Due Diligence Processes and Procedures

- **Data cleansing and preparation**
  - Identification Number (ID) used as the common denominator
    - Verify all ID numbers on database
      - CoCT did a bulk download from CIPC
      - Vendor Number/Vendor Name/Company Registration Number
      - CIPC supplied ID Numbers of all members and their status per vendor
    - Upload in database
  - CoCT continuously update database information by requesting vendors to update their data by sending them their data list as per the database.
    - Return of updated information ± 60%
Due Diligence Processes and Procedures

- **Data cleansing and preparation**

  - Although we constantly inform vendors that the onus is on them to update their data and the response is poor.

  - Accurate data is one of the biggest challenges in every database management process.

  - Various processes can and must be in place to ensure data validity with specific mention of the Identification Numbers.
