

DOES YOUR CHILD STRUGGLE TO DRINK FLUIDS, REFUSE BREAST
FEEDING, VOMIT, HAVE A RUNNY TUMMY, OR
A FEVER?

DIARRHOEA CAN KILL YOUR BABY.

Please don't leave it untreated! The Western Cape Department of Health
urges care-givers to be vigilant and apply the following mixture:

1 LITRE CLEAN
WATER

8 TEASPOONS
OF SUGAR

$\frac{1}{2}$ TEASPOON
OF SALT

**LIFE SAVING
REMEDY**

If your child is not getting any better after administering the solution, go to
your closest clinic or Community Health Centre immediately.

DO NOT WAIT IN THE QUEUE

Tell the health worker your child is very sick
