

Integrated Management of Childhood Illness: Household and Community Component

IMCI has 3 components, namely improved case management of children, improvement in the health infrastructure and the household and community component (HHCC).

HHCC deals with ways in which family and community practices can be improved in the household and the community by means of health education and health promotion.

At present this component consists of the following four groups of key family practices:

- **Growth Promotion and Development:**
These are practices that will assist a child to grow and develop both mentally and physically.
- **Disease Prevention:**
These actions consist of practices to prevent diseases from occurring.
- **Home Management:**
These are practices to be carried out at home once the child becomes sick.
- **Advice given on Care Seeking and Compliance to Treatment:**
This is advice on when to seek help outside the home at an appropriate healthcare facility.

NATIONAL ANTHEM

Nkosi sikele' iAfrika
Maluphakanyisw' uphondo lyawo,
Yizwa imithandazo yethu,
Nkosi sikela, thina lusapho lwayo.

Morena boloka setjhaba sa heso,
O fedise dintwa la matshwenyeho,
O se boloke, O se boloke setjhaba sa
Heso,
Setjhaba sa South Afrika
- South Afrika.

Uit die blou van onse hemel,
Uit die diepte van ons see,
Oor ons ewige gebergtes,
Waar die kranse antwoord gee,

Sounds the call to come together
And united we shall stand,
Let us live and strive for freedom
In South Africa our Land.
