## DEMOGRAPHICS

2015

It is of critical importance for public policy decision makers across all spheres of government to acknowledge demographics as a decisive factor in shaping our current socio-economic reality.

This chapter provides a concise yet meaningful overview of key demographic variables that will assist with municipal planning and budgeting, namely estimates of population size, the distribution of population projections within age cohorts as well as dependency ratios.

The demographic data provided in this Chapter was sourced from the Department of Social Development who used Stats SA's 2018 Mid-Year Population Estimates (2002 – 2018) to project population growth for the period 2019 to 2024.

*Data source: Department of Social Development, 2018*

# POPULATION

According to the Department of Social Development's 2018 projections, Mossel Bay currently has a population of 96 120, rendering it the third largest municipal area after George and Oudtshoorn within the Garden Route District. This population is estimated to increase to 107 829 by 2024 which equates to a 1.9 per cent annual average growth rate. The estimated population annual growth rate of Mossel Bay is on par with that of the Garden Route District (1.9 per cent) over the period from 2019 to 2024.

# AGE COHORTS

Year	Children: 0 – 14 Years	Working Age: 15 – 64 Years	Aged: 65 +	Dependency Ratio
2011	20 684	59 730	9 015	49.7
2019	21 463	61 090	15 426	60.4
2024	22 563	65 564	19 702	64.5

The above table depicts Mossel Bay's population composition per age cohorts. These groupings are also expressed as a dependency ratio which in turn indicates who are part of the workforce (Age 15 - 64) and those, who are depending on them (children and seniors). A higher dependency ratio means a higher pressure on social systems and the delivery of basic services.

A comparison between the 2011, 2019 and 2024 estimates show a sharp increase in the aged (65 +) cohorts, as a percentage of the total population. The substantial increase in the aged category is expected to raise the dependency ratio.

# 2

## EDUCATION

Education and training improves access to employment opportunities and helps to sustain and accelerate overall development. It expands the range of options available from which a person can choose to create opportunities for a fulfilling life. Through indirect positive effects on health and life expectancy, the level of education of a population also influences its welfare.

*Data source: Western Cape Education Department, 2018*

# LEARNER ENROLMENT

Learner enrolment in Mossel Bay increased moderately from 16 105 learners in 2015 to 16 401 in 2016 and further increased slightly to 16 650 learners in 2017. Learner enrolment in Mossel Bay are the third largest after George and Oudtshoorn.

# LEARNER-TEACHER RATIO

The learner-teacher ratio in Mossel Bay increased from 40.4 learners per teacher in 2015 to 42.8 learners per teacher in 2017, which could in future affect learner performance within the Mossel Bay municipal area. Factors influencing the learner-teacher ratio, include learner enrolment growth, the ability of schools to employ more educators when needed and the ability to collect fees.

# GRADE 12 DROP-OUT RATES (%)

The drop-out rates for learners within Mossel Bay municipal area increased from 28.8 to 32.5 per cent between 2015 and 2016. The rate increased to 36.5 per cent in 2017, which does not bode well for education outcomes in the area.

These high levels of drop-outs are influenced by a wide array of economic factors including unemployment, poverty and teenage pregnancies.

## PUBLIC SCHOOLS

The availability of adequate education facilities such as schools, FET colleges and schools equipped with libraries and media centres could affect academic outcomes positively.

In 2015, Mossel Bay had a total of 25 public ordinary schools, which subsequently became 24 in 2017. Given the tough economic climate, schools have been reporting an increase in parents being unable to pay their school fees.

# NO-FEE SCHOOLS

The proportion of no-fee schools increased slightly from 64 per cent in 2015 to 66.7 per cent in 2017.

# SCHOOLS WITH LIBRARIES

The number of schools equipped with libraries remained at 15 between 2015 and 2017.

# EDUCATION OUTCOMES

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagements in the broader market, policy decisions and choices in the sphere of education play a critical role in determining the extent to which future economy and poverty reduction plans can be realised. This section measures the matric pass rate within the Mossel Bay municipal area.

The matric pass rate in Mossel Bay has been deteriorating year-on-year from 88.1 per cent in 2015, 87.4 per cent in 2016 and further to 83.5 per cent in 2017. This does not bode well for learners to access higher education to broaden their opportunities.

# 3

## HEALTH

Health is another major factor contributing to the general quality of life in the Mossel Bay municipal area. It is therefore important to monitor the public health facilities as well as a variety of factors such as Human Immunodeficiency Virus (HIV)/Acquired Immunodeficiency Syndrome (AIDS) or Tuberculosis (TB) and general topics that affect the community, like maternal health. This Socio-economic Profile provides the basic statistics concerning these issues. Since this profile focusses on the public health facilities, private facilities are not included.

*Data source: Department of Health, 2018*

# HEALTHCARE FACILITIES

All citizens' right to access to healthcare services are directly affected by the number and spread of facilities within their geographical reach. South Africa's healthcare system is geared in such a way that people have to move from primary, with a referral system, to secondary and tertiary levels.

Area	PHC Clinics		Community Health Centres	Community Day Centres	Hospitals		Treatment Sites	
	Fixed	Non-fixed			District	Regional	ART Clinics	TB Clinics
<b>Mossel Bay</b>	4	10	0	1	1	0	15	17
<b>Garden Route District</b>	35	33	0	6	6	1	61	88

In terms of healthcare facilities, Mossel Bay had 14 primary healthcare clinics (PHC) in 2017/18, which comprises of 4 fixed and 10 mobile clinics as well as 1 community day centre. There are 1 district and no regional hospitals in the Mossel Bay municipal area, 15 ART treatment sites/clinics and 17 TB clinics.

# EMERGENCY MEDICAL SERVICES

Access to emergency medical services is critical for rural citizens due to rural distances between towns and health facilities being much greater than in the urban areas. Combined with the relatively lower population per square kilometre in rural areas, ambulance coverage is greater in rural areas in order to maintain adequate coverage for rural communities.

Provision of more operational ambulances can provide greater coverage of emergency medical services. The Mossel Bay municipal area had 3 ambulances per 10 000 inhabitants in 2017 which is on par with that of the Garden Route District average of 2 ambulances per 10 000 people. It is worth noting that this number only refers to Provincial ambulances and excludes all private service providers.

# HIV/AIDS

HIV/AIDS management is crucial given its implications for the labour force and the demand for healthcare services.

Area	Registered patients receiving ART		Number of new ART patients		HIV Transmission Rate	
	2016/17	2017/18	2016/17	2017/18	2016/17	2017/18
<b>Mossel Bay</b>	3 917	4 073	646	534	1.4	1.5
<b>Garden Route District</b>	20 127	21 713	3 603	3 537	1.8	0.9

The number of registered patients receiving ARTs in Mossel Bay is steadily rising by 156 from 3 917 in 2016/17 to 4 073 in 2017/18. The 4 073 patients receiving antiretroviral treatment are treated in 15 treatment sites/clinics. A total of 21 713 registered patients received antiretroviral treatment in the Garden Route District in 2017/18 of which 18.8 per cent come from the Mossel Bay municipal area. The number of new antiretroviral patients decreased by 112 patients between 2016/17 and 2017/18 in Mossel Bay whereas the number of new patients in the Garden Route District decreased with 66 patients over the same period. The HIV transmission rate for Mossel Bay shows a slight deterioration from 1.4 per cent in 2016/17 to 1.5 per cent in 2017/18, which is contrasted to a slight improvement from 1.8 per cent to 0.9 per cent over the same period in the Garden Route District.

# TUBERCULOSIS (TB)

Mossel Bay experienced a decline in tuberculosis (TB) cases from 781 in 2015/16 to 703 in 2016/17, but however picked up with 753 TB cases in 2018/18. These TB patients are treated in 17 TB clinics or treatment sites.

# CHILD HEALTH

The United Nations Sustainable Development Goals aims by 2030 to end preventable deaths of new-borns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1 000 live births and under-5 mortalities to at least as low as 25 per 1 000 live births (Source: UN SDG's).

Area	Immunisation Rate		Malnutrition		Neonatal Mortality Rate		Low birth weight	
	2016/17	2017/18	2016/17	2017/18	2016/17	2017/18	2016/17	2017/18
<b>Mossel Bay</b>	82.3	77.5	0.4	0.9	4.4	12.7	10.5	16.9
<b>Garden Route District</b>	77.0	74.8	3.2	2.7	8.5	11.4	14.6	17.8

The **immunisation rate** in the Mossel Bay area have decreased from 82.3 per cent in 2016 to 77.5 per cent in 2017. Mossel Bay's malnutrition rate (per 100 000 people) increased slightly from 0.4 in 2016 to 0.9 in 2017.

The **neonatal mortality rate (NMR)** in the Mossel Bay area has almost trebled from 4.4 in 2016/17 to 12.7 in 2017/18. A rise in the NMR may indicate deterioration in new-born health outcomes, or it may indicate an improvement in the reporting of neonatal deaths.

The percentage of babies born with **low birth weight** also increased from 10.5 per cent in 2016/17 to 16.9 per cent in 2017/18.

## DEFINITIONS

**Immunisation:** *The immunisation rate is calculated as the number of children immunised as a percentage of the total number of children less than one year of age. Immunisation protects both adults and children against preventable infectious diseases. Low immunisation rates speak to the need for parents to understand the critical importance of immunisation, as well as the need to encourage parents to have their young children immunised.*

**Malnutrition:** *Expressed as the number of malnourished children under five years per 100 000 people. Malnutrition (either under- or over-nutrition) refers to the condition whereby an individual does not receive adequate amounts or receives excessive amounts of nutrients.*

**Neonatal mortality rate:** *Measured as the number of neonates dying before reaching 28 days of age, per 1 000 live births in a given year. The first 28 days of life (neonatal period) represent the most vulnerable time for a child's survival. The Province's target for 2019 is 6.0 per 1 000 live births.*

**Low birth weight:** *Percentage of all babies born in facility that weighed less than 2 500 g. Low birth weight is associated with a range of both short- and long-term consequences.*

# MATERNAL HEALTH

Area	Maternal Mortality Rate		Delivery Rate to Women under 20 years		Termination of Pregnancy Rate	
	2016/17	2017/18	2016/17	2017/18	2016/17	2017/18
<b>Mossel Bay</b>	0.1	0.1	5.1	14.4	0.4	0.5
<b>Garden Route District</b>	0.0	0.1	6.7	15.0	0.5	0.6

The data in the table indicates that maternal mortality remained stable between 2016/17 and 2017/18, but teenage pregnancy increased together with the rate of termination of pregnancies within Mossel Bay. This is more or less in line with the overall trend within the Garden Route district.

## DEFINITIONS

**Maternal mortality rate:** *Maternal deaths per 100 000 live births in health facilities. Maternal death is death occurring during pregnancy, childbirth and the puerperium of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and site of pregnancy and irrespective of the cause of death (obstetric and non-obstetric).*

**Births to teenage mothers:** *Deliveries to women under the age of 20 years as proportion of total deliveries in health facilities. Teenage pregnancy is almost always unplanned; as a result, when young parents are placed in a position to care for their children, life can become particularly tough, especially if they do not have family or social support.*

**Termination of pregnancy:** *The percentage of terminations as a proportion of the female population aged 15 to 44 years. Government hospitals, designated private doctors and gynaecologists, and non-profit providers offer safe and legal termination of pregnancy. To have a free abortion, the request must be made at a primary healthcare clinic, where the pregnancy will be confirmed, counselling provided, an appointment made, and a referral letter be given to a facility where the procedure can be performed.*

# 4

## POVERTY

This section outlines living conditions and economic circumstances of households in the Mossel Bay municipal area based on most recent data including Statistics South Africa's Non-Financial Census of Municipalities 2016 and Quantec. Economic theory suggests that when an economy prospers its households are expected to enjoy a good standard of living. On the contrary, a declining economy tends to lower the standards of living of people. This section uses indicators including GDP per capita, income inequality, human development, as well as indigent households and free basic services to show the current reality of households residing in the Mossel Bay municipal area.

The deteriorating financial health of households and individuals under the weight of economic pressures, specifically between 2011 and 2015, has resulted in an increase in the poverty levels, according to the Poverty Trends in South Africa report released by Statistics South Africa in 2017. The report cites rising unemployment levels, low commodity prices, higher consumer prices, lower investment levels, household dependency on credit, and policy uncertainty as the key contributors to the economic decline in recent times. These recent findings indicate that the country will have to reduce poverty at a faster rate than previously planned.

According to the report, the categories of people vulnerable to poverty remained African females, children 17 years and younger, people from rural areas, and those with no education. Inflation-adjusted poverty lines show that the food poverty line increased from R219 in 2006 to R531 per person per month in 2017. The lower-bound poverty line has increased from R370 in 2006 to R758 per person per month in 2017 while the upper-bound poverty line has increased from R575 in 2006 to R1 138 per person per month in 2017.

# GDPR PER CAPITA

An increase in real GDPR per capita, i.e. GDPR per person, is experienced only if the real economic growth rate exceeds the population growth rate. Even though real GDP per capita reflects changes in the overall well-being of the population, not everyone within an economy will earn the same amount of money as estimated by the real GDPR per capita indicator.

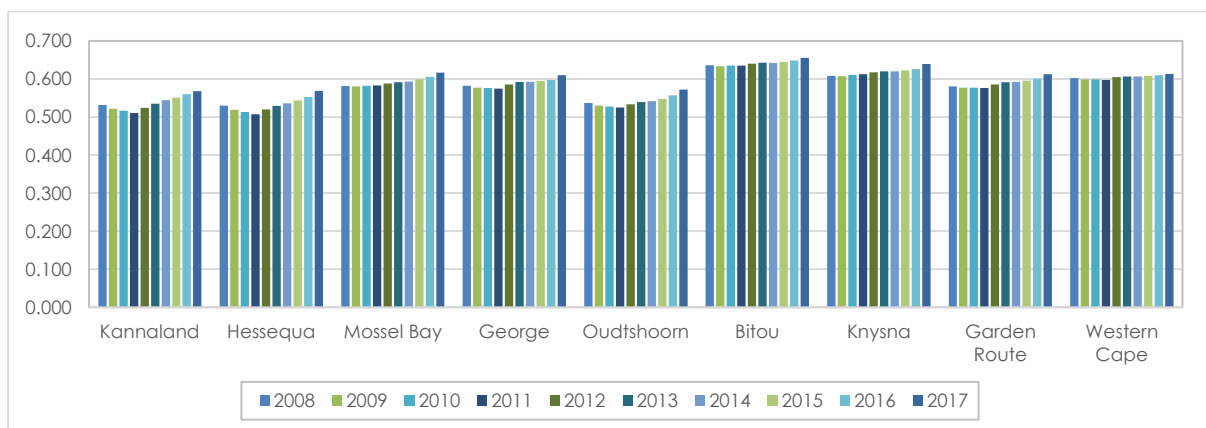

Source: Stats SA 2017, own calculations

At R76 933 in 2017, Mossel Bay's real GDP per capita is higher than the average GDP per capita of the Garden Route District which is R69 970. Mossel Bay's real GDP per capita has increased steadily year on year between 2007 and 2017 and indicates an overall improvement of the well-being of the population.

# INCOME INEQUALITY

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. Income inequality has increased marginally in Mossel Bay between 2010 and 2017.

Source: Global Insight, 2017

Mossel Bay's income inequality levels at 0.616 in 2017 has been marginally higher than the levels of the Garden Route District (0.613) as well as the Western Cape (0.613).

## HUMAN DEVELOPMENT

The United Nations uses the Human Development Index (HDI)<sup>1</sup> to assess the relative level of socio-economic development in countries. Indicators that measure human development are education, housing, access to basic services and health. Per capita income is the average income. It is income per head of the population per year. Per Capita Income might not be the income of every individual in the state. Life expectancy and Infant Mortality Rate are other important criteria for measuring development.

Source: Global Insight, 2017

HDI in Mossel Bay has gradually been on the rise since 2008, peaking at 0.732 in 2017. Naturally, per capita income as per definition is expected to mimic the trend of HDI and this is clearly displayed in the graphic above.

<sup>1</sup> The HDI is a composite indicator reflecting education levels, health, and income. It is a measure of peoples' ability to live a long and healthy life, to communicate, participate in the community and to have sufficient means to be able to afford a decent living. The HDI is represented by a number between 0 and 1, where 1 indicates a high level of human development and 0 represents no human development.

# 5

## BASIC SERVICE DELIVERY

The Constitution of the Republic of South Africa states that every citizen has the right to access to adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to services such as potable water, basic sanitation, safe energy sources and refuse removal services, to ensure that households enjoy a decent standard of living.

This section reflects on housing and basic services access levels (Census 2011) and the incremental progress municipalities have made hereto within the last 5 years (Community Survey 2016).

# ACCESS TO SERVICES & HOUSING

Since no new household survey information is available (compared to SEPLG 2017), this section highlights housing and household services access levels from the most recent available information from Statistics South Africa's Community Survey 2016. The next household survey which includes municipal level access to household services will be the Census in 2021.

The table below indicates access to housing and services in the Mossel Bay Municipal area. With a total of 31 766 households, 88.2 per cent have access to formal housing. Access to water, electricity and sanitation services were however significantly higher than this at 98.0 per cent, 95.9 per cent and 95.6 per cent respectively while household access to refuse removal services was at 87.2 per cent.

Community Survey 2016	Mossel Bay	Garden Route District
<b>Total number of households</b>	<b>31 766</b>	<b>189 345</b>
<b>Formal main dwelling</b>	28 004	162 325
	88.2%	85.7%
<b>Water (piped inside dwelling/within 200 m)</b>	31 142	183 441
	98.0%	96.9%
<b>Electricity (primary source of lighting)</b>	30 474	178 646
	95.9%	94.3%
<b>Sanitation (flush/chemical toilet)</b>	30 374	181 973
	95.6%	96.1%
<b>Refuse removal (at least weekly)</b>	27 715	168 079
	87.2%	88.8%

These figures are on par or slightly above that of the Garden Route District, with the exception of access to sanitation and refuse removal that is slightly below the district average.

## SERVICES GROWTH

A key element to the sustainable management of services is accurate and reliable information on the demand for services to enable informed projections on future demand. This section reflects on services growth based on information from Statistics South Africa's Non-Financial Survey of Municipalities. The unit of measure is a consumer/billing unit which is not comparable to household level information. Services provided by municipalities are done per 'plot' or consumer/billing unit, however, since households are the unit of measurement more often used in demographic surveys, an understanding of household dynamics remains important.

A comparison is made between 2007 and 2017 to determine services growth per consumer/billing unit over the past 10 years. This growth is contrasted against growth in support for indigent households, for which municipalities do not receive services revenue. An understanding of these trends will allow for improved planning for the demand of services per consumer unit as well as for revenue projections.

## Water Services

Growth in domestic and non-domestic consumer/billing units for water services was relatively slow over the 2007 – 2017 period, recording average year on year growth of 0.2 per cent. This equated to a total increase of 758 consumer units over this 10-year period.

Non-financial Census of Municipalities	2007	2017	Change 2007 - 2017	Average annual change 2007 - 2017
<b>Domestic and non-domestic water services per consumer/billing unit</b>	37 713	38 471	758	0.2%
<b>Indigent support for water services</b>	6 051	11 438	5 387	6.6%

In contrast, indigent support for water services increased by 5 387 consumer units or at an average annual rate of 6.6 per cent. Growth in indigent support was the same across all services.

## Sanitation Services

There was an increase of 6 695 units of total domestic and non-domestic consumer/billing units for sanitation services over the 2007 – 2017 period, recording an average year on year increase of 1.9 per cent over this 10-year period.

Non-financial Census of Municipalities	2007	2017	Change 2007 - 2017	Average annual change 2007 - 2017
<b>Domestic and non-domestic sanitation services per consumer/billing unit</b>	31 543	38 238	6 695	1.9%
<b>Indigent support for sanitation services</b>	6 051	11 259	5 208	6.4%

The overall growth in domestic and non-domestic sanitation services per consumer/billing unit were accompanied by solid growth of 6.4 per cent in indigent support for sanitation services over the same reporting period.

## Electricity Services

Compared to water and sanitation, electricity services per consumer/billing unit started off at 35 622 units in 2007 and dropped to 33 253 units in 2017 at an average annual rate of -0.7 per cent per cent.

Non-financial Census of Municipalities	2007	2017	Change 2007 - 2017	Average annual change 2007 - 2017
<b>Domestic and non-domestic electricity services per consumer/billing unit</b>	35 622	33 253	-2 369	-0.7%
<b>Indigent support for electricity services</b>	6 057	11 438`	2 437	8.8%

Indigent support for electricity services however, has grown substantially over the 2007 - 2017 period with an increase of 2 437 units at 8.8 per cent over the ten-year period.

## Refuse Removal Services

Domestic and non-domestic refuse removal services per consumer/billing unit started off at 34 536 units in 2007 and decreased to 33 578 units in 2017 at an average annual rate of -0.3 per cent for the period.

Non-financial Census of Municipalities	2007	2017	Change 2007 - 2017	Average annual change 2007 - 2017
<b>Domestic and non-domestic refuse removal services per consumer/billing unit</b>	34 536	33 578	-958	-0.3%
<b>Indigent support for refuse removal services</b>	6 051	11 438	5 387	6.6%

Indigent support for refuse removal has grown substantially over the 2007 -2017 period with an increase of 5 387 units at 6.6 per cent over the ten-year period.

# 6

## SAFETY AND SECURITY

South African society is becoming more and more violent. This was confirmed by the 2017/18 crime statistics released by the South African Police Service (SAPS) and Stats SA. The crime statistics show which type of criminal activity have increased/decreased in the past year. The most notable changes seen so far are the marked increase in crime related to murder and cash-in transit.

Between 1993 and 2011 the murder rate, declined almost consistently year on year. The highest murder rate in 100 years (78 murders per 100 000 people) was recorded in 1993, as South Africa transitioned to democracy. By 2011 it had dropped to 30.1 per 100 000.

But over the past six years we have seen a reversal of this downward trend. The murder rate is currently 35.2 per 100 000 ensuring that South Africa remains one of the 10 most murderous countries in the world.

The Western Cape's persisting problem with gang violence, the increase in crimes against women and children and farm murders. Nyanga in the Western Cape remains the most notorious area in the country, notorious for its gang violence. The murder rate increased by 9.6 per cent with over 300 murders reflected on the crime stats of 2017/18. The number of women murdered increased by 11 per cent, the number of boys by 20 per cent, and girls by 10 per cent from the year before.

*The data depicted in the following section was sourced from the 2018 Crime Statistics released by SAPS and Stats SA in September 2018. Incidences of crime per 100 000 were calculated using actual crime and estimated population figures provided by the Department of Social Development.*

*The information relating to fatal crashes and crash fatalities were sourced from the Department of Transport and Public Works.*

## MURDER

Municipal Area		2016	2017	2018
Actual Number	Mossel Bay	37	41	47
	Garden Route District	200	181	183
Per 100 000	Mossel Bay	39	43	49
	Garden Route District	33	30	29

**Definition:** Murder is unlawful and intentional killing of another person.

The 2017/18 crime statistics released by SAPS and StatsSA indicate that murder has increased by 7 per cent to over 20 000 cases recorded in 2017/18. This gives South Africa a rather alarming 57 murders a day and at a rate of 35.7 people murdered per 100 000 populations. Within the Western Cape Province, murder has increased by 12.6 per cent (418) from 3 311 to 3 729, almost doubling the national increase of 6.9 per cent in 2017/18.

Within the Mossel Bay area, the murder rate (per 100 000 population) increased by 13.95 per cent from 43 in 2017 to 49 in 2018, whereas the murder rate (per 100 000 population) within the Garden Route District decreased by 3.3 per cent from 30 in 2017 to 29 murders in 2018.

## SEXUAL OFFENCES

Municipal Area		2016	2017	2018
Actual Number	Mossel Bay	93	113	92
	Garden Route District	924	1 037	1 046
Per 100 000	Mossel Bay	99	120	96
	Garden Route District	151	170	168

**Definition:** Sexual offences includes rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency and human trafficking.

The rate of sexual violence in South Africa is amongst the highest in the world. In addition, a number of sexual offence incidences often go unreported (as in the case of rape). With respect to the crime statistics released by SAPS, sexual offences decreased by 0.6 per cent in the Western Cape in 2017/18. In 2018, there were 96 sexual crimes (per 100 000 people) recorded in Mossel Bay compared with 120 the previous year, which equates to a decline of 20 per cent. In turn, the sexual crimes rate declined by 1.2 per cent from 170 in 2017 to 168 in 2018 across the Garden Route District.

# DRUG-RELATED OFFENCES

Municipal Area		2016	2017	2018
Actual Number	Mossel Bay	1 702	1 813	1 448
	Garden Route District	9 618	10 931	10 809
Per 100 000	Mossel Bay	1 808	1 923	1 506
	Garden Route District	1 573	1 787	1 733

**Definition:** Drug-related crimes refers to the situation where the perpetrator is found to be in possession of, under the influence of, or selling illegal drugs.

The 2017/18 crime statistics released by SAPS and Stats SA indicate that the Western Cape Province has the highest rate of drug related offences in the country at 1 769 per 100 000. It also contributed more than a third (36.2 per cent) of cases to the country's drug related crime in 2017/18. Drug-related crimes (per 100 000 population) within the area displays an increase between 2016 and 2017 up by 6.4 per cent, but declined by 21.6 per cent to 1 506 in 2018.

# DRIVING UNDER THE INFLUENCE

Municipal Area		2016	2017	2018
Actual Number	Mossel Bay	396	365	444
	Garden Route District	1 494	1 441	1 739
Per 100 000	Mossel Bay	421	387	462
	Garden Route District	244	236	279

**Definition:** Driving und influence (DUI) refers to a situation where the driver of a vehicle is found to be over the legal blood alcohol limit. This is a crime detected through police activity rather than reports by members of the public.

Despite concerted efforts by government our roads are still considered amongst the most dangerous in the world. Reckless driving and alcohol consumption remain the top reason for road accidents. The number of cases (per 100 000 population) of driving under the influence of alcohol or drugs in the Mossel Bay area shows a significant increase of 19.3 per cent from 387 in 2017 to 462 in 2018. The Garden Route District, reflect a similar trend (18.2 per cent) with 279 cases in 2018 compared to 236 cases in 2017.

# RESIDENTIAL BURGLARIES

		Municipal Area		
		2016	2017	2018
Actual Number	Mossel Bay	1 026	958	970
	Garden Route District	5 931	5 654	5 208
Per 100 000	Mossel Bay	1 090	1 016	1 009
	Garden Route District	970	924	835

**Definition:** Residential burglary is defined as the unlawful entry of a residential structure with the intent to commit a crime, usually a theft.

The 2017/18 crime statistics released by SAPS indicate that residential burglaries in the Western Cape increased by 5.3 percent. Residential burglary cases (per 100 000 population) within the Mossel Bay area decreased slightly by 0.68 per cent from 1 016 in 2017 to 1 009 in 2018.

The incidence of residential burglaries (per 100 000 population) within the Garden Route District also show a decline of 9.6 per cent from 924 in 2017 to 835 in 2018.

# FATAL CRASHES

		2015	2016	2017
Area				
Mossel Bay		14	19	13
Garden Route District		99	116	111

**Definition:** A crash occurrence that caused immediate death to a road user i.e. death upon impact, flung from the wreckage, burnt to death, etc.

Fatal crashes involving motor vehicles, motorcycles, cyclists and pedestrians within the jurisdiction of the Mossel Bay Municipality has increased by 35.7 per cent between 2015 and 2016 and declined by 31.6 per cent in 2017, dipping below the 2015 level. The number of fatal crashes in the broader Garden Route District increased by 17.1 per cent between 2015 and 2016 before decreasing by 4.3 per cent towards the end of 2017.

# ROAD USER FATALITIES

Area	2015	2016	2017
<b>Mossel Bay</b>	15	18	13
<b>Garden Route District</b>	128	124	132

**Definition:** *The type of road user that died in or during a crash i.e. driver, cyclist, passengers, pedestrians.*

According to a recent study, the majority of road fatalities in Africa fall within the working age cohort - between the ages of 15 – 64 years – whilst three out of four fatalities were found to be male (Peden et al., 2013). The untimely death of these primary breadwinners therefore impacts directly upon not only the livelihood of family structures, but deprive society of active economic participants that contribute towards growth and development. The socio-economic impact of such road fatalities has proven to be particularly devastating in South Africa where the majority of road users hail from poor and vulnerable communities.

The previous section specified that a total of 13 fatal road crashes occurred within the Mossel Bay region in 2017, resulting in the same number of fatalities over the same period. Additional, lower-level information regarding the time, location, gender, ages of above specified crashes are available from the Department of Transport and Public Works upon request.

## THE ECONOMY

Economic activity within municipal boundaries is important as it shows the extent of human development and the living standards of communities. Although municipalities have no power to increase or decrease taxes in order to stimulate economic activity, there are few levers that local government authorities have control over to contribute to economic performance, including, among others, procurement of goods and services, job creation through expanded public works programmes as well as creating an enabling environment for small businesses.

The ability of households to pay for services such as water, electricity, sanitation, and refuse removal depends on income generated from economic activities. A slowdown in economic activity may result in job losses and inability of households to pay for services, leading to reduced municipal revenues. Data on macroeconomic performance, especially the information on sectoral growth and employment, is useful for municipalities' revenue and expenditure projections.

# ECONOMIC SECTOR PERFORMANCE

The top three sectors dominating the local economy of the Mossel Bay municipal area is the finance, insurance, real estate and business services sector (R1.938 billion; 27.9 per cent in 2016), followed by the wholesale and retail trade, catering and accommodation sector (R1.192 billion; 17.1 per cent) and manufacturing sector (R1.041 billion; 15.0 per cent). Combined, these top three sectors contributed R4.169 billion (60.0 per cent) to the Mossel Bay municipal economy, which was estimated be worth R6.951 billion in 2016.

Mossel Bay GDP performance per sector, 2006 – 2017									
Sector	Contribution to GDP (%) 2016	R million value 2016	Trend		Real GDP growth (%)

Source: Quantec Research, 2017 (e denotes estimate)

The 10-year trend, between 2006 and 2016, shows that the finance, insurance, real estate and business services sector registered the highest average growth rate (4.3 per cent), followed by the wholesale and retail trade, catering & accommodation sector, transport, storage and communication sector as well as the general government sector (2.7 per cent each). Of concern is the the fact that growth in the manufacturing sector was stagnant during this period. Overall growth in all economic sectors were estimated at 2.4 per cent in the Mossel Bay area from 2006 to 2016.

# LABOUR

This section highlights key trends in the labour market within the Mossel Bay municipal area, beginning with a breakdown of skills of the labour force, followed by employment numbers per sector as well as the unemployment levels. The majority of workers in the Mossel Bay labour force in 2016 was dominated by semi-skilled workers (41.9 per cent) whilst 32.3 per cent were skilled and 25.8 per cent were skilled.

Mossel Bay trends in labour force skills, 2006 - 2017					
Formal employment by skill	Skill level contribution (%)	Average growth (%)	Average growth (%)	Number of jobs 2016	
	2016	2006 - 2016	2013 – 2017e	2016	2017e
Skilled	32.3	3.6	3.0	8 166	8 307
Semi-skilled	41.9	0.0	0.9	10 606	10 517
Low skilled	25.8	-0.6	0.9	6 528	6 471
<b>Total Mossel Bay</b>	<b>100.0</b>	<b>0.8</b>	<b>1.6</b>	<b>25 300</b>	<b>25 295</b>

Source: Quantec Research, 2018 (e denotes estimate)

The number of skilled workers increased by 3.6 per cent with zero growth in semi-skilled workers and a reduction in the low skilled workers during the period 2006 – 2016. An improvement in education and economic performance can contribute to a further decrease in low-skilled workers.

The wholesale and retail trade sector contributed the most jobs in the Mossel Bay municipal area in 2016 (8 420 or 23.8 per cent), finance, insurance and business services (7 070 or 20.0 per cent) followed by the community, social and personal services (5 318 or 15.0 per cent).
