# Unblock Macro enabled Excel workbooks

Microsoft Office now by default blocks macros in Macro enabled Excel files downloaded from the internet.
When users open a file that came from the internet, such as an email attachment, and that file contains macros,
the following message will be displayed:

SECURITY RISK Microsoft has blocked macros from running because the source of this file is untrusted.   Learn More   ✕

Follow the following steps to unblock the blocked macro enabled workbook:

Right click macro enabled Excel file in Windows Explorer

Check option: **Unblock** file to restore functionality
