

# 2020 Procurement Disclosure Report

Western Cape  
Government

BETTER TOGETHER.

**Authored by:**  
Provincial Treasury  
Provincial Government  
Supply Chain Management

## Introduction

In line with the requirements of section 217 of the South African Constitution and the Western Cape Government's (Western Cape Government), continued commitment to clean governance and transparency in public procurement, the Provincial Treasury is pleased to publish the second edition of the Procurement Disclosure Report for Western Cape.

This report details all COVID-19 expenditure in the Western Cape from **1 April 2020 until 31 July 2020** and goes further than previous edition that dealt only with PPE.

Procurement Disclosure Reports are published on the [Provincial Treasury website](#). The next report will be available on 30 September 2020.

## Background

The Procurement Disclosure Report provides the public, oversight bodies and other interested parties with useful information on public procurement activities related to the COVID-19 pandemic. The quality and scope of information is being progressively expanded over time. The first report focused on the procurement of Personal Protective Equipment (PPE), while this second report now includes all COVID-19 related procurement.

## Objective

The Procurement Disclosure Report promotes transparency and public oversight of procurement within the Western Cape Government. This report provides accurate, relevant, meaningful and credible information, presented in a user-friendly and accessible document. It provides further context and insight on Western Cape Government procurement activities and processes.

The report combines procurement data collected from various sources and eliminating duplication and discrepancies that result from lead and lag times of various systems in capturing procurement transactions.

### REFLECTIONS ON PPE PURCHASING

*Since the declaration of the National Disaster, the Western Cape Government has spent R 683.78 million on Personal Protective Equipment (PPE). This equipment is essential to ensuring that basic services continued to be provided whilst protecting frontline and essential staff when performing their functions.*

*Procurement in the Province has been managed from a centre-led approach and not a centralised approach.*

- *All departments procure their own PPE requirements through their own supply chains in keeping with prescribed provincial and national requirements;*
- *Provincial Treasury has established databases of suppliers for cloth masks and other PPE that enable: (i) standardised, uniform have been approved by the Departments of Health were utilised; (ii) pricing for each item, lead times for delivery and quantities that suppliers could deliver; and (iii) this could be compared to benchmark prices that are issued and adjusted by the National Treasury.*
- *Where possible, existing contracts were used to source specific PPE requirements. Where this was not possible, competitive processes were followed. In instances where there was an immediate need to support frontline staff, emergency procurement was instituted. As far as possible, most emergency processes were tested for competitive pricing and negotiations with suppliers were undertaken to obtain value for money.*

***It must be noted that these transactions occurred during a period of unprecedented global demand for PPE. This sudden imbalance between demand and supply shortages and thus significant price increases. This situation was made worse by disruptions to both PPE production and delivery as a result of global and domestic lockdowns.***

## COVID-19 Procurement Processes

Western Cape Government departments relied on their existing procurement policies and the requirements of the Public Finance Management Act, 1999 (Act No. 29 of 1999) ("the PFMA"), the National Treasury Regulations, 2005 ("the NTRs") and Provincial Treasury Instructions, 2019 ("the PTIs"), to procure any essential goods and/or services in response to the COVID-19 pandemic. The following procurement methods are relevant to the Western Cape Government's response to COVID-19:

- **Honouring departmental existing contracts:** that departments already had in place prior to the COVID-19 pandemic; or if so required, **extensions and expansions of existing contract;**
- **Competitive bidding** as and when reasonable and practical in lockdown conditions;
- **Procurement from national or provincial transversal contracts.** These contracts are facilitated by the relevant treasuries to consolidate purchasing power across procuring entities;
- **Contracts procured by other organs of state:** in some instances, departments utilised contracts established by other organs of state that made provision for provincial participation;
- **Procurement by way of limited bidding:** in some instances, departments utilised limited bidding provisions whereby bidding is reserved for a single source/specific group/category of possible supplier/s; service provider/s or contractor/s;
- **Emergency procurement:** in a limited number of instances, departments utilised emergency procurement policies as aligned to current legislation and regulations. Departments utilised the Western Cape Government eProcurement system when option exercising this option. This system facilitates the sourcing of quotations; manual quotation processes; or used limited bidding or any other method defined in its policy.

## Reporting Methodology

The information in this report is drawn from various systems, including the Departmental Bids Awarded Registers; the LOGIS provisioning system, the ePS procurement system for quotations (now used for formal bids during the emergency dispensation), and the BAS payment and accounting system. This information is then matched and verified against the National Treasury's Central Supplier Database (CSD) and the Western Cape Supplier Evidence Bank, with respect to supplier information.

Supplier information is then correlated with government personnel information system (PERSAL) to ensure there is no conflict of interest for state employees doing business with the state. It is further validated against the National Treasury's register for tender defaulters.

To note: Departments also submitted a weekly report on all PPE and COVID-19 expenditure to the Provincial Treasury (PT), including suppliers, prices, units of measures and expenditure to date that was consolidated by the PT and submitted weekly to the National Treasury.

# Procurement Requirements for PPE and National Treasury Benchmark Pricing

The National Treasury (NT) prescribe requirements for PPE that must be complied with in order to do business with government. It is important to note that the requirements listed below was not immediately available when the national state of disaster was declared:

1. That PPE items must comply with minimum specification as determined by the World Health Organisation (WHO); the National Department of Health (NDOH) and the Department of Trade and Industry and Competition (DTIC);
2. Prices must be equal to or lower than the applicable benchmark prices issued by NT with a 10% allowable variance. Prices above the 10% requires the approval of the relevant accounting officer of the procuring entity. Four iterations of benchmark prices were issued by NT;
3. Supplier must be registered on the NT Central Supplier Database (CSD) and any other database as approved by NT;
4. Between 28 April 2020 and 20 May 2020, cloth mask suppliers were required to additionally be registered with the Department of Small Business Development. This requirement was subsequently repealed by the NT on 20 May 2020; and
5. Where applicable, the items must meet the minimum threshold for local content and production for the textile, clothing, leather and footwear sector.

This table depict the timeline for benchmark prices issued:

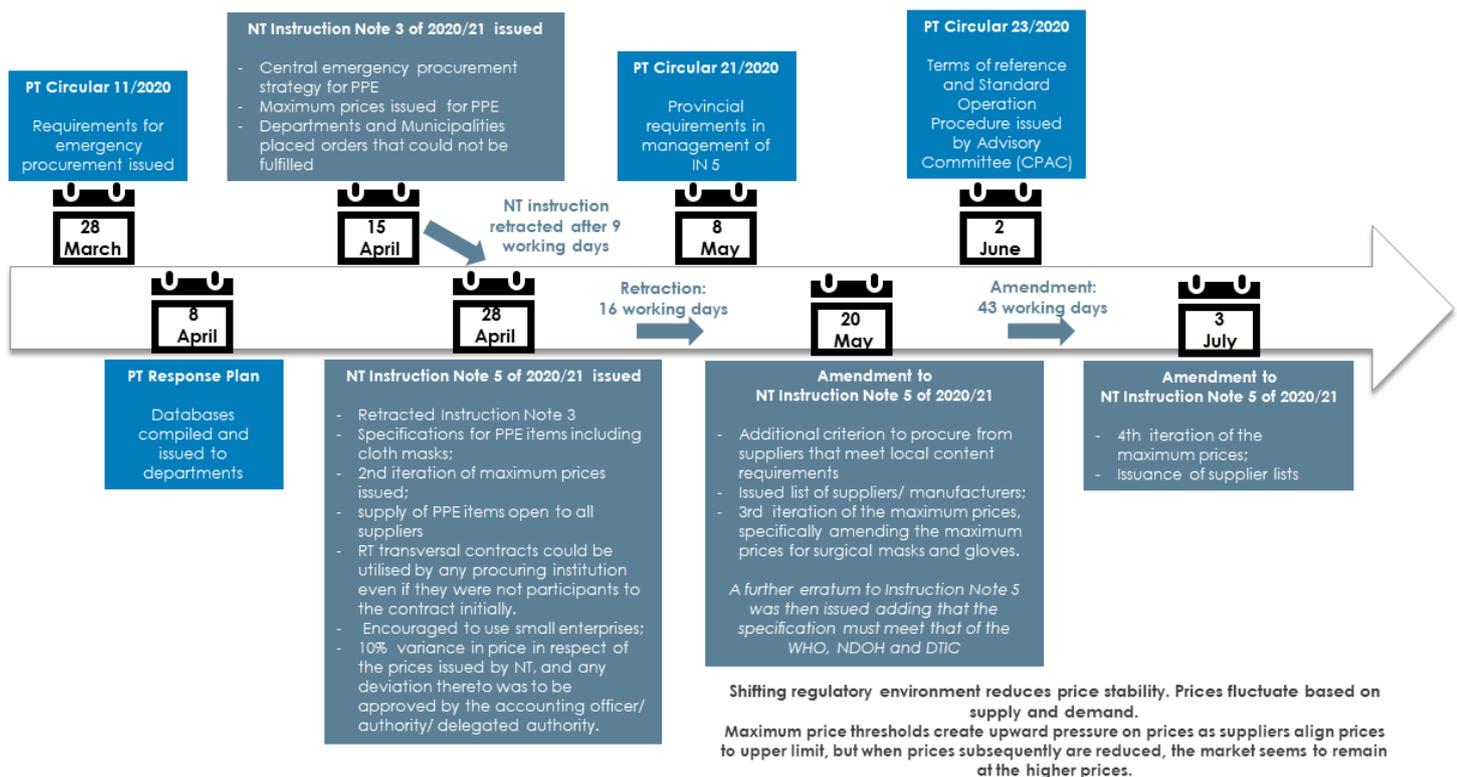

Table 1: National Treasury PPE unit price and unit of measure:

# Oversight of Procurement

While the Provincial Treasury plays a largely enabling role in supporting compliant and effective supply chain management in government, it also has regulatory responsibilities in terms of the PFMA. These include detailed monitoring of transactions across departments that is designed to support Accounting Officers to proactively manage any emerging procurement risks. This is complemented by Assurance activities in the province, such as Internal Audits and forensic services. External oversight activities include statutory external auditing by the Auditor General of South Africa, and formal investigations by the Special Investigative Unit and other agencies.

Citizen oversight is an important complement to these activities. The Western Cape Government supports and protects whistleblowers. Should you have any information about irregularities related to supply chain management matters, please report to:

## Frequently Asked Questions

Frequently asked questions and answers about Western Cape Government PPE procurement:  
<https://www.westerncape.gov.za/provincial-treasury/procurement-disclosure-report>

## Report Glossary

- **Payment Quantity** – The number of items purchased
- **Last Unit of Measure** – The size, volume or composite quantity of items
- **Average Unit Price** – Average cost per individual unit paid by the Department
- **Date of Applicable NT Price** – To cross reference National Treasury (NT) benchmark prices, this date must be used
- **Payment Amount** – Total amount that was paid to the supplier for a particular Purchase

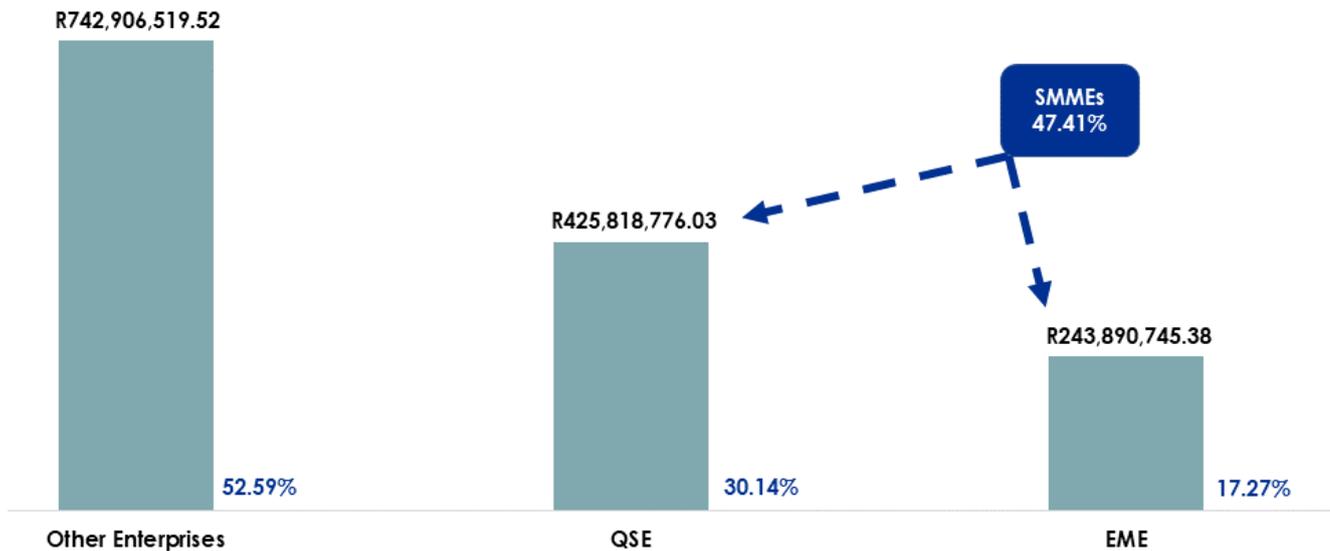

# SMME Spend Snapshot

In terms of Section 4.1. of the Broad Based Black Economic Empowerment Amendment Act, 2013 (Act 53 of 2003) any enterprise with an annual total revenue of R10 million or less qualifies as an Exempted Micro Enterprise (EME) and in terms of Section 5.1. a measured entity with an annual total revenue between R10million and R50million qualifies as a Qualifying Small Enterprise (QSEs). These enterprises are collectively classified as Small Medium Micro Enterprises (SMMEs)- small, micro and medium enterprises.

Preferential procurement is one of the objectives of broad based black economic empowerment and as per the Preferential Procurement Policy Framework Regulations, 2017 all bids are evaluated in terms of the 80/20 or 90/10 preference point system for which the 80 or 90 points are allocated for price whilst the 20 or 10 points are allocated for preference according to the B-BBEE contributor status of the respective bidder.

Graph 1 depicts the collective Western Cape Government spend that went to SMMEs, which equate to 47.41% of total procurement, far exceeding the national target of 30% spend with SMMEs via sub-contracting mechanisms.

## COVID-19 expenditure with SMME's:

# Expenditure

\*NB: All transactions have been consolidated as per item description purchased in respect of the supplier purchased from.

## Summary of expenditure per department:

Department	PPE Expenditure	Other COVID-19 Expenditure
Department of Agriculture	R2 986 818,46	R871 500,00
Department of Community Safety	R971 517,01	R338 295,29
