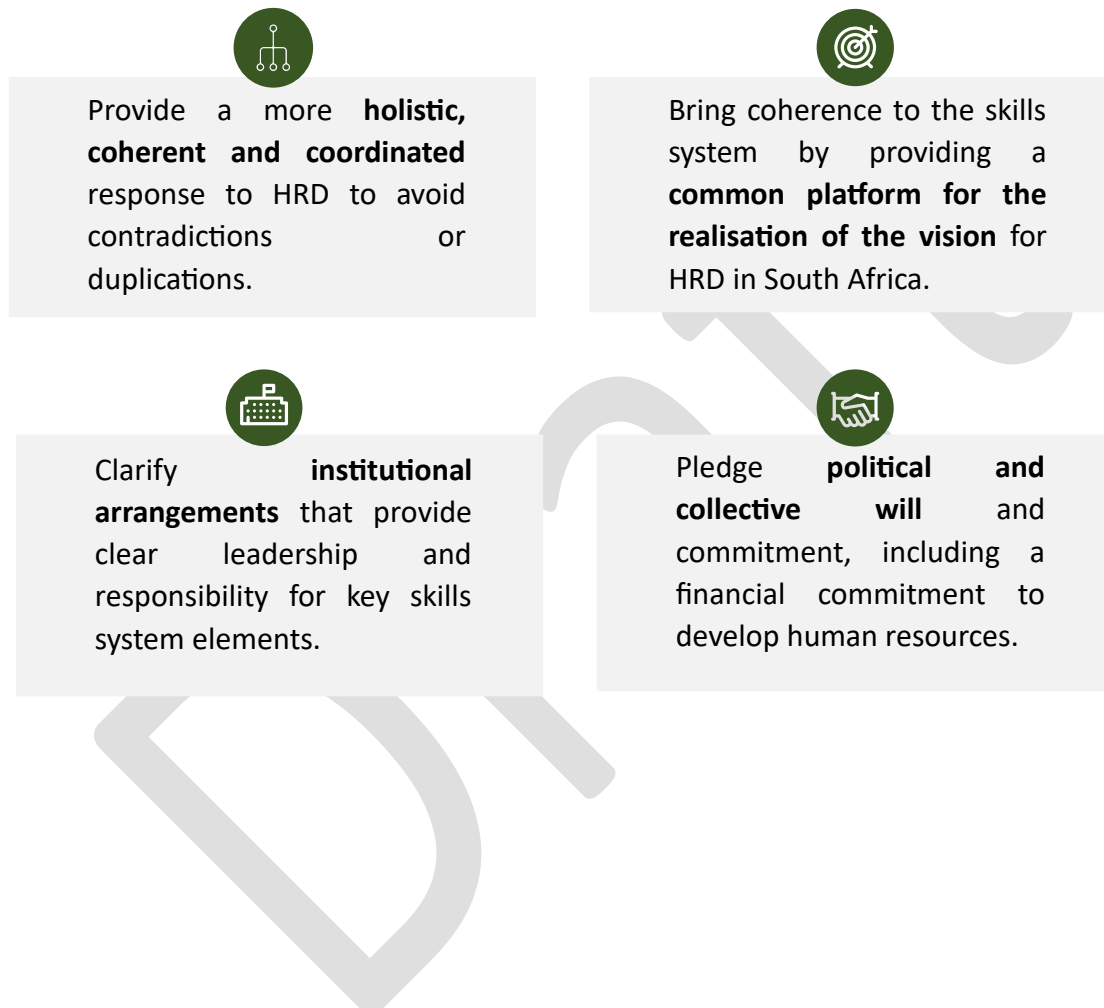

Inefficiencies: There are skills planning inefficiencies, slow delivery, fragmentation, and overreach. The Human Resource Development Council (HRDC) mentions that duplicity in the HRD system has resulted in overlaps, resource wastage, different institutions funding the same programmes, spreading resources thinly, and ineffective monitoring and evaluation. The

¹ <https://www.statista.com/outlook/co/socioeconomic-indicators/economic-inequality/south-africa>

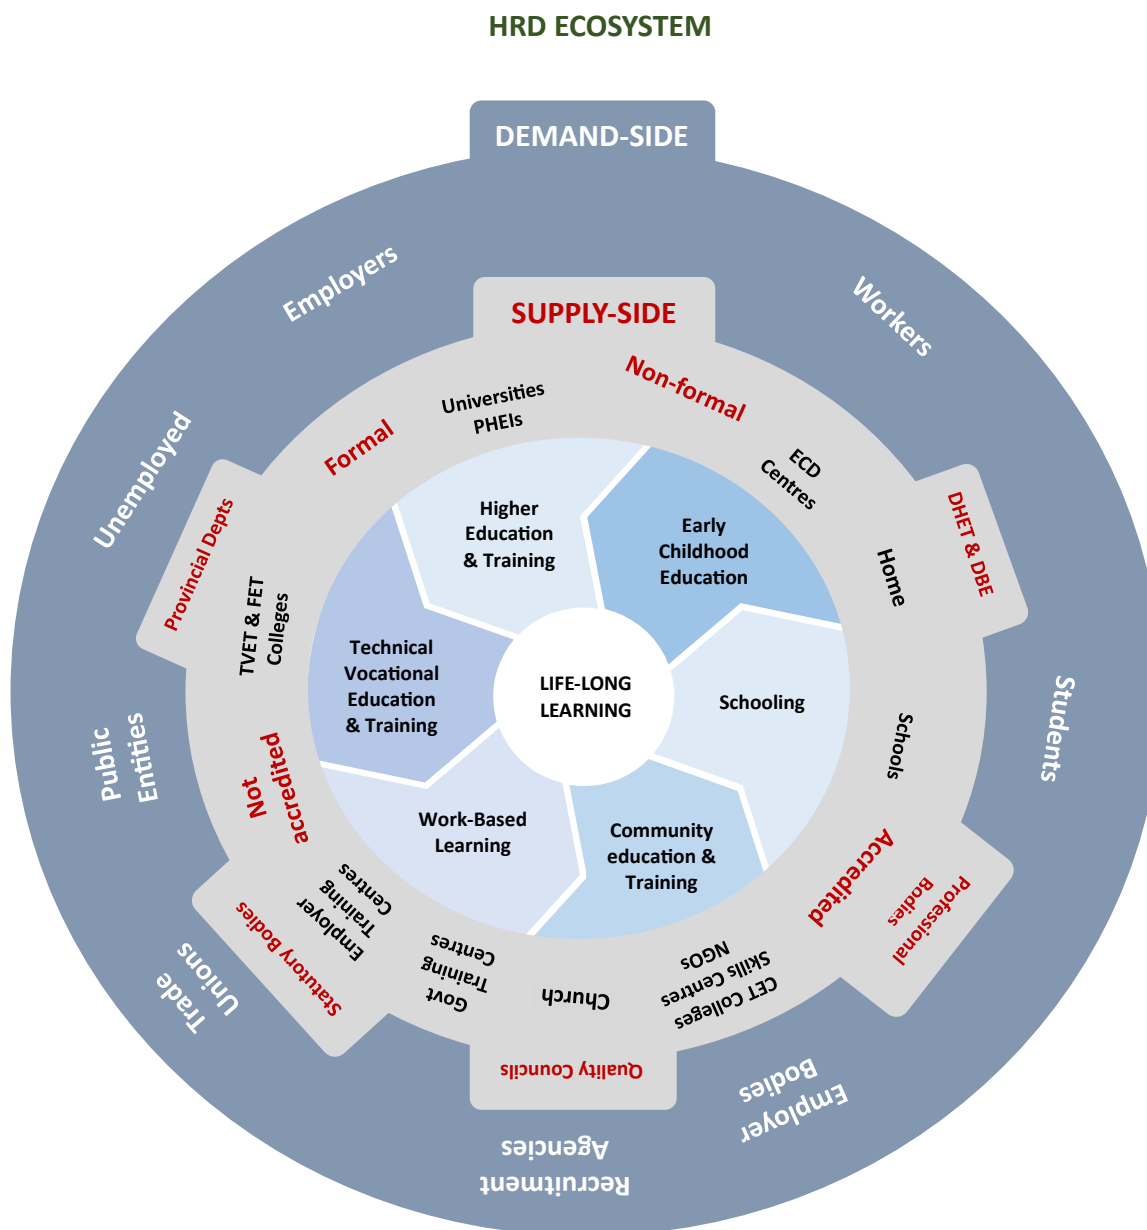

Human Sciences Research Council argued that the sprawl of regulatory institutions, over-regulation and bureaucratisation impedes rather than facilitates skills delivery. Therefore, better coordination across the skills system is a priority.

1.7 Aims

The MSP is intended to:

1.8 The HRD ecosystem

- HRD refers to all forms of knowledge, education and skills acquisition. It occurs in any interactive human setting. HRD is formal, in-formal and non-formal, and accredited and non-accredited. There are short courses, formal qualifications, and emerging formats such as online, blended and micro-credentialing.
- The scope of coverage includes early childhood development, basic education, community education and training, technical vocational education and training, higher education and training, and workplace skills training.

- The HRD ecosystem covers the economy's skills supply and demand sides. The former consists of ECD Centres, homes, NGOs/CBOs, schools and PSET education institutions, which are non-profit, public and private.
- Statutory bodies comprise quality Councils (SAQA, UMALUSI, HEQC and QCTO), SETAs, SACE (schooling), and NAMB. It also includes professional bodies (e.g. Welding Institute).
- The main demand-side organisations are the social partners (state, employer bodies, trade unions, and civil society).
- It includes different economic sectors, government tiers, employers from corporates to micro-enterprises, individual workplaces, diverse educational institutional types, and civil society organisations.
- It combines these diverse HRD streams into a coherent whole for better coordination, collaboration and implementation.
- The Plan enables access to learning for people to have completed their studies, have not completed their studies, or never attended school, regardless of age, gender, race, location, and socio-economic background.
- The MSP does not focus solely on skills development for the economy. It is also about developing individuals politically, socially and culturally to participate fully in society.
- The MSP is the key enabler for improving the lives of millions of people.

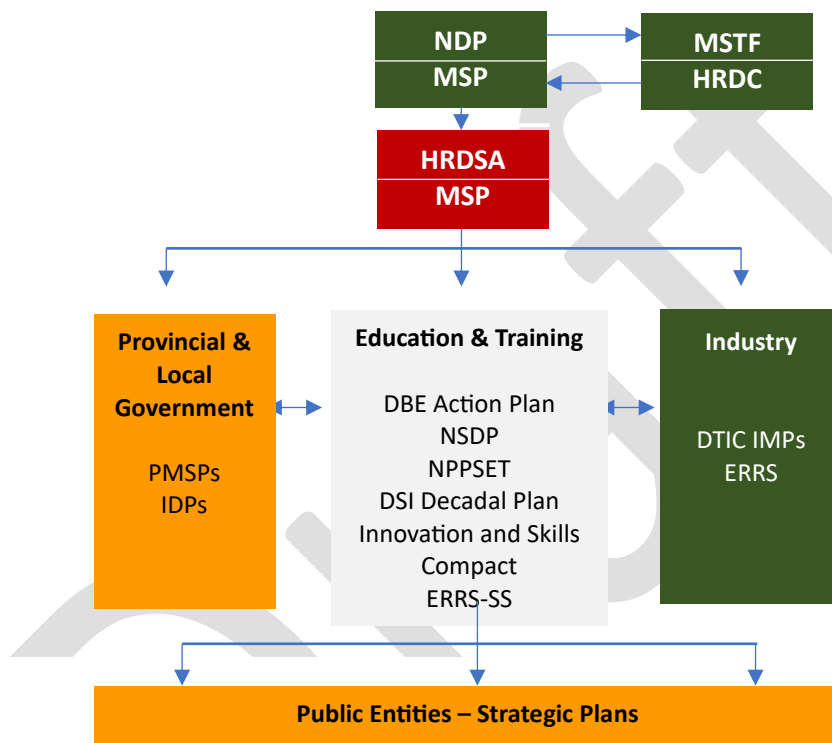

1.9 The Skills Planning Hierarchy

The MSP brings together existing plans that impact skills development in the country. These include, but are not limited to:

- *National Development Plan (NDP) 2030*
- *Medium-Term Strategic Framework (MTSF) 2019-2024*
- *Human Resource Development Strategy of South Africa (HRDSA) 2024-2034*
- *Master Skills Plan (MSP) 2024 - 2030*
- *Action Plan 2024 – towards the realisation of schooling 2030*
- *National Skills Development Plan (NSDP) 2030*
- *National Plan for Post-School Education and Training (NPPSET) 2021-2030*
- *Science, Innovation and Technology Decadal Plan 2021-2031*
- *Innovation and Skills Compact*
- *Skills Strategy: Support for the SA Economic Reconstruction and Recovery Plan (ERRS-SS)*

- *SETA Sector Skills Plans (SSPs) 2000-2025*
- *DTIC Industry Master Plans (IMPs)*
- *Economic Reconstruction and Recovery Plan (ERRS)*
- *Provincial Master Skills Plans (PMSPs)*
- *Municipal Integrated Development Plans (IDPs)*

PLANNING HIERARCHY

- The *National Development Plan (NDP)* sets out the long-term vision for the country. It provides the programme through which South Africa can advance radical socio-economic transformation through development planning.
- The *Medium-Term Strategic Framework (MTSF) 2019-2024* is the implementation plan for the *NDP*.
- The *Human Resource Development Strategy of South Africa (HRDSA) 2024-2034* magnifies Chapter 9 (Improving education, training and innovation) of the *NDP*.
- New *Master Skills Plan (MSP)* as its implementation plan.
- The following plans will align with the *MSP*:
 - Provincial Master Skills Plans (PMSPs) and Integrated Development Plans (IDPs).

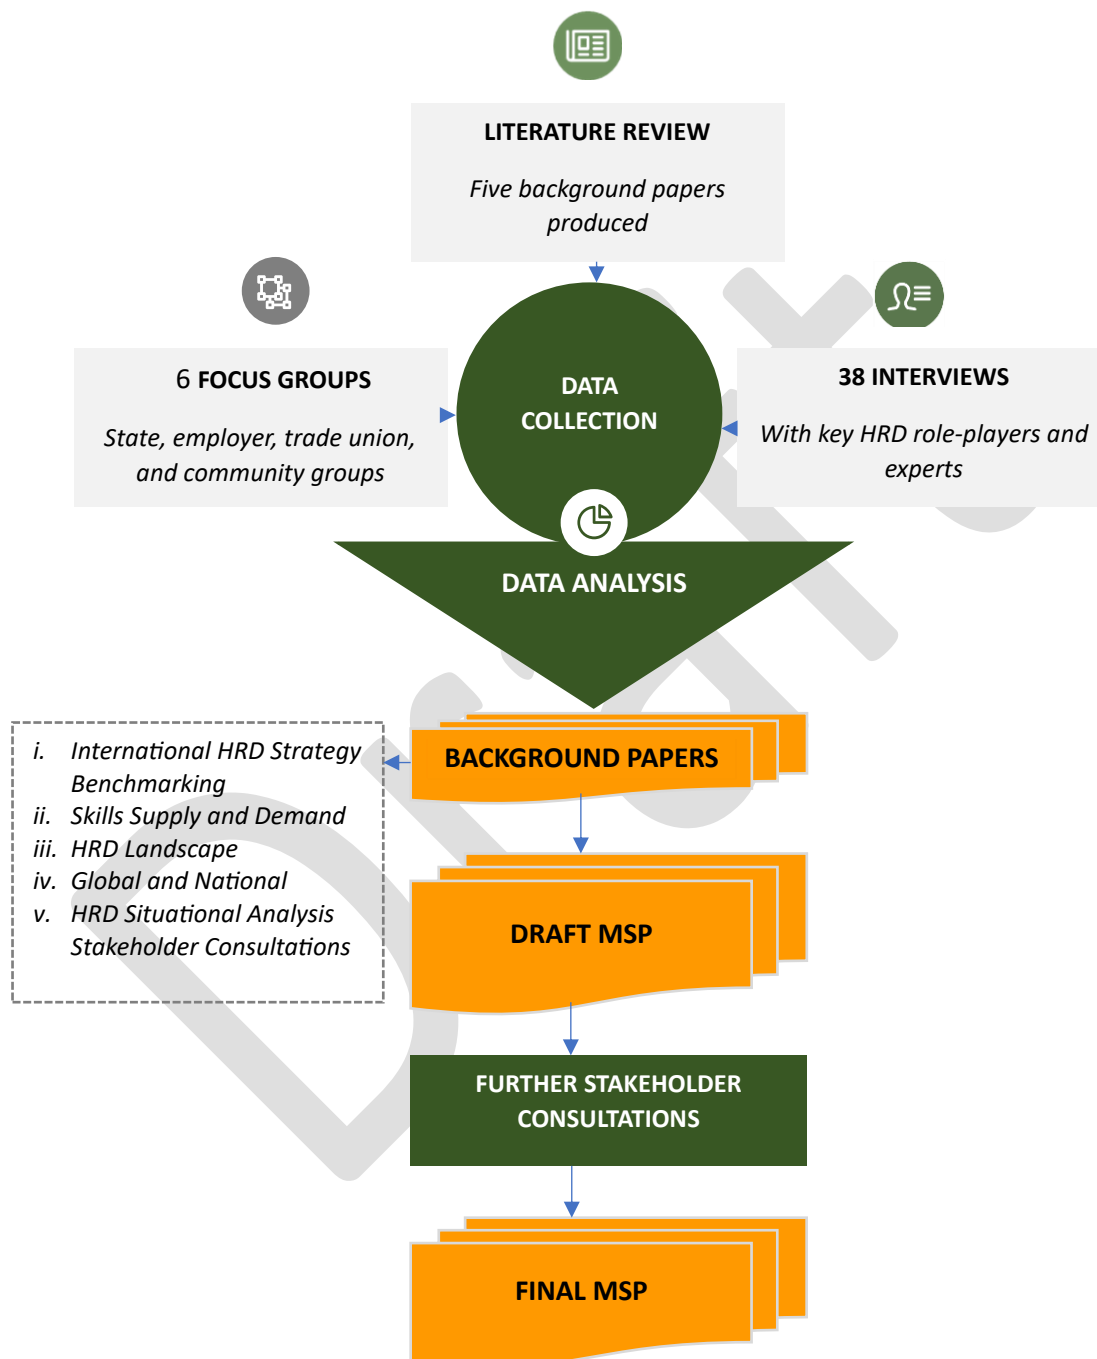

- Education and training or skills development plans.
- DTIC IMPs and the *ERRS*.
- Strategic Plans of public entities.

The following principles guide the MSP:

	Implementation The MSP should serve as an effective "implementation arm" of the newly envisaged <i>HRD Strategy of South Africa</i> .
	Inclusivity The Plan's development process must involve all key stakeholders across all levels of government, the private sector, labour, NGOs, public and private education and training providers, and HRDC.
	Clarity The Plan should clearly define roles and responsibilities, who needs to do what, and when.
	Uniqueness The <i>MSP</i> should keep what is in other plans.
	Linkages The <i>HRDS</i> AND <i>MSP</i> should demonstrate linkages with other skills plans and processes. It must integrate skills development (across government levels, economic sectors, and occupations).
	Comprehensive The <i>HRDS</i> and <i>MSP</i> should cover all levels and types of education and training.
	Short and Simple The Plan itself should be short and simple so that it provides a focus on the key issues to be addressed.
	Monitoring and evaluation The Plan should be accompanied by SMART monitoring, reporting and evaluation mechanisms (specific, measurable, achievable, relevant, and time-bound).

2. DEVELOPMENT APPROACH

An evidence-driven approach was adopted to develop the MSP:

3. FINDINGS OF THE BACKGROUND RESEARCH PAPERS

Five background research papers informed the Master Skills Plan. The key findings of these papers are summarised.

Paper One: HRD Landscape

South Africa's HRD landscape is rich and diverse. All citizens have access to learning and development, regardless of age, location, education level, and socio-economic status. There are early childhood development centres, public and private schools, community colleges, TVET colleges, universities, private institutions, workplace training centres, and civil society skills centres.

From an analysis of the landscape, the paper made several recommendations:

- Better intelligence is needed about the HRD landscape. Information gaps exist in the informal sector, civil society, and training centres residing with line Ministries, which do not report performance into a central database.
- HRD governance, leadership and management should be enhanced.
- Coordination and collaboration between stakeholders should be improved. Better coordination between government departments at different levels and collaboration with the private sector and NGOs is needed. The HRD Council should facilitate coordination and collaboration to ensure a cohesive and integrated HRD approach.
- Quality assurance of learning programmes and initiatives should be improved. Programmes should align with industry needs and standards.
- HRD funding and resource allocation should be enhanced. Innovative financing mechanisms should be explored.
- TVET college funding should be increased to support occupational programmes.
- Community Education and Training colleges should focus on job skills training for sustainable livelihoods.
- The private sector should do more to give students access to workplaces for experiential learning.

Paper Two: Global and Local Context of Human Resource Development

This paper surveys the global and local context in which HRD unfolds.

- African consumers are expected to play a bigger role in the global economy with the growth of middle-class consumers.
- The South African economy is bedevilled with low growth, an energy crisis, infrastructure deterioration, logistics bottlenecks, loss-making state-owned enterprises, corruption, dysfunctional local authorities, and recurring social unrest.
- Technology trends include biomedical breakthroughs, material science, artificial intelligence, e-commerce, remote work, cryptocurrency, renewables, 5G mobile networks, the Internet of Things, and the on-demand economy.
- Climate change, environmental degradation, biodiversity and extreme weather conditions are global and national priorities. There is increased pressure on the E&T sector to contribute to mitigating climate change.
- EdTech trends are personalised teaching and learning, micro-learning, digital credentialing, online teaching, homeschooling, micro-schools, soft skills, and open educational resources.

Paper Three: Skills Supply and Demand Imbalances

The paper analysed skills supply and demand imbalances in the South African labour market and found the following:

- High unemployment of unskilled workers and high vacancy rates for skilled workers bifurcate the labour market.
- Youth bears the brunt of unemployment. About 3.7 million (36.1%) young people aged 15-24 are not in education, employment and training (NEETs).²
- Occupational shortages for high-skilled occupations range from 38% for skilled agricultural workers to 94.2% for managers.
- One-third of employees work in a field different from the one in which they qualified.
- Underqualification and overqualification rates of 28.1% and 24% further suggest a high degree of skills mismatch.

² Statistics South Africa (2023) Quarterly Labour Force Survey, Q1. StatsSA: Pretoria.

- Although labour demand is high for STEMM occupations, most university and TVET college students are enrolled on management, business studies, humanities and social sciences.
- Positive labour market outcomes are better for apprenticeships and internships, but SETAs offer mostly (about 49%) short skills programmes.
- The key recommendations include pro-growth, pro-employment macro-economic policy, a demand-led programme qualification mix, NEET training vouchers, skewing student aid to STEM courses, expanding internships, and decongesting PSET campuses with open learning systems.

Paper Four: Benchmarking HRD Strategies and Plans: Lessons for South Africa

The background paper benchmarked several countries' national skills plans and human development resource strategies of Ireland, Norway, Jordan, India, Seychelles, CARICOM, Namibia, Rwanda, and Papua New Guinea.

- The HRD strategies and plans are between five and 10 years old.
- Most country strategies are state-led, but Rwanda puts the private sector at the helm.
- Most countries exclude schooling from national HRD strategies and focus on workforce development.
- Strategic priorities cohere around access, quality, lifelong learning, technology, green issues, employer engagement, inclusivity, workforce development, partnerships, and youth empowerment.
- Rwanda prioritises human capital development, export dynamism and regional integration, well-managed urbanisation, competitive domestic enterprises, agricultural modernisation, and capable and accountable public institutions.
- The best approach to developing an HRD strategy is to identify a country's needs and priorities and respond accordingly.

Paper Five: Stakeholder Findings Report

There were extensive stakeholder consultations with state and non-state role-players in the HRD community of practice. Some key findings were:

HRD Council: The HRDC should have legislative powers to implement the HRD Strategy and Master Skills Plan. Alternatively, the HRDC should be disbanded, and the strategy and Plan should reside in the Presidency.

Skills System: The SETAs and skills levy grant system should be reviewed due to poor impact. Another view was that the skills development levies should be incorporated into the voted education budget, with SETAs competing for funds.

Schooling: The DBE's Action Plan 2030 interventions should be implemented. Reading for meaning, numeracy, and STEM should be prioritised.

CET: Community education and training colleges should focus on job skills training for sustainable livelihoods.

TVET: The QCTO occupational qualifications should be the only programme type colleges offer. People with technical expertise should be appointed to Councils. Employ artisans as instructors and lecturers.

HET: Unstable universities to return to their academic missions. Political interference and cadre deployment should be stopped. People with impeccable credentials should be appointed to the Councils and executive management.

Dual Education: The learnership application system should be centralised to prevent "double dipping" and nepotism. Tax breaks should be offered to employers for internships.

Skills Priorities: There should be a focus on the green economy, digitalisation, entrepreneurship, STEM skills, and youth unemployment.

4. THEORY OF CHANGE

IMPACT	An educated and skilled population contributes to the country's economic growth, employment and social development priorities.		
GOALS	1. Universal access to quality early childhood development	2. Improve learning outcomes in the school system	3. Empower youth not in employment, education or training with employability and entrepreneurship skills
OUTCOMES	<ul style="list-style-type: none"> Holistically developed young children Expanded access to quality ECD for 0- to 4-year-olds Improved ECD quality 	<ul style="list-style-type: none"> Ten-year-olds can read for meaning Improved mathematics and science outcomes Increased number of matric students passing maths and physical science Supported and strengthened Three-Stream Model implementation in Basic Education 	<ul style="list-style-type: none"> Improved access to education and training and work-based opportunities Improved employability of NEETs Improved efficiency and coordination of employment services Expanded access to entrepreneurship development
GOALS	4. Create an adequate labour market pool of digital and green skills	5. Strengthen HRD institutional capacity, linkages and coordination	6. Integrate HRD planning and implementation with industrial policy and other government, social partner and industry plans
OUTCOMES	<ul style="list-style-type: none"> Develop TVET programmes for digital and green skills Digital divide between the "haves" and "have nots" bridged Government strategies and plans on digital and green transitions, research and innovation supported Diverse teaching and learning delivery modes adopted Skills development for at-risk and displaced workers provided 	<ul style="list-style-type: none"> Aligned human and financial resources to strategic objectives Strengthened governance, leadership, and management in HRD institutions Strengthened HRDC capacity for strategy implementation and coordination Legislated HRDC and HRDS-SA Improved safety and security in HRD institutions Aligned national, provincial and local government HRD interventions to HRDS-SA and MSP Responsive programme qualification mix to labour demand Supported community-based organisations and cooperatives with skills development 	<ul style="list-style-type: none"> HRD integrated with industrial and economic policies Qualifications aligned to industry needs HRD aligned to industry supply and value chains Small and micro enterprises supported skills development, including the informal sector, to create an ecosystem for small business development Skills levies are effectively and efficiently used Internships and apprenticeship enrolments increased
OUTPUTS	<ul style="list-style-type: none"> Quality ECD provision. Better skills matching. 	<ul style="list-style-type: none"> Efficient and effective schooling system. Better coordinated HRD system. 	<ul style="list-style-type: none"> Improved skills development NEET provision. HRD aligned to industrial policy.
INPUTS	Funding Skilled Human Resources Infrastructure		

5. IMPLEMENTATION PLAN

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
GOAL 1: UNIVERSAL ACCESS TO QUALITY EARLY CHILDHOOD DEVELOPMENT					
<ul style="list-style-type: none"> • Holistically developed young children • Expanded access to quality ECD for 0- to 4-year-olds • Improved ECD quality 	The proportion of children aged 0 - to 4-year-olds participating in ECD.	64.1% (2021) ³	<ul style="list-style-type: none"> • Develop new funding models to expand ECD provision. • Support parents and caregivers to participate in their children's development. 	Progressive annual improvement from baseline	DBE; PEDs, HRDC; ECD Centres; NGOs

³ Statistics South Africa (2021). General Household Survey (GHS): Focus on Schooling 2020 – 2021. May 2023. StatsSA: Pretoria.

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
GOAL 2: IMPROVE LEARNING OUTCOMES IN THE SCHOOL SYSTEM					
• Ten-year-olds can read for meaning	The proportion of Grade 4 learners reaching the required competency levels in the Progress in International Reading Literacy Study (PIRLS).	19% (2021) ⁴	<ul style="list-style-type: none"> • Adopt and implement the <i>Revised National Reading Sector Strategy (2024-2030)</i>. • Devise and implement a national literacy campaign. 	-Progressive annual improvement from baseline -The National Reading Plan for primary schools is implemented in all schools.	DBE; PEDs; NGOs
• Improved mathematics and science outcomes	Percentage of Grade 5 and Grade 9 in Maths and Science with basic knowledge and skills per TIMSS. ⁵	Grade 5 Maths: 37% of learners acquired the basic knowledge and skills in 2019. Science: 28% in 2019.	<ul style="list-style-type: none"> • Increase the emphasis on foundational numeracy, literacy, mathematics and science in initial teacher and ongoing professional development. 	Progressive annual improvement from baseline	DBE; PEDs; DHET; NGOs; Universities
• Increased number of matric students passing maths and physical science	Percentage of students eligible to study Maths and Science at university annually	Grade 9 Maths: 41% of learners acquired the basic knowledge and skills in 2019. Science: (36%) ⁶	<ul style="list-style-type: none"> • Develop strategies to improve teacher retention. • Implement career guidance to increase recruitment of Mathematics and science students for teacher training 		

⁴ All figures in this document are referenced, or come directly from, the PIRLS 2021 SA Report or PIRLS 2021 International Report - Nic Spaull (Secretariat of the 2030 Reading Panel)

⁵ Trends in mathematics and science study (TIMSS). By 2015, only 34% of Grade 9 learners reached a minimum acceptable level of performance defined in the TIMSS programmes (the figure was 11% in 2002) DBE Actin Plan 2024.

⁶ HSRC (2021) South Africa TIMMS Grade 5 and Grade 9 Results. Accessed at <https://www.education.gov.za/TIMSS2019ReportRelease.aspx>

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
• Supported and strengthened Three-Stream Model implementation in Basic Education	Percentage of Schools of Skill implementing technical-occupational curriculum	Three Stream model pilot completed	-Stronger conceptualisation of the model, especially with articulation on the NQF.	100% of Schools	DBE, PEDs, DHET, Quality councils, Trade unions, NGOs, Treasury
	Number of ordinary schools implementing technical-occupational curriculum	New indicator	-Resource the implementation of the Three Streams Model	1 007 schools	

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
GOAL 3: EMPOWER YOUTH NOT IN EMPLOYMENT, EDUCATION OR TRAINING WITH EMPLOYABILITY AND ENTREPRENEURSHIP SKILLS					
<ul style="list-style-type: none"> Improved access to education and training and work-based opportunities Improved employability of NEETs Improved efficiency and coordination of employment services Expanded access to entrepreneurship development 	Number of NEETs	Approximately 3.7 million (36.1%) out of 10.2 million young people aged 15-24 were not employed in education or training (NEET). ⁷	<ul style="list-style-type: none"> Increase NEET targets for internships, learnerships and apprenticeships. Develop cost-effective, demand-led skills programmes (maximum of six months) in growth sectors to provide NEETs with occupational and job readiness skills Pilot skills programmes in community education and training colleges to respond to local labour markets Establish mentorship programmes to support entrepreneurship. 	Progressive reduction in the NEET population annually. ⁸	All Ministries; HRDC, NSA; NEDLAC; Presidential Clusters; PYEI, YES, NYDA; NGOs; SETAs,

⁷ Statistics South Africa, Quarterly Labour Force Surveys, Q1 2018 & Q1 2023.

⁸ The best method of getting more employment is to foster an economy in which employment-generating firms are multiplying and expanding as fast as possible. Outlining what a broad reform package would look like is beyond the scope of this plan, but it is required.

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
GOAL 4: CREATE AN ADEQUATE LABOUR MARKET POOL OF DIGITAL AND GREEN SKILLS					
<ul style="list-style-type: none"> Develop TVET programmes for digital and green skills Digital divide between the "haves" and "have nots" bridged Government strategies and plans on digital and green transitions, research and innovation supported Diverse teaching and learning delivery modes adopted Skills development for at-risk and displaced workers provided 	<p>Number of green skills and digital skills Cos</p> <p>Percentage of school with internet access</p> <p>No of skills development partnerships in digital and green strategies and plans</p> <p>Number of PSET institutions adopting diverse teaching and learning modes</p> <p>Number of skills development projects for at-risk and displaced workers provided</p>	<p>No digital and green CoS</p> <p>80% (2023)⁹</p> <p>No baseline</p> <p>No baseline</p> <p>No baseline</p>	<ul style="list-style-type: none"> Establish TVET Centres of Specialisation for digital and green skills. Provide digital infrastructure and internet connectivity in all public education and training institutions. Establish skills development partnerships to support the research and innovation ecosystem. Develop institutional digital transformation plans for teaching and learning. Develop skills programmes for retrenched workers and workers whose jobs will be affected by the just transition. 	<p>-Two green skills CoS established - Two digital skills CoS established</p> <p>100%</p> <p>All digital and green strategies and plans have skills development partnerships.</p> <p>Progressive annual improvement from baseline.</p> <p>Progressive annual improvement from baseline.</p>	<p>Relevant Ministries DHET; TVET Colleges; CSIR; Employer bodies; TVET colleges; universities; DTIC; SETAs</p>

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
GOAL 5: STRENGTHEN HRD INSTITUTIONAL CAPACITY, LINKAGES AND COORDINATION					
<ul style="list-style-type: none"> Aligned human and financial resources to strategic objectives 	Evidence of organisational development interventions for HRD institution	Number of unqualified audits in HRD institutions	<ul style="list-style-type: none"> Organisation Development support is given to HRD institutions for aligning resources to objectives and priorities. 	Unqualified institutional audits	HRDC, All national and provincial ministries, local municipalities, all PSET institutions, Employer bodies, Trade unions, Civil society organisations
<ul style="list-style-type: none"> Strengthened governance, leadership, and management in HRD institutions 	Evidence of governance, leadership, and management for HRD institutions	No baseline	<ul style="list-style-type: none"> Capacity development support to improve governance, leadership, and management in HRD institutions 	Unqualified institutional audits	
<ul style="list-style-type: none"> Strengthened HRDC capacity for strategy implementation and coordination 	Evidence of capacity development for strategy implementation	No baseline	<ul style="list-style-type: none"> Strengthen HRDC Secretariat for strategy implementation and coordination. 	HRDS-SA is implemented	
<ul style="list-style-type: none"> Legislated HRDC and HRDS-SA 	Legislated HRDC and HRDS-SA	No legislative backing	<ul style="list-style-type: none"> Establish an inter-ministerial task team to explore the need for the HRDC and HRDS to be legislated. 	HRDS-SA and HRDC are legislated	
<ul style="list-style-type: none"> Improved safety and security in HRD institutions 	Number of recorded safety and security incidents	No baseline	<ul style="list-style-type: none"> Facilitate a discussion with security stakeholders to minimise disruption to education and training. 	Reduction in safety and security breaches in HRD institutions	

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
<ul style="list-style-type: none"> Aligned national, provincial and local government HRD interventions to HRDS-SA and MSP Responsive programme qualification mix to labour demand Supported community-based organisations and cooperatives with skills development 	<p>Number of partnerships</p> <p>Occupations in high demand</p> <p>Number of CBOs and cooperatives supported with skills development</p>	<p>No baseline</p> <p>List of occupations in high demand (Refer to Annexure A)</p> <p>No baseline</p>	<ul style="list-style-type: none"> Develop partnerships for alignment of HRD interventions. Establish a process to measure whether PSET institutions offer qualifications to address high-demand occupations. Develop a user-friendly process to access skills development funding for CBOs and cooperatives to access the skills levy. 	<p>Number of partnerships established</p> <p>PSET institutions are offering qualifications in the OIHD List</p> <p>Progressive annual improvement</p>	

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
GOAL 6: INTEGRATE HRD PLANNING AND IMPLEMENTATION WITH INDUSTRIAL POLICY AND OTHER GOVERNMENT, SOCIAL PARTNER AND INDUSTRY PLANS					
<ul style="list-style-type: none"> • HRD integrated with industrial and economic policies 	The number of Plans aligned to HRDS-SA	No baseline	<ul style="list-style-type: none"> • Strengthen HRDC participation in governmental clusters, industry master plans, provincial skills master plans and sector skills plans. 	100%	HRDC, All national and provincial ministries, local municipalities, all PSET institutions, Employer bodies, Trade unions, Civil society organisations
<ul style="list-style-type: none"> • Qualifications aligned to industry needs 	Number of qualifications aligned to occupations in high demand (OIHD)	Occupations in High Demand List	<ul style="list-style-type: none"> • Undertake alignment of qualifications to occupations in high demand. • Develop a communication strategy to promote occupations in high demand, • Establish a process to develop a list of qualifications to address OIHD. 	All OIHD have qualifications.	
<ul style="list-style-type: none"> • HRD aligned to industry supply and value chains 	Number of industry supply and value chains	No baseline	<ul style="list-style-type: none"> • Establish partnerships for HRD alignment with relevant role-players in supply and value chains. 	Progressive annual improvement	
<ul style="list-style-type: none"> • Small and micro enterprises supported skills development, including the informal sector, to create an ecosystem for small business development 	Number of SMEs supported	No baseline	<ul style="list-style-type: none"> • Increase HRD support to SMEs and the informal sector. • Implement applicable recommendations arising out of the engagement of Micro and Small Enterprises in the Workplace Based Learning South Africa Study 	Progressive annual improvement	
<ul style="list-style-type: none"> • Skills levies are effectively and efficiently used 	A skills levy review	No baseline	<ul style="list-style-type: none"> • Initiate a review of the levy grant system and SETA system 	Skills levy review completed	

OUTCOMES	INDICATORS	BASELINE	INTERVENTIONS	TARGETS TO 2030	LEAD AGENCIES
<ul style="list-style-type: none"> Internships and apprenticeship enrolments increased 	Number of internships and apprenticeships	19 536 artisans 40 000 interns	-Engage employers to enrol more internships and apprenticeships	30 000 apprentices and 100 000 interns annually	

6. MONITORING AND EVALUATION

A monitoring and evaluation framework is developed separately to track performance against the Plan.

7. FINANCING

The Plan will consist of the following sources:

Voted education budget
Skills development levies
Public entity training budgets
SARS tax incentives
Corporate social investments
Donor support
Private sector funding

ANNEXURE A: NATIONAL OCCUPATION IN HIGH DEMAND LIST (2023)

OFO CODE	OCCUPATION	OFO CODE	OCCUPATION	OFO CODE	OCCUPATION

ANNEXURE B: SKILLS GAPS

Skills gaps refer to top-up skills and vary from one individual to another. The identification of skills gaps research study conducted in 2023 revealed the following common skills gaps:¹⁰

Foundation Skills	Job-related skills (Technical skills)	Soft skills		Cognitive skills
		Inter-personal	Intra-personal	
Reading	Leadership	Customer care (service orientation)	Proactiveness	Problem-solving
Writing	Administration and Management (HR, Finance, Project, Operations, Marketing, Business, etc.)	Communication	Flexibility	Analytical (Critical) thinking
Numeracy	Planning	Collaboration and Teamwork	Time management	Decision making
Speaking	Organising	Resource management (finances, HR, water, energy, waste)	Adaptability	Creative thinking
Oral and written comprehension (Active listening)	Designing (technology design)	Public speaking	Discipline	Analytical thinking
Basic Computer skills	Selecting relevant equipment/ tools/ machinery /methodology /technology	Active citizenry	Strong work ethic	Logical reasoning
Media Literacy	Using appropriate equipment/ tools/machinery/metho dology/technology (operations and control)		Managing your money	Memory
	Analysing (operations, data, information, policy, QC, etc.)		Reliability	Learning to learn (Active learning)
	Installation		Accountability	Self-reflection
	Repairing		Positive attitude	Judgement
	Maintenance		Ethical practices (integrity)	
	Troubleshooting		Self-awareness	
	Conflict resolution (negotiation)		Cultural awareness (functioning in a diverse environment)	
	Digital and AI		Social-perceptiveness (Empathy)	
	Physical strength		Environmental awareness	

¹⁰ LMIP (2023) Identification of skills needs. Labour market Intelligence Programme.
